

Scarab Bag

INSTALLATION GUIDE

These instructions are for the new version of the Scarab Bags. The older instructions included a velcro pad for attachment which is no longer needed.

Thank you for choosing [Cruzbike](https://cruzbike.com) and the Scarab Bag. This lightweight pack fits under the seat of the S40 and V20. It optimally positions cargo weight and is roomy enough for commuting needs and an overnight cycling trip.

Installation

1. Remove Scarab bag from Packaging and undo velcro straps and remove seat cover.
2. Wrap rear velcro straps, then front velcro straps and finally center velcro straps around the seat.
3. Next use strap with buckle to go around and above the rear seat stay (**first image below**). Clip and tighten (**second image below**).
