## TERRORIST THREAT GONE

Marines carrying a wound comrade.

Another day, another terrorist group decapitated. After the surprise attack at the Nuclear Power Plant, the 15th MEU, alongside the RTA counterparts, were able to conduct Seek and Destroy missions against the BRN. This included but not limited to, destroying key supply depots and training grounds, and brutally from the sounds of it there were reports of air strikes and mortars flying overhead, to finding and killing key individuals in the BRN. Reports indicate that a Commander was set to be captured by the MEU but was executed by his own secretary for attempting to surrender. This should tell you folks that the BRN are so radical in their thinking they are willing to kill even their own allies who do not truly believe what they stand for. This makes me, James Johnson Johansen, proud to be an American where we are not so radical we can not think for ourselves.

### NEW ORDERS?

After the successful elimination of the BRN, the 15th MEU was suddenly tasked with new orders and instead of coming home as we all hoped, they are now under the command of INDOPACOM. Could this suggest they are now considered under a combat deployment? Has U.S. intelligence found something out? We tried to reach out to our contacts in the White House who refused to explain why the sudden deployment.

### DEATH OF ALLIES

Thailand is grieving tonight following the recent joint operation with the 15th MEU. Reports indicate the BRN had 4 RTA members as prisoners. Due to unfortunate timing, it was later found out they were killed in the line of duty. During this time, the Thailand Government had asked the U.S to withdraw from the country to allow time for them to grieve in peace.
