

Practical Course / Training Evaluation Form

Dear Student,

The purpose of this questionnaire is to improve and continuously update the course content in line with the specialization requirements, professional needs, and labor market demands. This form is not intended to evaluate the performance of the course instructor or the student, but rather to identify strengths and weaknesses in the course content to help determine implementation challenges and ways to improve its effectiveness in achieving the intended learning outcomes.

The questionnaire consists of several items. Please read each item carefully and express your level of satisfaction by selecting only one option per item by placing a (✓) mark under the appropriate choice. If more than one option is selected for a single item, your response will be invalidated. If some items are left unanswered, the entire form will be void.

Note: All responses will be treated with strict confidentiality and will not be attributed to any individual.

Preliminary Data:

College: <input type="checkbox"/> Scientific <input type="checkbox"/> Theoretical	Specialization / Program: _____
Level: <input type="checkbox"/> First <input type="checkbox"/> Second <input type="checkbox"/> Third <input type="checkbox"/> Fourth	Gender: <input type="checkbox"/> Male <input type="checkbox"/> Female
Course Name: _____	Course Code: _____

Evaluation Items:

No.	Item	Strongly Agree	Agree	Somewhat Agree	Disagree	Strongly Disagree
1	The objectives and outcomes of the practical course were clearly defined.					
2	The training is relevant to the course/program.					
3	The training supervisors were prepared to receive students.					
4	The time allocated for training was sufficient.					
5	All required skills/objectives were covered during the practical training.					

6	Training venues were appropriate for the nature of training and student numbers.					
7	Supervisors/instructors adequately answered questions related to the training.					
8	The training helped me understand and apply what I learned in theory.					
9	General safety was observed in labs and training venues.					
10	Student evaluation was appropriate and aligned with the training plan.					
11	All necessary materials and tools for training were available.					

Please write any comments or suggestions about the practical course or training:
