

# MARCOS ESQUEDA

Front-end Developer

## SUMMARY

I am a Front-End Developer and JavaScript programmer with over 6 years of experience. Specialized in React.js and TypeScript. Focus on enhancing performance, ensuring responsiveness, cross-browser compatibility, and improving accessibility.

## WORK EXPERIENCE

### Front-end developer at Clorian [Tickets Business] | Cataluña, Spain | Remote

December 2022 — July 2024

- Developed a comprehensive administrative dashboard for a ticket company handling 3 international companies, to share and create information related to tickets and events. Utilized by users and product managers, streamlining module management and enhancing user engagement.
- Created and optimized over 5 reusable components in React.js, contributing to more than 10 dynamic views that significantly improved the overall user experience.
- Collaborated closely with a small team of developers to build a modern, responsive web application, adhering to best practices in coding and testing.

### Web Developer at Rifplay [Raffles company] | Colombia | Remote

December 2021 — July 2022

- Developed and implemented some reusable React.js components for user registration, awards, and raffles and enhanced development speed.
- Improved the user experience over 2 views in the dashboard, applying functions and refactoring.
- Modified and created over 5 React components using React-Bootstrap.

### Front-end developer at Quyumasi [IT company] | Peru | Remote

September 2021 — October 2021

- Created over 2 components with views in the dashboard for the medical scheduling in the clinic with over 1000 customers.
- Responsible for implementing pixel perfect and responsive views on design in Figma.

### Front-end developer at Savo [IT, Business, auto parts] | Venezuela, Aragua.

September 2019 — October 2020

- Crafted multiple views from a Bootstrap 4 Admin Dashboard template reusing features to create custom admin panels for a car rental company in Margarita Venezuela.
- Built over 15 views with Blade (Laravel template system) componentes ready to be used.
- Adapted legacy Laravel/PHP PDF print libraries to display reports about rental information like expiration date, type of cars, and payment bills. Used in the web browser, ensuring cross-browser compatibility.

## LANGUAGES

Spanish (Native), English (Intermediate). **Certification:**

<https://www.efset.org/cert/xfKuGP>
