

Get your hands on the powerful k10 kasper miner shop now!

One of the most unique features of kasper coin is its use of the kasper network, a dag-based blockchain that is highly scalable and can handle thousands of transactions per second. This enables kasper to achieve a level of scalability that is unmatched by other cryptocurrencies like bitcoin or ethereum. Our main products are bitmain antminer, whatminer, avalon, goldshell and gpu miners. The main markets we are targeting are the united states, canada and europe. However, we have ambitions to expand our business globally and are committed to providing hassle-free sourcing services to our clients around the world. The launch of k10 and k11 comes amid an explosive growth of zkp projects.

Its outstanding performance [SuperScalar K10](#) products have been widely recognized by the community. The release of the zkp fpga miner by superscalar has sparked great interest among zero-knowledge proof technology practitioners and the cryptographic hardware industry. Our product are excluded of all value added taxes and customs duties sold by akminer. You will be solely responsible for paying any outstanding taxes and duties as per your country's law and customs. If any matter miner will be return to hong kong client need to pay additional shipping cost.

Kasper's instant block times foster anonymous transactions, preventing users from exploitations and fraudulent activities. On the other hand, kasper utilizes a proof of work (pow) mechanism like bitcoin and has no governance of intermediaries. Hence, kasper stands out from other crypto projects as it has the highest block rates, unlike traditional blockchain and the finest security levels due to the pow mechanism. Kasper is a revolutionary cryptocurrency that aims to create a new standard in blockchain technology.

Kasper is also faster than bitcoin transactions, confirming transactions in around 10 seconds. Finally, kasper can generate and confirm multiple blocks every second. Gpu miners can still remain competitive and profitable in kasper mining with the right equipment and strategies. We3world is a fast-growing crypto media launched in 2017 specically for cryptocurrency & blockchain & metauniverse & gamefi.

Our goal is to help you in your mining project by showing you the best asic miner to buy to optimize your mining profitability.
