Cryptocurrency Prophetic Dreams received by Christopher Harris

My name is Christopher Harris and I am an Australian Holy Bible believing Christian who receives dreams from God. I am sharing these dreams as led by God and hope you may be blessed by them. Praise and glory to the Lord our God Jesus Christ!

Date is written day/month/year (Australian). ***This list is updated to 14th April 2021.***
All prices are in USD unless otherwise specified*. Please note that the correct interpretation of prophetic dreams is required. I did not always make the correct interpretation of the dreams I received or their timing.* ***Please seek the Lord regarding your approach, and this information does not constitute financial advice.*** *The list is in order of oldest to newest, so the most recent dreams are at the bottom. Additional dreams not listed here are discussed or mentioned in my Youtube videos, download links provided below, and I have included my recent videos as well:*

15/12/2017: Dream from God - Crypto Electroneum (ETN) will do EXCEEDINGLY well! http://www.mediafire.com/file/5q2asj1bbg9q227/

26/1/2017: Updated Crypto dreams from God - 30k BTC to 2k! Jan 30 to Feb 30 Market Crash (fulfilled) http://www.mediafire.com/file/v3k2rzrs5jtjb7a/

25/2/2018: Crypto dreams - BTC $12,200 to $4,850, LTC surge to $400, PPT, Dow Crash to 11-12k http://www.mediafire.com/file/9en5q8gjtyhz4a8/

4/3/2018: Crypto Dreams Update: LTC to $750/850, BTC $12,200 to $4,850, BTC $30/35k to $2k to $60k 20m http://www.mediafire.com/file/0p43n0yl509rsn6/

18/4/2018: Electroneum (ETN) Update and Timing Clarification 15m 39mb MP4 http://www.mediafire.com/file/de7lco7lvckq62y/

24/4/2018: Reddcoin (RDD) dreams from the Lord – going up! 15m 39mb MP4 http://www.mediafire.com/file/m5f78fqw40k75cm/

15/5/2018: Dream from God: Reddcoin (RDD) suddenly spiking to over $3! Be ready! 27m 71 mb MP4 http://www.mediafire.com/file/re583c2fan2vefq/

31/5/2018: Dreams: Crypto update, Reddcoin (RDD), Electroneum (ETN), Stellar Lumens (XLM) 11m 29mb MP4 https://www.mediafire.com/file/9ggiewmrxvhdy2k/

14/11/2018: Crypto dreams: Good entry for Reddcoin (RDD) at 0.15 cents (USD 0.0015) coming soon 17m 44mb MP4 https://www.mediafire.com/file/1ubibw48bd3cgbc/

8/1/2019: Dream: Market Crash and Bank Bailouts are Coming Again! 16m 43mb MP4 https://www.mediafire.com/file/rflvp75asxvkzys/

22/3/2019: Crypto dream: BTC to $3,400/$3,600, rise to $4,400 with RDD at $0.0089 (0.89 cents) good RDD rise! 9m 29mb MP4 https://www.mediafire.com/file/7rnq6d054rnde6m/

23/1/2021 – Dream from God: Electroneum (ETN) to $51 USD, Trump removed fulfilled 5m 57MB MP4 https://www.mediafire.com/file/eex7pxfyotqgp6u/

26/2/2021 – Dream from God: “ETN Moving First”, Electroneum spike to over $1 USD 10m 51MB MP4 http://www.mediafire.com/file/p6n4nmwilo1ereg/

20/3/2021 – Dreams from God: Crypto Winter is Coming, BTC crash to $0, BTC to $855,000 AUD 23m 120MB MP4 https://www.mediafire.com/file/4g8pl3ukcou9pkg/

26/3/2021 – Dreams from God: BTC to 111k, Crash to $0, Gold to $35,000, ETN moves 14m 119MB MP4 https://www.mediafire.com/file/rfe73oeci43onmo/

3/4/2021 – Dreams from God: ETN to $0.30 to $0.005, Amazing Wealth Multiplication Potential! 12m 75MB MP4 https://www.mediafire.com/file/07z59x7bnb220ps/

Dreams (in order from oldest to newest):

26/1/2018: “Update: We are nearing the end of February 2018. The crash the Lord spoke to me about which occurred this month was a more minor market crash from 11k to 6k (still a 46% crash). A market crash was fulfilled, however, it was not the major 30k to 2k crash I was shown. THIS IS STILL COMING. Prior to this the Lord has revealed to me another crash from $12,200 to $4850 approx. Then a move to $30-35k then 2k, then 60k. This is the sequence the Lord has revealed to me. May God bless you.”

26/1/2018: “Further update: I do not know what February 30 means, as this is not a real date in the current calendar. I believe it means something, perhaps a short time outside of the February window into March, may be hinting at another crash. I know there is a coming crash to $4,850 but I do not know when it will be. This will be a greater size crash than what occurred in early Feb (46%), an approx 60% crash. I do not know when this will be, but I believe it will begin shortly after BTC reaches $12,200. May God bless you, Christopher.”

26/1/2018: “Nocis, I didn't say it was the best entry at $58 I said it was a very profitable entry at $58, which it is! LTC will go to over $900, that is still a very profitable entry. God showed me it would go to $58 long before it went there. When I posted this LTC was $178 USD. Also in the dream where it hit $58 USD the big crypto exchange OKEx crashed! This hasn't happened yet, so the Lord could have been showing me the LTC entry at $58 is when OKEx crashes and fails (a major exchange). You need to consider what I share properly without incorrect assumptions. Sometimes it takes interpretation to make the right interpretation of what I receive from God, and I can make mistakes in interpretation. God bless you.”

16/2/2018: “UPDATED TARGETS 16/2/2018 – PLEASE SEEK THE LORD AS TO WHAT YOU SHOULD DO. As posted on Z3News comments: https://z3news.com/w/bitcoin-technical-analysis-confirms-prophetic-price-targets/#comments The Lord showed me a safe selling point of $11,300 Bitcoin USD, then I saw $11,600 clearly, and after that (recently) I saw $12,200 but faintly, which could mean we only touch this price. Target sell for me is between $11,500 and $12,000. The top of the downtrend channel (on the BTC chart) is about $12,200 but as time goes on this gets lower to around $11,600 so if we reach the top faster more likely we will reach the $12,200 target I received (we may only touch it briefly). The Lord showed me after this high to $12,000 approx (I don’t know exact turning point necessarily) we will crash approximately 60+ percent in the market, with the target low I saw of $4,850, and I saw 444 which I felt was potentially about cryptos could be $4,440. Others on Z3 have received the target LTC price for this next drop at $87 and $89. Watch the price of BTC as LTC reaches this price, it may be under my target

of $4,850, if so, the next target is $4,440. Interestingly if LTC reaches $240 when BTC reaches 12k (seems likely), to reach $87 or $89 is a 63.8% drop. If we apply this to my target of $12,200 BTC we reach $4,422 after a 63.8% drop, fulfilling both of the targets I received (potentially). After this I believe we will begin the major third wave rise I saw to $30,000 to $35,000 (I don't know exact top) before a major 95% crash to $2,000 BTC. This I believe will coincide with a LTC price target of $58 for the bottom of this crash and a very profitable entry into LTC at this price (I was shown to enter at $58 with all my investment but It will only be temporary for me before I move back to ETN). At this time I was shown also one of the largest Bitcoin exchanges OKEx exchange will fail and collapse. This could be the reason for the crash from the heights of 30-35k (look up Mt. Gox which was a 90% crash due to hacking and exchange failure). I believe the crash could be news based and in my dream the exchange failed and there was fraud involved. It is important to seek the Lord Jesus regarding your buy and sell points, this is what has been revealed to me and I am going with this. Seek the Lord for confirmation. Also seek the Lord regarding your exit strategy during the third wave towards $35,000, as the exchanges may not be a safe place to keep your money or coins. You may want the coins you are holding in safe wallets not on exchanges. You may want to cash out into your bank account entirely and wait for the crash, meaning you could miss the very bottom, but you could transfer back in and buy at the lower prices. Otherwise you need to seek the Lord regarding an exchange that will remain safe you could keep your $ on to position you to re-enter the market at the bottom (when BTC is $2,000). I am seeking the Lord regarding this (safe exchanges) and will update if I receive anything further. I love you my brethren. May God bless you. Christopher."

25/2/2018: "Dream update: LTC takes small pause before following BTC. Update on LTC dream. The first part of the dream I describe in this video was seeing BTC shoot off from the low 9k area (under 9,500) then the chart switched to LTC as I saw it shooting up. I just had a dream now that repeated twice which explains LTC takes a little pause before following the BTC breakout. I saw tonight twice (it repeated) LTC break up when BTC hits 11,300 specifically. God bless. Christopher."

25/2/2018: "UPDATE ON RECENT DREAM- $400 MAY NOT BE TOP (As posted on Z3 News today while BTC at $11,150) "I should have probably described this earlier. But here is more detail of the recent dream since it could have more significance. I was in a bus with my close friend and it was dusk/night and I had the laptop open. I saw BTC at about $12,200-12,400 and LTC at $750 and I was trying to sell but I wasn't logged in the exchange. Then I saw outside a man take a shotgun from his car and approach over to us. I had to decide whether to login and sell or try to defend us. I went to defend ourselves in the dream, the man pointed the gun in the window but didn't fire. I went outside and confronted him and he had a knife/sword instead of a gun and I ended up fighting him. Turns out he was a demon in human form. After the fight ended I drove away. So I don't know if $400 is the top of this move in LTC, or if it may go up higher to $750, but there is difficulty selling here as we were under attack. I don't know. If BTC reaches the $12,200 area and LTC is far away from $750 then it seems the dream is unlikely to be genuine about the figures. I'm unsure about this dream but thought I'd explain more, since it was the only dream I had of LTC where I tried to sell. I'm not sure exactly my approach, but looking to exit around $12,200 area as this seemed another sign of danger around that area. God bless. Christopher."

25/2/2018 "Update: had a dream I checked on my phone the prices app and LTC was $481. So as far as I'm concerned this confirms the move above $400. $750 is final target but at this level in my other dream almost immediately danger was involved. I don't know if LTC will

take off soon from 11,300 BTC area or later on the way back up through 11,300 after going down some first. I'm still holding and going to be very cautious and planning exit into fiat at or near my final BTC target of $12,200. I believe after these figures are achieved the drop towards $4,850 will occur. Please seek the Lord God Jesus Christ for your approach. God bless. Christopher."

3/3/2018 "UPDATE: (yesterday) as posted on Z3news "I was praying to the Lord when are we going to make the move in BTC to 12.2k and LTC and in the midst of a crazy dream last night about something else I saw that BTC was going to 9.2k and would go up from there. This could be the breakup for BTC I saw from 9k in my dream rather than what happened earlier from 9.3k, as we didn't have enough in the rally to break the previous high nor hit 12k. I believe the rally from 9k will be the one that LTC will break out from at 11.3k and the one I saw in my dream, so I believe the final upward move to mid 12k will occur soon. God bless, Christopher."

4/3/2018 "UPDATED DREAMS PINNED HERE LTC targets I've received recently $307 USD, $400, $750, $481. BTC target is $12,200 then $4,850, and I saw it going to mid 12k when LTC is at $750, but there was danger was at this area. I don't know if LTC will surge to $750 in all exchanges or it may surge on certain ones. Plan your exit if you see fit. Seek the Lord Jesus. May God bless you. Christopher."

4/3/2018 "UPDATE: (Today) as posted on Z3news: "Dear brethren, the $9.2k I received has been fulfilled for BTC, however, I don't know if we head up from here directly or continue further down. In the dream I knew we were going up from $9.2k, so whether we go down some now I believe we are heading up towards mid 12k soon. I had a number of dreams last night I want to share. One was that I hadn't been checking prices in a while and looked at my laptop and BTC was $12,400 and LTC was $692. I was considering selling though LTC $750 had not been reached from my other dream and I was trying to log in. The price in the other dream of LTC at $750 I didn't see exactly but probably more around $12,600 but was high danger at this level. The Lord may have given me this as a better safer exit point potentially, though there was the similar theme of not being logged in my exchange. The dream changed and I saw Bitcoin under $1000 in the $900s and I was thinking in the dream why are they selling at these prices! Then I saw $16,000ish for a moment and $7,700ish on Coinmarketcap and I saw/heard it was the recovery from the major low, the prices were recovering and those who held or bought in at the low prices were happy. Before this night of dreams I prayed to the Lord whether I should get involved in UVXY. This night I dreamed of seeing FAZ at $71 and seeing UVXY at $2,700ish area, at the same time. This shows to me UVXY will move first (currently worth $15.5 USD, FAZ $10.47), and is more profitable in the short term. I am looking to obtain some now. These were the figures I saw tonight and the dreams I had. Please take this to the Lord for personal confirmation, for strategy, guidance, your own personal action and seek Him for approval. May God bless you, your brother Christopher."

As posted on Z3news 15/3/2018 "I saw LTC at $850 last night. Could be a top of a big run. Previously I saw $750 when BTC was around mid 12k (maybe 12.6k), and before I saw $12,400 BTC and $692 LTC. My $12,200 target could be a turning point (if we touch in 12k twice like Jeremy's head touch on the ceiling before trash collecting trampoline dream), but it doesn't seem to be the top of BTC. The danger I experienced around $750 LTC could be related to being unable to login and place orders. I had limit orders in at $730 but moving them up to $800. I also had a dream last night after my honesty and loyalty to the Lord was tested I received a large card with KING on it with a square in the top left that was green. The

words on the card (kind of resembled a playing card) was (or was close to) “RIGHTEOUS are cryptocurrency” and on the back “Cryptocurrency is yours”. On the front there was a large 800 on the top right. Just before I received the card after the test I saw a black screen with 750 (seemed like my previous number) and a couple of smaller numbers. So I believe the first part is kind of what Christine was talking about the Lord views us in a way as cryptocurrencies (I can’t remember her post on this). Then the next is He has given this for our use. I took the $850 LTC dream and the 800 on the card (with the green square) as confirmation for me to put order at this price ($800 usd). I had a dream few days ago of my parents seeing LTC move over $1,000 aud and I told them I had my order in at $950. This is about $730 usd. So I think the move over $750 is happening. Beware of exchange login issues and lockout. I don’t know necessarily sequence and as I said we could touch 12k twice. So watch for break of BTC from 9.2k and LTC at 11.3k BTC. My 41 hour dream for the top if it’s days is the 16th (thanks James for reminding). I saw recently $1,100 LTC when BTC seemed near 11k but this seemed to be later like after a crash recovery (potentially during third wave rise or recovery after third wave crash) but showing LTC doing strong. This is my updated dreams and recent info. Take it to the Lord for confirmation and your approach. My exact approach is subject to change depending if we turn at $12,200 or continue rising. I’m watching to see for second touch in 12k before move to $4,440 to $4,850 (my targets) region according to Jeremy’s dream. We hit Bob’s number $8,200 awesome now we have LTC news tomorrow seemingly and the upper targets remain. May God bless you. Christopher."

Clarification: my 41 hour dream is either a top or a turning point and is either today or tomorrow IF 41 hours means days. Here's my post made 4th Feb 18 Aus time " I was asking the Lord last night when we were going to top and when we would turn. I received last night in a dream 41 hours. Not sure if it’s crypto related or something else, but for me that is Monday at 10pm to 12am (41 hours since I had the dream). I had the dream about 5.5-7.5 hours ago.I also had a dream yesterday I think of hearing/seeing the number 2 and 11 and saw a dirt bike doing a wheelie then going fast around a sandy corner with high traction. Not entirely sure if it’s market related or not." The dirt bike could mean time starts from 11th Feb, I don't know for sure. I saw this morning in a dream after praying if we were heading to 12k before sub 5k, I saw 9,200 ish BTC and 11,300 which were both the breakout targets the Lord showed me again. I believe we are heading up to 12k BTC to fulfill the other targets the Lord showed me and also today or tomorrow we will possibly change direction and head up again properly. Will see how it goes. God bless. Christopher.

UPDATE: As posted on Z3news 17/3/2018: "I prayed about whether $800 USD was a safe sell and last night I saw LTC ticking up $794, 795, 796, then it started ticking back down some, the dream ended. I don't know if there is a turning point just before $800. I did see $850 but it's possible it could reach this on an exchange but not all others, or it will move there after. In any case I've reduced my limit sell orders down some to account for this from where they were at $800. God bless, Christopher."

As posted on Z3News this morning 21/3/2018 "Dear Julz and others, interesting you mention this. I saw a few days ago in a second dream of BTC under $1,000 it was $400 while LTC was $400, I saw online people were calling it “catsh#$ coin” and remarking on the continual bad news with it, then I saw BTC shot up to $950 and I saw myself at the computer and I said something like “how are they selling? It’s going to go to $60,000!” dream ended. I saw also last few days BTC between or around 10-11k and LTC was $1,100. I was thinking after that this could be from a crash recovery where LTC does very well. I also in another dream saw LTC tick up to about $975 then move down fast to $930 then the dream ended. Possible top

of a huge run I don't know. I don't believe $750 is the top of the big LTC run but there is some danger at this level (approx mid 12k BTC) so I have my orders in already as it could have to do with exchange lockout (I had another dream of seeing online people couldn't login exchanges during a big LTC bull run). As I mentioned before I saw $850 and prayed about a sell point and saw price slowly up to $796 from $790 or so then ticking down slowly. Then after is when I saw the higher $975 figure and fast retract from there. Not sure exactly where it fits in or when these would be fulfilled but felt I needed to share. Having a lot of targets I've shared not yet fulfilled was making it harder for me to share but I know I need to tell and not worry about it. Just know that I don't know exact sequences I try to tell you what I've heard and seen and my interpretations are not going to be correct all the time. With regard to my 41 hour dream this was a top or turning point I had prayed for when I received that so from the 17th (41 days from the dream if it starts from then) we have somewhat turned so far (hit the low on 19th) or it marks a turn, otherwise it may mean months or I may not understand it fully. Lastly I prayed yesterday again if we are going up to 12k before down to sub 5k and I saw low $9000 area in a dream. When I previously prayed about that I saw $9,200 and $11,300 the breakout areas I was shown. I'm still holding, the Lord hasn't shown me to sell yet (aside from my earlier figures) and my previous advice is still "hold and pray" (doesn't necessarily mean it applies to you). See how it goes! Please seek the Lord for confirmation and what you should do (it works the best when you ask Him directly!) Praise the Lord! God bless, Christopher." And later today 21/3/2018 on Z3news "I forgot to mention I had another dream within the last week of being in a room with my parents who were by the computer and they were watching the Litecoin prices and they went over $1000 AUD (approx $770USD) and I mentioned I had a sell order at $950 and they were happy. I did move this up since the dream though as I received further numbers and prayed for a sell price and saw the slow tickup to $796 then slowly down to $785ish (USD) (doesn't mean this is the top necessarily, just what I saw). In any case watch for breakout BTC $9,200 area and for LTC breakout $11,300 area. Consider putting your orders in early (I have). I believe limit sell orders $750 to 790 for LTC is okay if you have them in advance, but know this is based on my interpretation of what I received so please seek the Lord regarding what you should do. God bless, Christopher."

UPDATE dreams: As posted on Z3 News today 22/3/2018 at 1pm "This morning I woke up 22/3/2018 at 4:30 am (it's now 12:30pm), and I wrote down a dream I had. I was in a public place like a gathering outside and It felt like we were all investors and watching the Bitcoin price and there was some excitement in the air. Somebody I knew from high school came over and he had been walking in the rain (though it didn't seem rainy there) with two guitars. On the smaller one the string had been damaged during his travel and he was trying to tune it but it didn't sound right. Another friend I know took the guitar and tried to tune it but it made an earsplitting sound. I was inside a caravan and watching the BTC price on my laptop. I was seeing it around the $9,200 area move to $9,500 then hover around here then when I checked again the price was $10,400 or so. The atmosphere felt bullish like there was excitement from the people. I realised we were nearing the higher targets I've received but saw that I wasn't logged in to my exchanges and tried to do so and somebody reached inside the caravan window and turned my computer off. Turns out it was a friend I knew and I told him not to do that since I was trying to trade and another friend I knew was with him and he said "we know you are worried you will miss out on a 3x gain" and it seemed like I was complaining too much. Then a genie came inside and scattered things around my room and I realised my computer screen was gone (I didn't see it I just knew it happened). I realised I had a backup screen. Then I saw I was running out of power on the laptop (it seemed like a laptop sometimes but a desktop computer other times). Then I tried logging in and the computer was

behaving strangely, my mouse pad was also gone and I couldn't find the exchange pages. I realised I couldn't log in. I heard "there's going to be a lot of noise tomorrow" (It felt like it was related to the run in prices. I did see LTC at $210 area. It could be that a lot of people aren't able to log in and sell during the higher prices and there will be a lot of complaints, or it could be something else). Then I felt relief since I had put my limit sell orders in already so just realised I will rely on that and hope they are fulfilled and trust in what the Lord showed me. Dream ended. I had a dream later that night of seeing on a chart the current move from low 7k area to 9k and I saw BTC was going to correct some (maybe towards 8k). I was telling my sister this is a normal correction since it usually never goes straight up and always corrects some before continuing up. So this last dream may be some comfort if the price begins to correct some that I believe we are still heading up towards the higher mid 12k targets and the higher LTC targets. I don't know how the two touches to 12k area will work with my LTC targets, we could reach the higher prices on the first or second touch, I don't know. My older BTC target is $12,200 so it's possible price could turn here or keep going up, but I have seen higher than this also $12,400 and around $12,600. I feel the first dream is probably suggesting the enemy is going to try to interfere to stop people from benefiting from this trade in some way, but I felt relief due to having my limit sell orders in. I'd welcome other views. May God bless you, Christopher." AND "The two touches in 12k I am referring to is from Jeremy Stager's dream. I'm just saying I'm not sure of exact sequence, but I felt comfort in the dream of having my orders in place in advance. God bless, Christopher."

Had a dream today 26/3/2018 of seeing $7,200-$7,400. My previous dream of seeing the correction from 9k on a chart, I didn't get to see it finished just saw it when it was part down in the 8k area. We could be heading further down some.

AS posted on Z3 26/3/2018: "This same morning 26/3/2018 my close friend had a dream (my friend explaining). In the dream there was a big red rubber helium balloon with a string attached. The string was fairly long but we realised if we blew the balloon up the balloon would be quite big and go up high in the sky and the string wasn't strong enough. We anchored the balloon down under a chair and it was bobbing there. Then we took it from 1 strand of string to 4 strands and was twisting it to make a much stronger rope and she was working on this when she woke up, it was almost at four strands. She knew the cord would be under a lot of pressure and it was going to be a weak point. She woke up and was thinking about it and felt it was very clear and received that the string on the balloon was a tether, and was referring to "Tether" (USDT), it was in a holding period and others were concerned about Tether and making sure it was strong enough and reinforcing it. Nothing was wrong with the balloon which could be filled at any time. They were quickly trying to secure it and secure it well. The balloon was partially inflated but could take more air and float much higher, it was a very big strong balloon that could even pick people up. The intention wasn't to fill the balloon yet until the Tether was fixed. Interpretation (mine): the balloon is the market, which is mostly dictated by BTC. The market can inflate much larger, and is a balloon full of helium so it wants to go up but it couldn't go freely up as it was secured to the chair and it was bouncing around a bit up and down but constrained. It was being kept down and held down, "ride delayed due to maintenance". The string connected to the balloon is Tether, which needs to be shored up to handle the tension and pressure of the balloon rising and growing (there are USDT markets in most of the main volume currencies). So the balloon can't rise and grow until the tether is shored up and strengthened, and in the dream this was almost completed. This suggests the market has been suppressed to sure up the strength of Tether, before the market will be allowed to work normally and the balloon inflated and allowed to rise, but a much stronger 4 strand cord (Tether) is now almost connected so the

balloon doesn't fly away. This also suggests the fastening of the extra cords and winding into rope is almost completed and the balloon is ready to be inflated and to rise. I believe this may also suggest Tether will not go down yet, but is being used in a way to control/rein in the market. I think once this strengthening is done by those who are involved the market will take off again. This is my interpretation and thoughts, please seek the Lord for understanding. Very interesting dream. May God bless you."

Posted on Z3 27/3/2018 "Going to have to apologise and issue a correction. In the dream of my parents at the computer seeing the Litecoin prices go over $1000 I DO NOT KNOW if this was USD or AUD (I did not see the screen). I previously assumed it was AUD since my Dad does look at charts in AUD mostly and uses an AUD exchange. But I realised this could have changed since I tell him I look at USD prices mostly. I need to be more careful with how I say things to be the most truthful to what I saw. So I do not know if the $1000 is AUD or USD and it was WRONG for me to assume it was AUD (the way I stated it was not true as I didn't see an AUD figure I was told it went over $1000). It is possible it is USD since in another dream I definitely saw a move up to $975 then a decrease to $940. I don't know if this is the same bull LTC run. In the dream I told my parents I sold at $950 and they were happy. I was thinking this was AUD previously but please know I am unsure. I am praying further about this and will update if I receive any further clarification. I realise I need to be more cautious about what I ask the Lord precisely and what He shows me exactly to convey it faithfully without assumptions. I am trying to improve in this. I am praying further regarding this coming LTC move as I have received a number of figures and need some further understanding. My apologies. Christopher. " If I receive any further clarification from the Lord I will likely make an update video. Regards, Christopher.

Update: 5/4/2018 as posted on Z3news " Had a dream last night I thought I'd share. In the dream I saw someone on a basketball court maybe at the freethrow line and he shot and it went in the hoop. This may have happened twice. I felt it was crypto related and it felt it had to do with BTC and LTC and that I should remember I had it. Rough possible interpretation: the height of a basketball player around 6ft brings the ball to his head to throw so about 6ft or
$6,000. The throw goes up higher than the hoop. The hoop is usually 10ft high. So the throw goes in an arc from 6ft to 12-15ft then drops through the ring at 10ft then goes straight down. So maybe $6,000 area to $12k plus then straight down from 10k. I also had a dream that night of BTC spiking up really quickly (at least it seemed like it in my dream) and it hit $15,000 before seeming to quickly drop. I saw 15k and a few lower numbers. There was also again a
login issue and I saw on an exchange peoples orders failing to list.I don't know if we are heading for this soon as it could be a later move, but it may be next I do not know. Seemed to have a bit of similarity to my basketball dream. If we hit 15k in BTC I can see LTC hitting the $975 I saw or even higher (if it happens at the time of the LTC run). I'm not 100% about where it fits in or anything, I'm playing it more safe with my sell orders, but just felt led to share. May God bless you my brethren. Christopher."

UPDATED DREAMS LIST, as posted on Z3News today 15th April 2018: "Dear brethren, I have received from the Lord to 'SORT' what He told me. I am trying to figure out the things He is telling me to SORT (He also told me ORGANISE and PRAY) so I figured I'd set out
the prophetic numbers the Lord has shown me in dreams. Know that I don't know the exact sequence or timing! Where there is a full stop it means a new dream starts I am describing. BTC numbers: $12,200 saw faintly (possibly fulfilled on certain exchanges in move to

$11,800 or not). $12,400 while LTC is $692. $12,600 approx while LTC is $750. BTC $15,000 and fall sharply. $16,000. BTC $4,850 and possible target $4,440. BTC third wave

to $30,000 to $35,000 max then crash to $2,000, recovery to $60,000 (I don't know how long this all takes and these are approximate figures). BTC $400 recovering to $950. Another of seeing under $1000 BTC. Breakout up from $9,200 area BTC. $8,600 (my most recent figure). $9,200-$9,500 in dream then going to $10,400 bullish atmosphere investor excitement (recent), in this dream issues logging in/exchange issues, troubles trading, had this in other dreams too. Basketball shot I saw once maybe twice into a ring seemed to be related to BTC and LTC, interpretation could be following the arc of the ball in ft (10ft ring) or something else. Explosion on a chart under $7,000 BTC (could be big rise already occurred or attack related as I was told there would be an attack on Madison Square Gardens).

Declining numbers then lowest I saw $6,700, fulfilled, higher numbers up to $8,500 area I saw. LTC numbers: LTC breakout when BTC $11,300. LTC $307. $400. $692. $750 (danger around this level which could be login related/exchange issues so have orders in). $790 to $796 then tick slowly down to $790 again (asked about selling at $800 shown this). $850. Ticking up to $975 then dropping to $940. Seeing $1,100 LTC while BTC was $10,000 or $11,000 (seems it could be after a crash where LTC recovers stronger than BTC). My parents telling me LTC went over $1000 and telling them I sold at $950 (unsure if AUD or USD, but the other dreams are USD unless specified). I saw LTC at $58 USD being very profitable entry, in the same dream I saw OKEx (a big bitcoin exchange) failing with fraud involved and people couldn't withdraw their coins, in the dream I couldn't get my Stellar off the exchange it was gone. PPT: shown after the LTC run PPT is good to get into, saw Philakone analysis saying PPT to $1,000 in the dream I wanted to get some PPT after the LTC run. CLAY: shown in two dreams at different times this coin will go up greatly. As far as I know it hasn't been made yet. XLM Stellar: Shown to go 50/50 personally with ETN/XLM and that something big was going to make the price take off soon. Mount Axoim or Axoin: had a dream about someone who had some connections whispering something crypto related to me and my friend about the two rich crypto related brothers (I looked up after it could be the Winklevoss brothers) being involved in a coin called Mount Axiom or something that it was going to take off big. It was hard to hear, there is only one coin called Axoim but I'm not sure if it's that or not. This was recent. ETN numbers: Shown it will do exceedingly well by the Lord and is my main coin, the Lord will pay wages for spiritual battle through this (is what He told me) and those led will be involved. Saw it in top 5 on Coinmarketcap. Saw other coins going up but ETN going up WAY more. Shown selling on an exchange and very excited about the price. Another dream I checked phone and price was 51 cents. Shown investors in ocean, big wave rise called the third wave which was big and fast, when it crashes I was shown fish from the bottom of the ocean floor would rise up and I would fish them (I believe fishing ETN at very cheap prices, potentially other coins too, this could be the
$2,000 crash). BCH numbers: $100,000 Bitcoin Cash in AUD at some point. I had people around me I normally wouldn't so something could have changed in the world. Gold: $130,000 to 140,000 AUD gold but conditions in the world were worse, demonic activity/possessions, paper money had failed but gold was still valuable, used small sized increments of it to travel by boat and barter and was useful to have. Bitcoin Gold and Etherium: shown a dream of a group of investors who became very rich from these two coins at a future time. In the same dream I saw FAZ at $71 and UVXY at $2700. DOW drop from 20-22k to 10-12k. Market being held down until Tether is secured before the balloon can be pumped up and float upwards (close friends dream). These are financial related dreams. I have many war, invasion (US, AUS), nuclear strike (US, AUS), extermination (US, AUS), demon, zombie, and disaster related dreams also that I share on my youtube channel (recent ones too). Regarding possible overall sequence I could be wrong but I believe we will head up to $12k area before going down to $4k area BTC. Then we may begin the third wave to 30-35k BTC with the drop to 2k and recovery to 60k. The LTC low

of $58 could happen

when BTC is near $4k or $2k. The LTC numbers were mostly paired with the 12k area of BTC so I believe we are heading there for a big LTC run from 11.3k BTC with a potential top of BTC at 12k or 15k. Whether we go to sub 5k BTC now or go to 12k area first I don't know, I'm leaning towards going to 12k first. Also I haven't received anything about RDD but still hold some nor have I received anything myself about Tether collapsing yet etc. (I have asked). Please seek the Lord for confirmation regarding your approach. This is what I can remember I have received so far. Much of it is unfulfilled. Some has been fulfilled already (I didn't list those mostly). Praise the Lord! I hope this helps in having a list of my dreams simplified, you will need to take your own interpretation, timing and sequence and seek the Lord to do so. This can sometimes feel like a puzzle and when we add what we receive as a body usually there is enough to work it out. May God bless you, Christopher."

As posted on Z3News today 17/4/2018 "Saw in a dream last night a glimpse of the BTC chart, didn't see numbers but looked like we backtracked and went back down to where we were before the recent break out (around 6.5-7k level). If true then it seems we still haven't broken out properly yet. The $8,600 I saw earlier has not been hit yet nor $8,500. It is possible that is a reversal there. Christopher."

Posted today 19/4/2018 on Z3news 1am "Saw last night in a dream something to do with Christine and $10,400 BTC and $1030 LTC (this seems to be later after a crash recovery potentially as it doesn't fit in with my 12k and $750 LTC area numbers, I had another figure earlier of 10 or 11k and $1,100 LTC so this is a confirmation of this). Also something about seeing a small relatively unknown coin Christine spoke about going way up and thinking it was good to invest in, I assume this is Reddcoin (my first dream about it). Then I saw $7,130 BTC. This might just be a checkpoint though.We didn't hit $8,500 or $8,600, looking for a move here before going down but can't be sure since the dream I saw it dropping back to the previous level, I couldn't tell where it dropped from. Christopher."

As posted on Z3news today 19/4/18 "Ok just wokeup. Saw a chart on computer screen in my room I saw prices dropping sharply and fall below a support box marked on the screen (perhaps below 6.5-7k), then it went almost vertical up, a far greater vertical move or climb than the one we had recently from 6.5k, it seemed to be a real explosion up in prices. I didn't see the top and I checked prices I didn't remember other prices but I saw LTC was $195 and it was still moving up. Regarding RDD unsure when it will move, it's been doing well already I didn't see how the big move up effected other coins. I think this drop is soon, I wonder if we make 8.6k first, I do like the 2k freethrow interpretation of my basketball dream from 6.6k area. Christopher."

UPDATE: As posted on Z3news today " In a dream last night I was telling my friend BTC is going to go to 8.9-9.2k (approx), I couldn't remember exactly the figures I said but I was sure about it in my dream. I think we may go there as 9k-9.2k has been a resistance and may be the beginning of the sharp downward move I saw recently to at least 6.5-7k area. I also was
trying to sell at 8.7k but couldn't login and felt maybe it was for a reason in the dream, so I am possibly viewing that as 8.6k not being a turning point but a bit higher. So my current view is we will make it to 8.9-9.2k and this could be the top of this move with a sharp decline after, retracing our recent run then a very strong breakout after this (seemed like the real explosion dream, I know I said the recent vertical seemed more like it but in my dream the surge I saw was vertical or near vertical and at least double the recent 1k vertical breakout) I was only drawn to the LTC price at $195 and couldn't see other prices but I knew it was going higher in the dream so could be signalling it's time for the LTC run at that point. We'll

see, just sharing and that we may make 9k area before a sharp drop retracing and a bit further down then a big fast rise. That's how I see it, please seek the Lord. Christopher."

UPDATE: Dream posted 22/4/2018 on Z3News "Just woke up at 8am. Right before I woke up I had a dream the price was $8001 or so and I was telling my friend it could go back up and she and I were excited about buying back in as we thought it may only be a correction so far with one more move up before going down. Dream ended. The fact this happened at 8am and $8,000 is a confirmation to me of prices going to 8k (minor correction) then potentially going back up to 9-9.2k before a drop which could be the beginning of the sharp drop I saw to at least to 7k-6.5k. Cool dream. God bless, Christopher."

Update: this morning posted on Z3News "Short part in dream tonight, price was $8450 area saw a chart that had been dropping I was still planning to buy at $8000 and felt led to go with what I received earlier. Dream ended. That is my plan. Two dreams about it, I didn't have to have those dreams so going for it myself. God bless, Christopher."

23/4/2018: UPDATES: As posted on Z3news this morning " Dear brethren. As I was near waking up a vision popped into my mind. I saw RDD at 1.2 cents and it was up 50 %. Dream ended. This means it was 0.8 cents and it went up by 50% to 1.2 cents (I don't know if it was 24 hrs or less). Perhaps that is where the bigger move up begins from 0.8 cents. We are currently lower than that at the moment. I think RDD is moving up soon. The 8k I received to buy may be it hasn't moved by then and is one of the final buys at cheaper price. Not sure. Seems for the Lord to show me a smaller move like this is significant in some way. God bless."

24/4/2018: "Also forgot to mention one other dream last night of Reddcoin I was telling my sister and people around me about it in the dream and investing in it. This is several confirmations I have received from the Lord regarding Reddcoin (RDD) going up. Please see the prophetic words from brothers and sisters in the Lord on Z3News. God bless you, Christopher."

Made several posts on Z3, but here is latest 26/4/2018 "Update: regarding what I have seen the price at 8k and moving to 8k in BTC, I don't know if the price moves up from here (I did mention this in my first dream of seeing 8k that I thought the price would move up in the dream so this could happen), or if its a minor bounce, or if we continue down for the more severe correction I saw at least to $7,130 and below. It is possible 8k is a turn around and we head up again, and the correction comes later. I don't have enough information from what I've received yet to know. I am buying at 8k because the Lord showed me to, so it is possible this is a good buy point, and the correction is a bit later, or it is possible that only applies to me for some reason and we keep going down further. I am sharing what I receive but please seek the Lord for understanding and confirmation and what you should do. It was a fairly stressful day seeing BTC go to 9.7k as I was thinking it could fulfill the previous dream I saw of seeing BTC move from 9.5 to 10.4k, but this didn't happen and it seems that will happen later. When I mentioned my most recent dream I was unsure if it went all the way down or rebounded at 8k, I don't know, I couldn't tell. So in summary I believe we are heading to 8k, where we move from there is either up, a temporary rebound, or continue down to lower areas (possibly towards 6k) before the big spike up. God bless, Christopher."

As posted on Z3News 27/4/2018: "This morning in a dream I saw $7,890 or so, I saw also RDD up 93% (I don't know when), and something about ASIC mining chip FUD causing

BTC/market to drive really low (I'm not sure but maybe it was in the 4k's), I don't know when this is. God bless, Christopher."

As posted on Z3news 27/4/18 "Given the timing we are nearing the time Christine believed RDD may move up, and I saw 50% and 93% moves in RDD, and that 8k could be coming later possibly after a move up first, I decided to move my funds in USDT into RDD. I realised the Lord isn't giving me every piece of knowledge but some things, and I need to use prudence and wisdom to make decisions with what the Lord has given me. Given the upside in RDD, for me it's better to be safe and be in. I'm still watching for the BTC correction to 8k, perhaps there is a good buy point for coins there (different options of the loaves of bread). I'll be watching the 8k figure closely but for now have decided to be in. God bless."
UPDATED DREAMS FOR ETN: As posted on Z3News 10th May 18 "Had a dream this morning I just woke up I was reading written down on paper a technical analysis for RDD from someone (I don't know who) but there was a prophetic reasoning given, the analysis was saying a RDD's target of 5 cents. I did feel some urgency with this dream, but please seek the Lord. I also saw a chart of RDD that showed it dropping but then turn around some (maybe 15-20% up). I also saw people in a prophetic discussion forum (it wasn't Z3, one I haven't seen before) mentioning ETN had hit a prophetic target of 31 cents and next target was 4 cents and 51 cents (target I received in the past). Something like this. Seems a large move in ETN soon. God bless, Christopher."

As posted on Z3News today 10/5/2018 "I also later dreamed of seeing a chart of BTC and it was at $12,000 when I was looking at it, and I was waiting for it to move to $12,500 and I think I was going to exit. I was in something else (not BTC) and I think it could have been LTC. When I saw the chart it looked like not vertical but a very steep angle from a long way down. It had been climbing really fast and steep up from a lower price. I also thought in the dream wow it's seems like it will drop really hard from that as it looked like it climbed in such a steep angle. That was it. I was thinking this could be near the top of the explosive move I saw upwards from what could be from near 7-6k area, as the move was steep upwards. The fact the price was 12k and I was waiting for 12.5k makes me think it was LTC I was in, as the older dreams I was shown LTC at $692 at $12,400 BTC and LTC $750 at BTC mid 12.5k ish area with danger after $750 LTC in my dream. So that could be possibly the upcoming LTC run to be prepared/ready for. God bless, Christopher."

RDD update and LTC run update: As posted on 12/5/2018 on Z3News "Dear James, to be specific I saw a big severe drop through two boxes on the screen I believe were support boxes. I also received a number of $7,130 BTC or so. For this reason I believe the two support boxes may be $7,000 and $6,500 meaning we could bottom at $6,000. This was the lowest bottom that occurred so far since the all time BTC high and I believe we will likely revisit this. From the bottom I saw a HUGE spike upwards in BTC price, bigger than I believe we have seen before in recent times. Additional reason is that my dream of the red bar of soap dropping on the floor then splitting into 10-12 red beautiful rubies shows RDD will spike the greatest when the prices hit the floor (BTC). In addition to this, I was praying for a sell price for some time and last night I received it, but I am not allowed to share it. What I can say is that it confirms the major spike of RDD will be near the bottom of the move down I saw in BTC. Please seek the Lord regarding your sell order. This is important to understand because if your sell orders are filled and you receive BTC from the RDD spike, you may NOT want to put this into USDT, because in the dream I saw of the major drop to I believe 6k ish area, there was a huge explosion upwards in price, and I believe this explosion will go all the way up to 12k and 12.5k and the LTC run will occur I have seen for a long time

coming in dreams. This means both BTC and LTC will rise greatly from approximately 6k if I have this right, and the RDD proceeds will be in before this, meaning if you convert into USDT you will actually LOSE value. The best thing may be to convert your BTC into LTC slowly or at the pace you can as both will be rising. I was shown LTC will take off from 11.3k BTC area greatly, so there may be time to transfer BTC into LTC before LTC takes off in a greater profit percentage. Targets to look for are $692-750 LTC as fairly safe targets in the $12.4 and to $12.6k ish BTC area I have received. I received further targets up to $975 and potentially over $1,000 but you need to seek the Lord which target you go for. There is the possibility of a move all the way to 15k BTC as I saw this and price retracting sharply from this peak, which could result in the higher LTC prices fulfilled. Also to watch out for are two touches in 12k or above area per Jeremy Stager's dream before the crash to 4k area BTC. The LTC run may only occur on one of them. My plan is to move any BTC from RDD proceeds into LTC, and aim to sell at $700-750 USD or if I receive a stronger confirmation to aim higher I may. This will turn the RDD proceeds into LTC and have them multiplied. In addition if you exit the market from LTC into fiat you can wait for the drop to 4-5k area BTC and re-enter cryptos at very cheap prices. I will be re-entering ETN heavily personally, among others coins shown to me. I believe things are about to happen and we need to be prepared and ready, to follow the Lord and where and what He is guiding us to do always. My views are based on interpretation so can be mistaken. Please seek the Lord. May God bless you my brothers and sisters. Praise Jesus! Christopher."

As posted on Z3News this morning 15/5/2018 "Wow just woke up from an epic dream. I was with my family and my mum was telling me about the council telling homeowners to clean up their autumn leaves. I saw a neighbors ash tree (someone told me it was ash) bare and cut back. Then my dad walked out of the house checking his phone and suddenly announced "Yes! The big red egg went off" (I know it was green but he called it red). I was shocked and surprised, he said it went to $3 and I started to celebrate but then was terrified because I had remembered only a few minutes earlier I had cancelled my sell order and was about to put it back in and got distracted for a few minutes but didn't put it back in. I raced towards the computer in a panic praying "Lord deliver me from my idiocy" and got to the computer and tried to put my order back in but was having trouble and then I got delivered because I woke up from the dream! I am not touching/messing with my sell orders. This may be a warning/encouragement to others to be ready, it is coming! The beginning of June is winter beginning in Australia and I should be seeing my family on the 29th May if plans go ahead which is near the end of autumn if the falling leaves finishing is a timing indicator. Praise the Lord we are close!"

UPDATED SEQUENCE: RDD may take some more time before it spikes. Here is my post on Z3News dated 17th May 2018 about a dream I had this morning showing a coming sequence in Cryptos: "I had a dream last night which changes my understanding of the coming sequence I had been thinking for the price rise in Reddcoin (RDD). What I saw was a section of the coming moves in Bitcoin (BTC) and RDD, and it was surprising to me. I will give the dream, then potential factors regarding interpretation. In my dream, I was looking at a brown wooden sign with black writing engraved in it with some things I didn't understand, but I knew it was about RDD. I saw 4 and in my mind I said, "Oh, I should sell at 4 cents". Then I saw the chart of BTC on Tradingview.com and I saw it begin to drop very fast and quickly in a single candle all the way down (I don't know the time frame of the candle). It kept on going and hit $6,000. As it hit $6,000, I saw in the same view the RDD price was going down and hit 0.23 cents as BTC hit $6,000. Then BTC suddenly rocketed from $6,000 with explosive force (RDD also began rising). In the dream, I was looking at the chart saying,

“Oh look, it’s the explosion from the drop I saw and BTC is going to $12,000 now.” I was watching the BTC chart full of green, ups and downs, but moving quickly up. But then I became surprised as it didn’t stop at $12,000 but kept going all the way to $30,000! As I saw it approaching $30,000, I saw RDD increase in price and hit a top of about 1.7 cents at BTC 30k. Then Bitcoin dropped suddenly and fast and I saw RDD dropping again from 1.7 cents. Dream ended. So this was surprising to me. What this seems to indicate is that RDD will not take off until this sequence is fulfilled. We still seem to have some more up and down moves of the kite before takeoff. My idea that RDD could take off at the coming drop to $6,000 seems to be mistaken. This confirms a prophetic dream shared by Z3er Ed H who dreamed of walking up a sand dune and at the top was various gems of different colors (other coins performing well), but on the other side and down the hill were covered in red gems (Reddcoin performing well on the market decline). What I believe this means is that RDD will take off sometime after $30,000 is reached in BTC. I didn’t see when it would take off as the dream ended, only that it hadn’t gone off YET. My dream of the red bar of soap splitting into red gems when it hit the floor shows also RDD will take off during a decline, but I believe now it will be after a move to $30,000 in BTC. When I saw the red gems on the floor, there was another large white gem and a few other gems already there potentially showing other coins had moved first. This might mean other coins will perform well (the other gems seen at the top of the sand dune), before Reddcoin takes off somewhere in the decline of BTC from $30,000 (based on the sell price ratio I received from the Lord seemingly around $5-
$8k). Here is my updated idea on where it might move. This is speculative as I don’t know the exact sequence. In a separate dream recently, I saw a prophetic Technical Analysis of RDD moving to 5 cents and it felt more urgent. This could be fulfilled soon as I received again an instruction to sell at 4 cents. This could happen sometime after BTC reaches $8,000 potentially as I was shown that as a good buying point for RDD, or that move could be later. There is a BTC decline to $6,000 with a cheap entry of RDD at 0.23 cents (it moved quickly) before a fast spike upwards. It could be that RDD moves before this sequence that I saw. If this happens and RDD goes all the way to $3 and $5 then drops back to 0.23 cents, it would be a huge fall. It’s either RDD moves before this or after this. I can’t be entirely sure, there is a lot of information so it’s difficult to understand the sequence. So far, I’m not doing anything. If RDD moved first that would be good, but I’m not sure. I only have some parts of the puzzle and have to figure out how the rest fit in. The basics of what I understood from this dream is that RDD will not take off YET. It may take some more time. I don’t know how fast BTC can move to $30,000, it seemed very fast in the dream but this doesn’t always translate. It seems there will be some more up and downs of the kite of RDD. For those who are holding this is fine, but it might take some more time. I don’t know how this fits in with my dream seeming to indicate the end of autumn here (I don’t know if ash tree means anything particular) for the RDD move to $3. This makes interpreting things more challenging. There seem to be some good trades shown here, but uncertainties on what coins will move and when. If RDD moves to 4 cents, I’m planning an exit and re-entry near $6,000 BTC and I will probably hold RDD from there. I might enter into ETN when BTC reaches $6,000, and I don’t know how the LTC price run works into this. If RDD moves soon to 4 or 5 cents and you sold and re bought at 0.3 cents this would be a 13x gain of coins. This is assuming RDD moves to 4 or 5 cents soon and not later. Plus, I have seen BTC go to $30,000 then drop to
$2,000, so we could have the major decline to $2,000 after it reaches $30,000. We might go lower than $2,000 as I have seen BTC under $1,000 and LTC at $400 and BTC at $400 before moving quickly to $1,000. This could mean LTC reaches a high price during the BTC run to $30,000, and the previous exit targets I was suggesting may not be appropriate. I have seen $975, $850, and potentially over $1,000 if this was USD for LTC. This is a lot to

consider and think about. Especially since my recent RDD dream had a warning about not

having sell orders in place. Caution is needed as there are more possibilities here than I can discuss properly. Please seek the Lord regarding your approach. Making trades is always risky, and if it is more comfortable for you to hold and wait, that is safer. It seems there will be some price moves before RDD takes off majorly. Watch for a RDD move towards 5 cents because I was shown this with more urgency. What I saw this morning in this dream is part of the sequence and must be interpreted and fit into the right timeline so again please seek the Lord. Regarding ETN, I've recently seen 31 cents being reached and my friend received something about selling at 35.5 cents which seems it could be ETN related. I also saw 4 cents and 51 cents (not sure what is first). I don't know when ETN will move, but it might move in the coming move to $30,000 BTC. The move of RDD from 0.23 cents to 1.7 cents is approximately 7.4x price. The move from $6,000 BTC to $30,000 is 5x price. If ETN is under 2 cents at 6k and moves to 31 cents this is 15.5x price. The run to $30,000 BTC could be the third wave rise in ETN I saw long ago, with a cheap entry coming at the crash from $30,000 in ETN. I have been watching for this for a LONG TIME and do not want to miss it. I don't know if the LTC run happens during this climb to $30,000, if it does I don't know where the top of LTC is, as it could keep going quite high. For that reason I'm unsure now regarding an exit point for LTC but I'll still be watching $11,300 BTC for LTC takeoff. I think the Lord is having us seek Him personally for guidance in these matters because they can be difficult to understand the right sequence. Knowledge without understanding can be troublesome to deal with correctly. Pray to the Lord for wisdom and understanding."

UPDATE RDD/ETN/XLM: As posted on Z3News 1st June 2018 "This morning I had some interesting things come up. First I had a dream of seeing RDD on my blockfolio app going up and quickly changing in price as I refreshed and I saw a price of 0.0499 (4.99 cents) and I forgot I wasn't logged in so quickly was trying to log in to sell. That was it. Then I dreamed of seeing Stellar Lumens (XLM) at $0.91 (91 cents) on coinmarketcap and being surprised and impressed. That was it. Then I dreamed of seeing Electroneum (ETN) at 30 cents and commented in the dream "wow that's a good return from 2 cents", and I also saw (I'm 90% sure) Reddcoin at 30 cents at the same time. Both were $0.30 (30 cents). Dreams ended. Some interesting information here. Please seek the Lord regarding your action/understanding. I was praying to the Lord last night if I should sell at 4 cents and to confirm this to me, so I take this as my own personal confirmation to make this trade (please seek the Lord before you decide to). It also seems as if both Electroneum and Reddcoin will make a move to 30 cents, and this will be after RDD reaches 5 cents. If RDD reaches 5 cents and I sell, I am planning a re-entry into RDD and also picking up some ETN and XLM (though a larger holding in RDD as I was instructed previously with "larger bowl"). I don't have any figures for re-entry yet aside from 0.23 cents RDD at $6,000. This could be reached after some other things occur, or the rise to 30 cents may occur during the rise to 30k. In the dream of seeing RDD at 1.7 cents at 30k I did not see the price of RDD the entire time from 6k to 30k, I saw the price when BTC was near 30k, so there is a possibility of moves up and down between then. So my view is there will still be some ups and downs before RDD takes off to $3 and
$5. Also this is the first figure I have seen for Stellar XLM. I saw RDD spiking to 29 cents in a previous dream, and now I see 30 cents again. I'm not sure if this is a possible trade area quite yet. Another person mentioned about seeing 29 and also people excited about 7, or something like this but I can't find the comment. So this is further focus I have received of a move to 29/30 cents, both for ETN and for RDD, and that they will be at 30 cents at the same time (I believe). Regarding ETN I believe it could be a good sell point but regarding RDD I'm not sure yet. God bless. Christopher."

As posted on Z3News on June 5th 2018 "Was recent, in last few days. Wasn't thinking about LTC but it came up. No price for BTC when this is reached. Not sure when it will be reached either. Last time we hit 6k LTC didn't go that low so perhaps there are more moves before the 6k sequence I saw. Tonight in dream I saw RDD at 0.4 cents and rebounding to 0.6 cents. Not sure when this move is. I previously saw day or so ago RDD at 0.96 cents moving to 0.78 then I was waiting for it to move to 1 cent and I was expecting it to move some lower from 1 cent. Few smaller moves not sure how to place it though. God bless. Christopher."

As posted on Z3News on 9/6/2018 "Had a dream this morning of seeing RDD on an exchange and chart move from 12 cents to 20 then I saw it had gone to 59 cents and I was trying to login to sell. That was the dream. I wasn't aware of another potential trade for RDD. I've been shown about 5 cents but in this dream I was trying to sell at about 50 cents. Please take this to the Lord for confirmation and if you should act on anything or continue holding. God bless. Christopher."

As posted on Z3News 22/6/2018 "Dear Brian thank you for sharing that. The night before last I had a dream of being with other people as evil was coming upon the earth, we were climbing up high but higher than trees and we went up high. We were all standing on a see through floor up in the air and it seemed it was my brothers and sisters in Christ. I then saw the Lord on a throne (He was huge in size), but the room seemed to be fairly simple. I could only see the bottom half of Him. He said "come and worship me" and he was saying this to us all. So I jumped off the floor we were on in the air and when I hit the floor my legs stopped working but I didn't care (was a big drop), so I crawled over and began to worship the Lord with my head on the ground. As I was worshiping Him I felt amazing peace and joy doing so. Then surprisingly I saw a list of assigned roles on a book flip through to near the end and I knew my name was there but I didn't know what it said exactly, and the book went on an angle so I couldn't see the other names there, but it was near the end of the pages I saw. Then surprisingly as I was still worshiping I saw a view of Reddcoin with an exchange price/chart. I saw it then go up an absurd percentage, way way up and I knew God was doing this. I was surprised to see this, that part of the dream ended and I was before my laptop as I was looking to put anything extra I had into RDD. That was all. I believe the Lord wants us to worship Him in this time and believe in His promise and keep holding on. God bless my brothers and sisters. Love Christopher."

As posted on Z3news 2/7/2018 " In dreams last night saw RDD at 0.96 cents moving to 0.93. Similar to what I saw earlier of 0.96 to 0.78 then anticipating it back to 1 cent and then down. Then I saw $8,800 BTC (not too long ago saw 9k) and later this morning I saw ETN at 13.7 cents after a crypto app alert went off (earlier saw 31 cents as next target, not sure if it keeps moving up from 13.7). May God bless you. Christopher."

As posted on Z3News 5/7/2018 "...Something relevant I saw clearly this morning in a dream, I saw the coinmarketcap list and I saw that BTC was at $7,600 approx and it was up 80% in the 24 hour increase section. This means it was at about $4,200 and went up 80% to $7,600 in 24 hours! Quite a huge move. I also saw in dream last night 0.31/0.41 cent RDD..." May God bless you. Christopher.

As posted on Z3News on July 8th 2018 "I had a dream this morning of being at an airport and rushing to board a flight, there was a gap in the front of the line myself and another could walk in, but I felt bad about cutting the line so I didn't. I noticed there was reddish carpet going into the plane. The plane was in the same room as everyone and there was a long line

of people waiting to board the plane. In the dream I had a boarding pass to that plane but I thought the line was too long so I went to try to go board another plane I thought would take off quicker. When I did that the plane I was meant to go on left and I couldn't board the other planes because I didn't have the right boarding pass, and they left later than the first one anyway! I initially thought it was something to do with the rapture because I didn't remember the red carpet at first, but when I prayed to the Lord I thought about "lift off" and that this was about Reddcoin. That people are patiently waiting in line to board the plane as it was going to lift off, they all had tickets and were patiently waiting. I was representing those who were impatient and didn't want to wait and went to try to board other aircraft (other cryptos?) but my ticket couldn't be used on those aircraft (the Lord's will was for me to wait for the first aircraft) and they took off later despite me wanting to leave quicker. I think this is speaking to impatience and a desire of wanting something that will take off quicker. But I believe the Lord is encouraging us to patiently wait with our tickets to board the plane and have lift off. I believe the plane represents RDD and will take off in the Lord's timing but we need to be patient. If we are not patient and go after another plane with the wrong ticket the RDD plane will leave without us and we won't be going anywhere. That's my interpretation anyway. I think this goes with this Word by Ivette and what you mentioned Christine, to continue to be patient and as the Lord told me before, in this time worship the Lord Jesus, worship our God and trust in His promises. God bless. Christopher."

As posted on Z3News 11/7/2018 "Saw recently in dreams $4,600 BTC and also in another 0.63 cents RDD. I didn't mention this but I saw 0.53 cents earlier but it wasn't that far from the current price at the time, then a few days later it hit 0.53 and exactly rebounded, so mentioning this encase 0.63 is something similar. God bless. Christopher."

As posted on Z3News today 15/7/2018 "This morning in a dream I saw clearly $10,325 BTC and then a bit later I saw $13,000 and seemed like it was meant to drop to the first figure (10325). Not exactly sure that was the feeling in the dream, but two figures I'll share of
$10,325 and $13,000. God bless. Christopher. "

As posted on Z3News 18/7/2018 "These two posts from dreams I had on July 5th and 6th look like they are fulfilled "The dream I saw where I saw from above a road which represented BTC going down to the coast, then going up some then the road went near vertical up…" and "Saw last night a strong move up past $7,100 in BTC. God bless. Christopher." The strong move up happened. I'm watching 0.63 RDD and higher RDD targets towards 1 cent. Otherwise I've got 8,800 and 9,000 BTC with higher figures near 12/15k. God bless. Christopher."

As posted on Z3News 21/7/2018 "Saw in a dream last night Bitcoin chart on trading view, the part of the chart I saw it had gone up a lot with large green pillars back to back (strong uprise) and price was $11,100 or so and RDD was 0.9 cents or 0.99 cents I can't remember which, at the same time. God bless. Christopher. "

As posted on Z3News 24/7/2018 "Dear Z3 I saw yesterday 23/7/2018 in a dream of RDD going to 1 cent (some ups and downs in between) and BTC went up seemingly to at least 10k (I didn't see exactly, but from earlier dream I saw $11,100 when RDD was near 1 cent), then I saw RDD go down and I saw BTC at what I think was around 5k or lower. So I think we're going up for a bit, then going back down again. I think RDD is going to top near 1 cent from this move, then the market heading lower towards 5k BTC again. I've been shown potential sells at 0.63, 0.96 (re-entry at 0.8) and 1 cent. I have 0.31 cent RDD target outstanding so I

assume that could be reached near 5k BTC and seems a good re-entry. I don't know when the 0.23 RDD and 6k BTC I saw is coming I assume a bit further out. God bless. Christopher."

As posted on Z3news today 25/7/2018 "I saw 0.71 cent RDD today and 0.70 yesterday in dreams, could be the top or turning point of the move to 0.63. God bless."

As posted on Z3News on 29/7/2018 "Had some important crypto info in dream this morning 29/7/2018: I saw a chart on trading view of BTC topping out around $8,800 to $9,000 or so, then a huge red drop fast steep to $5,600 approx. Then it rebounded very strong vertical up from $5,600 area and the words "Tsunami Wall" came up on the chart as I saw the price go up with green and it went to at least $10,000. I didn't see the exact top of BTC but I saw RDD at 0.96 cents and going to 1 cent. Then the dream ended. I think this provides further context for my previous dreams. The move to 8.8-9k could be the 0.71 move for RDD, then the drop to 5.6k could bring RDD to the 0.31 target I received and another Z3er received, then a huge move to 10k at least (I saw 11k earlier at 1 cent RDD) and RDD tops around 1 cent. I believe from there we will have another correction to maybe 4-5k as I saw BTC drop from 11k to this area. These are some strong up and down moves that could be traded potentially. Sharing with you my brethren. See my other dreams above to fit this in. Christopher."

As posted on Z3News 3/8/2018 "On 5/7/18 I had posted this "I also saw in dream last night 0.31/0.41 cent RDD" I didn't know what it meant exactly but seems it was a decline from 0.41 to 0.31 which has happened now. Hope we heading up from here. Last night in a dream I saw 0.15 cent RDD, lowest price I've seen. Might be a good buy for those with $ on the side and could be reached when BTC declines either to 5.6k I saw, or the 5k or lower I also saw after 11k (described in above posts)."

As posted on Z3News today 14/8/2018 "I had a dream on 12/8/2018 (2 days ago here in Aus) that I didn't share though I should have. RDD was 0.23 cents at the time. In the dream my Dad said "I'm going to get red hurts" as if he was talking about a movie or something. Then later in the night a dream of a friend being pushed off the stairs by someone and falling down (was high stairs). I thought they were dead but they turned out okay, then a woman said to my friend to get that office gear off you (a red suit I believe) before you drop like fire. So I thought it was about RDD, but I didn't share my apologies. I have a lower target of 0.15 cents but not sure if this is a bottom. God bless. Christopher."

As posted on Z3News 26/8/2018 "Saw 0.15 and 0.8 last night written on paper which I believed was referring to RDD in cents. Could be 0.15 is at or near the low and 0.8 is next move up from there. Could be a good point to put any extra $ in around 0.15. God bless. Christopher."

As posted on Z3News 13/10/2018 "Hi everyone, I am sharing a dream here I received on 1st September 2018. I did not share this at the time because it seemed like it may be contradictory to another dream I had and numbers I received. I have felt led to share this and have not had much dreams about cryptos lately (this was the latest). In the dream I was outside in what looked like a cafe type setting and I saw a laptop open with two people next to it and drawing in close and pointing at the screen, I saw something stock related going to around 5,600 I thought, the two men were remarking and they seemed worried about the severe dip in the stock market, I saw some red drops on a chart that was something to do with the market but it seemed like it hadn't been that long since it was going down or it wasn't

completed yet, and I took over the mouse as I wanted to check crypto prices (it was on trading view) and saw BTC was $44,000 and then I thought to look at Reddcoin and saw it was 0.89. I didn't immediately share this because it seemed potentially contradictory to what I've seen earlier of a move to 30k and a decrease from there. Also when I saw 30k BTC I saw RDD at 1.7 cents previously and the price seem to move down from there. I am sharing as this could possibly be another sequence, and I apologise for not sharing earlier. I felt led to share now as it was on my mind for some time. The dream seems to indicate a large move up in BTC when there is a stock market drop, the drop being enough to cause seemingly regular people to be worried. May God bless you. Christopher."

As posted on Z3News 27/10/2018 "I saw after I woke up this morning an image come into my mind of my RDD holdings on Blockfolio (the app on mobile) they were less than half what they are now in USD. This may mean the 0.15 cent RDD target I saw earlier is coming soon. God bless. Christopher."

As posted on Z3News 12/11/2018 "Hi everyone, this morning after I woke and still in bed the number 5977 BTC came to me. I had not been thinking about crypto much at all and when It came to me it also came with a peace. Perhaps a drop to at least there coming soon. God bless. Christopher. "

As posted on Z3News 14/11/2018 "I had a dream this morning 14/11/2018 and I saw a trading view chart with my Dad and saw the Dow I believe had dropped significantly in up and down jagged spikes. I saw it had stepped down in stages about 3 times and then I saw the price of RDD was 0.138 cents and changed to 0.17 cents. I believe the Lord may be showing a good entry for RDD here, confirming the last two dreams I've had of this price range. God bless. Christopher."

As posted on Z3news 21/11/2018: "I had a dream a long time ago about Bitcoin Cash moving from about $400 to $800 usd. I can't remember the exact figures and I think it was over 6 months ago as I cant find it in my last two dream books. I will try to find it and update exactly what it was. Anyway, this morning 21/11/2018 I saw the Bitcoin cash price rising. I couldn't remember the price where I first saw it begin, but I know it went past $800 and towards $1350 and I said assuming "oh it's going to stop at $1350" but I was shocked to see the price go all the way to $11,000. That was the dream. God bless. Christopher."

As posted on Z3News yesterday 2nd Dec 2018 "This morning in a dream I saw RDD on a chart and it was going up fairly steeply I didnt see an amount for the rise, then it went down and sideways for a while fairly stretched out and lower and I saw the price was 0.12 (I think cents). I was going to buy at that price and the dream ended. God bless. Christopher."

As posted on Z3News today 3rd Dec 2018 "This morning in a dream I saw a big candle up (or a fairly steep move up) on BTC chart and price was 6500. God bless."

As posted on Z3news 7 Dec 2018 "Saw this morning in a dream on a trading view chart BTC was at $13,000 USD. God bless. Something I saw earlier, probably two weeks or so ago was 0.068. I wasn't sure what it was about so I didn't share it but I'll share it now."

As posted on Z3News 9 Dec 2018 "Dear brethren, I prayed last night regarding the rise in RDD and where it would go, then this morning I had a dream. In the dream I saw on my laptop the price of RDD at 0.89 cents and it was up a high % (I can't remember exactly how

much) and I was quickly trying to log in Bittrex and sell. That was the dream. I prayed for confirmation and afterwards dreamed of telling people about my dream. I previously dreamed of prices at 0.9 cents, 1 cent, 0.63 and 0.71, I did see some price slightly over 1 cent but I don't think I shared them (1.1) but I think a top may be near 1 cent based on this dream: As posted on Z3News 24/7/2018 "Dear Z3 I saw yesterday 23/7/2018 in a dream of RDD going to 1 cent (some ups and downs in between) and BTC went up seemingly to at least 10k (I didn't see exactly, but from earlier dream I saw $11,100 when RDD was near 1 cent), then I saw RDD go down and I saw BTC at what I think was around 5k or lower. So I think we're going up for a bit, then going back down again. I think RDD is going to top near 1 cent from this move, then the market heading lower towards 5k BTC again." As I had the dream of RDD rising then going back to 0.12 cents I believe this accords with this dream. Another dream to consider is this one: "As posted on Z3News on 29/7/2018 "Had some important crypto info in dream this morning 29/7/2018: I saw a chart on trading view of BTC topping out around $8,800 to $9,000 or so, then a huge red drop fast steep to $5,600 approx. Then it rebounded very strong vertical up from $5,600 area and the words "Tsunami Wall" came up on the chart as I saw the price go up with green and it went to at least $10,000. I didn't see the exact top of BTC but I saw RDD at 0.96 cents and going to 1 cent. Then the dream ended." So Based on this there could be a rise to 0.7 cents area for RDD maybe corresponding with 8-9k BTC, a drop to 5.6k BTC, then a steep rise to 10k+ BTC with 1 cent RDD. After 1 cent RDD I believe the market will drop again and RDD 0.12 cents could be fulfilled then. I know we hit less than 0.12 cents already, but in the dream I had of seeing 0.12 it happened after a rise in RDD and a period of time of decline. Consider these dreams and I believe to watch out for potential turns around 0.6/0.7 cents RDD and 0.9-1 cent RDD area, looking for a re-entry at 0.12 cent RDD after there has been a rise. Again I'm not certain of exact sequence so seek the Lord for confirmation and instruction. God bless you. Christopher."

As posted on Z3News 20th Dec 2018 "In a dream last night I saw a forum with people talking and it was Christmas themed with snow and stuff in the design of the forum. People were talking about Bitcoin, the price was at $5,000 and they were talking about it going to $5,450 and I saw RDD was at 0.76 (cents I believe). I also saw after this scene $11,200 BTC. I was initially reluctant to share this because I have seen some other figures of 1 cent RDD around 11k BTC so I wasn't sure if this fit in and I am not as sure about this dream, but I'll share it anyway. God bless you." And posted on 23 Dec 2018 "Something I received in a dream on 22nd November 2018 was seeing 1 cent and 1.17 cent RDD and BTC was $5,555. I was planning to wait for more confirmation before sharing this one, but it kept coming to mind and it goes along with the last dream I shared, so I'll just share it now anyway. God bless."

Saw in a dream this morning 29/12/2018 seeing my computer and I checked the crypto prices and BTC was at $7,400 and RDD was 1.42 cents. God bless. Christopher.

As posted on Z3News "Hi everyone. This morning 22/2/2019 I had a dream and in the dream it was early March like maybe the 1st to the 3rd and RDD had gone up. I was logged on my exchange and I think I was considering selling. As I was thinking in the dream I knew at the end of March RDD was going to go up much higher. That was it. Potentially a good move coming soon, if it's this March. God bless you. Christopher."

As posted on Z3News 23/2/2019 "Hi everyone. I had a dream this morning I saw a person in my room on the table with his laptop out. He then said "I'm going to check the Bitcoin price"

and then he said “wow it’s at 10k”. Then I told him to show me the chart and I saw it was at 10k (I didn’t see exact figure or the details of the chart). I then told him I had a dream months ago BTC would spike from 4.2k area. Then later in another dream this morning I was telling someone about BTC going to 10k. Thought I’d share. God bless you. Christopher."

As posted on Z3News 28/2/2019 "Hi everyone, yesterday I had a dream and I saw the market was up, then it went down something like 59% and BTC was 3-3.2k. This would be a decline from $8,000 to $7,600 area to 3-3.2k. I have seen $7,400 to $7,600 area BTC earlier. I could only be seeing part of the decline in the dream and not necessarily from the top. I have previously seen a continued decline in BTC to 3.2k area and RDD was 0.18. I think this would be after a rise in RDD as we are currently at 0.12. So we could have a temporary rise in BTC/RDD followed by another drop (potentially 0.18 a good re-entry). Regarding possibilities for March which I think will be a good rise (if it is this March): we could see a move up to 5.5k area BTC and 0.76 RDD, or we could go higher to $7,600 to 8k like I have seen (80% move up in BTC), but I have also seen higher at 10-11k. The numbers I have seen frequently range from 0.71 to 0.76 cents area for RDD and 1 cent to 1.4 cents. I don’t know how big of a rise will occur March (if it’s the right one), the first was decent enough for me to log on the exchange and consider selling, and the second I knew would be much bigger at the end of March (I don’t know how much) which is what I said in the dream. I have other figures also of a 4-5 cent move. Something to consider. Please seek the Lord. God bless. Christopher."

Updated RDD related dream: (additional ones posted below from 22/3/2019. Earlier dreams posted on last two Crypto update vids in pinned section top comment) As posted today on Z3News "I had a dream this morning 22/3/19 and I saw a BTC chart and the price dropped fast to 3.4-3.6k then when I checked again it had gone straight up to 4.4k. I saw at this price RDD was $0.0089 (0.89 cents). Then I was trying to login to sell. The scene changed and someone who seemed like a friend was excited with me about the move in BTC and I told him what I saw, being excited about the RDD move. After this I had a lot of distractions in the dream trying to make me forget what I saw. I felt like the move was soon. I said 0.89 cents RDD was my target and I was planning to sell and rebuy lower. God bless you.
Christopher."

As posted on Z3News today 31/3/2019 "Dear brethren, I’ve had a few dreams recently. In one yesterday I saw a vision when I thought I was awake properly and I saw a chart on trading view. I saw a rise to around $4,300 area then a drop down, then a rise to $4,400 area and RDD was 0.0089 then an extended drop. I’m not sure on a re-entry after 0.0089. The other RDD number I received was $0.0018 at $3,200 a while ago, but it may go lower. That could be a good re-entry. Then this morning 31/3/2019 I had a dream of seeing the price go to $4,200 area and RDD was $0.00145 and in the dream I had sold and then the scene changed and I saw the price of BTC dropping it was about $3,800 and RDD was around $0.0010 and I was considering buying in for the $0.0089 move. The price was near the line I drew on my chart for $3,600. Anyway consider these matters. We could have a short continued move up to $4.3k area then a drop to around $3.4-3.8k area, then I expect a faster rise in BTC to $4.4k and RDD to $0.0089, followed by another drop to at least $3,200 I believe with $0.0018 RDD. Good trades to be made here if done correctly. Seek the Lord. God bless you. Christopher."

As posted on Z3News today 8/4/2019 "After seeking the Lord on these matters I wanted to add something. In the first dream above I described on March 31 of a vision I saw when I

thought I was awake, and this was a trading view chart. I gave some of the details but not all of it, because I needed to seek more confirmation. In this vision I saw the chart moving, but it was going in the opposite direction, from right to left and not left to right. I thought that seemed odd. So I saw the first rise up (it seems I didn't get the top as it went further than I thought), then I saw it drop down. Where it will drop I assume (I didn't see in this dream) is 3.4-3.6k area which I saw in another dream but this may not be the exact bottom. Then I saw the rise to $4,400 area with RDD at $0.0089 (this also may not be the top). But then I saw an extended drop after. I didn't detail what this "extended drop" was because I wanted to seek the Lord more. So what I saw in the vision was a zig-zag up and down to shockingly what I think I saw was $100 at the end. Then a few days later in a dream I saw $1,770 and $1,550 BTC in a dream and I wanted to buy in, so I took this as confirmation of lower BTC. I also saw $3,570 the day before I saw those lower figures, so I think we're still on track at the moment for a decline being the drop I saw, and hopefully after that drop the bigger upward RDD move near 1 cent. After this I saw a continual moving lower in price, even very low BTC. What this sequence reminded me of was my dream of my Reddcoin bar of soap dream, where I saw a red bar of soap in a mansion bathroom drop off the sink area and it fell onto the ground and split into 12 or so red gems. This could be something to do with the price dropping to the ground before the bar of soap (the investment seeming to be a "bar of soap") turns into 12 or so brilliant red rubies. I have seen some low BTC figures in the past, but I thought I'd share this, that we have some lower BTC figures I've seen that may be coming up. I am not certain how this will play out. I'll be seeking the Lord for further understanding, but for now I wanted to share this. God bless you. Christopher."

As posted on Z3News today 9/4/2019 "Thank you James for sharing. I had a dream yesterday. In this dream I was in my home in the kitchen. Then I saw numbers for Reddcoin like on a digital reader and it was showing me at first $0.0089. Then it changed to $0.0123 and waited on this for a few seconds, then it changed to $0.0140 but was there for only half a second then I thought it changed to $0.0160 but for a micro second. Then the numbers changed fairly rapidly and I saw $0.19 (19 cents) and it paused on this, then I saw it go down, then I saw $0.59 (59 cents) cents and it paused on this and went down, then It was no longer in cents as it went $1, $2, $3, $4, $5. It moved through those dollar numbers quickly so I couldn't tell if there was any certain sequence. Then interestingly I saw some statements like: "out of stock" or "out or order" then some bank notices and requests for bank verification and things like this. I think that might be to do with trying to withdraw the proceeds to the bank, there might be some verification needed. In the dream after I saw the numbers I was trying to tell a family member. Then today (one day later) I had a dream where I was telling some people about my dream yesterday, so I will share it. Anyway this was an encouraging dream for me. The bigger prices are certainly coming. I think the focus on the $0.0089, the $0.0123,
$0.0140 and $0.0160 are showing potentially the higher prices for the $0.0089 move. The price seemed to stay on $0.0123 (1.23 cents) for a fair amount of time, perhaps indicating its a safe sell point, but was less time on the $0.0140 (1.4 cent) and only a split second on the $0.0160 (1.6 cent) I saw. That would be a great move. I believe that move is coming after we go back down in BTC to around $3.4-3.6k. The days are coming when God's revelations of these matters to us will come to pass. Keep holding on. God bless. Christopher."

As posted on Z3News today 11/4/2019": "I saw a sequence this morning in a dream. Before this, two days ago I saw BTC up 23% in green. Then one day later I saw $4,160. I wasn't sure what these meant so I prayed to the Lord. Today He showed me. I just had a dream where I saw the BTC price rise to about $6,500 (almost exactly 23% up from current price $5,300). Then the scene changed and I saw a chart showing a massive and fast drop and the

price $3,100, which rebounded to $3,600 and stayed there as the dream ended. I think this is the setup before the 1 cent RDD move. God bless you. Christopher."

As posted on Z3News today 13/4/2019 "Yesterday I had a dream of seeing BTC rise from I think about $3,300 area really fast and really quick on a trading view chart. I saw it rising up and as the chart rose up it looked like it we had just come from a severe decline. I saw it keep rising up to $7,400 or so and the dream ended. This may be the same rise where the 0.89/1+ cent RDD move occurs that I saw. God bless. Christopher."

As posted on Z3News Today 17/4/2019 "Hi everyone. I woke up from a dream this morning and in this dream I saw a BTC chart rise up to about $8,000. Then the scene changed and I saw it dropping, the view moved to a Bittrex screen and I saw BTC dropping (I didn't see the chart), but I saw numbers changing going lower (I can't remember them exactly) and the final number I saw was $220 and the dream ended. This is now a few confirmations I've received of BTC going extremely low. I don't know how long this will take, or what moves will occur in between, or what will happen with RDD at this time. God bless."

As posted on Z3News 26/4/2019 "Saw $3160 in a dream this morning. I assume it's BTC."

As posted on Z3News 1/5/2019 "Had a dream this morning and saw BTC at about $7,170 on trading view and RDD was $0.0020 (0.20 cents). God bless you."

As posted on Z3News 10/5/2019 "This morning in a dream I saw on trading view that BTC was at $9,900. Then I had another dream after where someone told me they saw $9,700 (or so, I can't remember exactly), and I said I had just seen a price near 10k. I said to them I didn't know if what I saw was the top. God bless you. Christopher."

As posted on Z3News today 13/5/2019 "Hey everyone. I just had a dream and I believe the Lord was showing me that we are going down to $3,200 now, we aren't going up to 10k yet. In the dream I saw the price was at $3,200 and I was remarking that wow even my original trade I was shown was going to work (selling at 14.5c RDD). I was talking about how I needed a greater faith. I didn't see the RDD price at $3,200. I previously saw RDD at $0.0010 (0.10 cents) around the $3,800 area, and I saw in another dream which I didn't share RDD at $0.0008 or (0.08 cents). I believe once we go back to 3k we are setting up for the 1 cent RDD move, so be prepared for that. Hope this helps. God bless. Christopher."

As posted on Z3News 20/5/2019 "Thanks Ed. I had a couple of dreams recently. I don't understand exactly how things will go. Two days ago I saw in a dream a declining price on a chart to what seemed about $5300. Then the scene changed and I saw a number $8,883 or so. Then this morning in a dream I saw the price go up on a chart to just a bit over 10k then drop down with a big wick. It seemed like it dropped so fast I saw numbers dropping then I saw $800, then the scene changed and I saw it go up again. Then some guy told me you could pick up BTC for a few hundred dollars. I am not sure on the sequence and timing. God bless. Christopher."

As posted on Z3News 29/5/2019: "Hi Tim and Z3, I saw BTC at $9,500 on a Trading view chart in a dream this morning. God bless."

As posted on Z3News 30/5/2019: "Hi John and everyone, I saw BTC was at $2,220 on a Trading View chart in a dream this morning. God bless. Christopher. "

As posted on Z3News 2/6/2019 "Thanks for sharing Robson, I had a dream this morning of a huge crash in BTC, it was massive, I was watching the chart go lower and lower, and lower, and some very low buy orders I had were filled. Then I saw some numbers in the few hundreds of dollars come up in my view, which was Bitcoin. In the dream I celebrated and praised God at being able to buy BTC so cheaply, and the dream changed and I was telling someone that this major crash was definitely going to happen. This was the dream. I do believe this will take place, as to the timing I do not know. I have now had several dreams of a major BTC crash below $1,000. God bless. Christopher."

As posted on Z3News on 23/6/2019: "Hi everyone. I had a dream yesterday of seeing the DOW at 17,600. That would be a good move in UVXY and FAZ. Not sure how long it will take to be fulfilled. Also today another dream of BTC under $400 and I was trying to buy. Not sure when, but I had more $ than I do now on the exchange, so guessing that something moved before then. God bless. Christopher."

As posted on Z3News: "I had a dream this morning 11/7/2019 of seeing the BTC chart, it had fallen steeply to about 7.5-7.8k, it was recovering and I was mentioning to my friend that I thought it would make another severe drop soon. I was planning to put aside more $ to buy lower. That was the dream. God bless you. Christopher."

As posted on Z3News 10/8/2019: "Hi everyone, I saw in a dream last night RDD trading at $0.0020 or $0.0022 or so. A few days ago I saw $12,500 BTC (when BTC was $10,700). I should have shared that earlier, but perhaps we are moving up a bit higher for now. God bless. Christopher."

As posted on Z3News 15/8/2019 "I saw a sequence last night in a dream, I saw BTC dropping to 10k area, then I saw it going way up steeply and I saw $26,000 and the dream ended. I prayed for confirmation because I was not sure about how it would fit with what I have been shown so far, and there was a confirmation I received after but I don't remember the details of it. So take it to prayer as I'm not sure when this could take place. God bless you."

As posted on Z3News 20/8/2019: "I saw $8,160 or so BTC on the chart in a dream last night. God bless. Christopher."

As posted on Z3News 25/8/2019: "I saw in a dream this morning the price of BTC change to $8,777 in red. I didn't see the price before it changed but I knew it had gone down. God bless you. Christopher."

As posted on Z3News 28th September 2019: "I saw in a dream this morning BTC like it was on Blockfolio at $11,000 then change to 12 or 13k. God bless."

As posted on Z3News 29/9/2019 "I had a few dreams I haven't mentioned. One was on 1st September seeing $6,200 BTC, then on 4th September $5,500 BTC and again on 25th September $6,200 BTC. God bless. Christopher."

As posted on Z3News 11/10/2019 "I saw $8,900 BTC in a dream on Blockfolio this morning, thought I'd share. God bless."

As posted on Z3news 14/October/2019: "Hi everyone I had an interesting dream last night. I saw RDD on the exchange and I saw someone put a very big order in (represented to me by a 1 with a lot of zeros behind it) and I saw the price shoot up suddenly to $0.06 (6 cents). I didn't see what price it shot up from. I have a very old target for RDD of 5 cents so this is a confirmation for that. God bless. Christopher."

As posted on Z3News 15 October 2019: "Early this morning I had a dream and I saw BTC at $35,000 to $36,000, it was very slowly ticking up, like a snapshot, and the dream ended. This goes with one of my earlier dreams of seeing a rise in BTC to 30/35k. God bless. Christopher."

As posted on Z3News on 26/10/2019: "I had a dream this morning where I saw RDD move to $0.0025. I didn't see the price from where it rose. God bless."

As posted on Z3News.com on 1/12/2019 "Hi everyone. I had a few interesting dreams this morning. The first I was looking at the Blockfolio app and saw the prices refresh and I saw BTC at $9,000 and RDD at $0.10 (10 cents). I went back to sleep praying about this dream and got a confirmation, though this time I saw the price was $0.20 (20 cents) for RDD, it had gone up massively and it seemed sudden. Then later this morning I saw RDD at $0.00027 go to $0.00017 and I wanted to buy. A couple of days ago I saw in a dream $22,000 BTC. In terms of this I believe we are heading lower for RDD, but when it does rise we will be having some major multiplying moves. Yesterday I had a dream of the US and AUS markets and financial groups/leaders in fear/panic that they were anxiously awaiting a massive drop in the markets. It was like they had done all they could to avert it and were trying to make it appear as if business was normal but they were very worried of a coming major crash. There was an urgency with this dream. I expect that this will be coming soon. God bless you. Christopher."

As posted on Z3news 19/12/2019 "Hi everyone. I had a dream this morning where I saw BTC was at the low $4,000's and I knew the price had declined. Then the scene changed and I saw the price was now at $3,100 or so. I also had a dream a few days back of seeing BTC at $11,300 and the price up 25-30% or so. God bless. Christopher."

As posted on Z3news today 20/12/19 "Hi Z3 I had a dream this morning of seeing the RDD price at $0.00019 and I saw $4,000 BTC, but I can't remember if this was at the same time in the dream or with a scene change. God bless. Christopher."

As posted on Z3news 31/12/19 "Hi everyone. I just woke up from a dream where I was in a room of people. There was a part where I heard a woman of God rebuking a Christian church and their music to another woman. The other woman was angry and didn't want to hear it and disputed. I yelled out to the same woman they were "Churches of hell", but my voice was drowned out by others. The angry woman then accused the woman of God about cryptocurrency, as she had prophesied about it before. The woman of God then told her that Electroneum will soon go up. Then that woman of God told me that prophecy directly. I thought about buying ETN with what I had on the exchange. Then one minute later ETN started rising, and it went up 8x. I was shocked it went up that much. I said "Wow it would have been good for me if I had bought!" The woman of God said to me that she wondered if that angry woman had seen what happened to the price. That was the dream. The exchange I am on is Bittrex so this dream occurred when ETN was on Bittrex, as I knew in the dream I had the choice to directly buy ETN with what I have on there. This is the second dream I've had of ETN being on Bittrex. God bless you. Christopher."

As posted on Z3News 28/1/2020 "Hi everyone, I had an interesting dream this morning that I wanted to share. In the dream I saw a chart of BTC and I saw it had risen some to about $9,100. Then it sharply dropped and continued to drop, Then I looked and saw the chart again and the price was $2,600. Then there was a scene change and I saw the BTC price was extremely low like less than $1 and other coins were also very low. I then saw a list of coins with BTC at the top but it wasn't regular BTC, the name was wrapped in plastic film and I heard a voice saying "this one will be more useful to you sooner", and I said "Oh is that BTC SV?" Then the dream ended. I was wondering if the plastic film on the BTC name represented it being new, as BTC SV was a recent split from BTC. This dream seemed to indicate a coming period of extremely low prices, or a failure of the market before a recovery. Please take it to prayer. God bless you. Christopher."

As posted on Z3News on 9th March 2020: "Hi Z3, I'll share a dream I had on 29 Feb 2020. In this dream I was in my home, checking the price of the Dow and it was between 8,000 and 10,000. I knew the market had greatly crashed. Then the power went out. That was the dream. God bless you. Christopher."

As posted on Z3News 13/3/2020 "Hi Marcio, thanks for mentioning. The full sequence I saw was a major drop to around $3,000, then an increase to $4,400 with RDD at $0.0089. Then I saw BTC decline to $200. I believe we are potentially coming up to the time for the first major RDD move (moving up to $0.0089 to $0.016 area). The lowest target I have for RDD is $0.00017 which has not yet hit and on 1/12/19 I had a dream where I saw RDD move from
$0.00027 to $0.00017 and I wanted to buy (good buy price potentially). I have been out of the market for a long time waiting for this crash. Tim saw this crash from 7.2k down very fast and we have dropped accordingly. I also had multiple dreams about a crash such as steep drop from 7.5-7.8k area on 11/7/19. I saw $6,200 twice, $5,500 (dreams posted 29/9/19) which the price has blasted through. The dream I had on 1st Dec 19 of an imminent major crash in the world financial markets took place (before I heard about coronavirus). On 19/12/19 I saw BTC at $4,000 and then at $3,100, and another dream of RDD at $0.00019. Look for the potential for the RDD rise I saw occurring from the 3k BTC area to $0.0089 RDD at $4,400 BTC with a near top of $0.016 RDD for that move. This will be a big trade (50x move from $0.00017 to $0.0089). I will share another dream I had yesterday which I believe is about the financial markets. In this dream I saw a woman walking down hill on a street and she thought she got to the bottom of the hill, Then the screen panned left and I saw the hill continued much further down almost out of sight, and she sighed as she knew she had to walk down the entire hill. Then the scene changed and I saw a forest area on a hillside, and there was a valley with no trees cutting down the hill, I had a drone-camera like view as I was travelling down hill along the valley, and I saw this valley cut out of the trees go all the way down hill (a big steep hill) and at the end was the ocean. I have seen 11-12k, 17k and 8-10k for the DOW in separate dreams. I believe my dream signifies continued market decline. Thank you and God bless you. Christopher."

As posted on Z3News 17/3/2020: "Hi I saw 6,677 or so DOW this morning as I was waking up. Earlier in the night I saw $3,600 BTC and later $8,100 BTC. Thanks. Also I want to share a dream I posted on Z3 on 1st December 2019: "Yesterday I had a dream of the US and AUS markets and financial groups/leaders in fear/panic that they were anxiously awaiting a massive drop in the markets. It was like they had done all they could to avert it and were trying to make it appear as if business was normal but they were very worried of a coming

major crash. There was an urgency with this dream. I expect that this will be coming soon." Looks like we have a major crash ahead. God bless you. Christopher."

As posted on Z3News on 21/3/2020: "Hi Z3News I had a dream this morning where I saw the price list on Blockfolio and BTC was $800 and then I checked again and it was under $200 and I checked again and the price said "n/a" and then I checked again and the price was around $400 to $600 and seem to be bouncing around under $1,000. This was the dream. I've had confirmatory dreams of this price range including on 17/4/2019, 2/6/2019, 23/6/2019, 28/1/2020, It may be good to have some funds to pick up BTC at those low prices. God bless you. Christopher."

As posted on Z3News 25/3/2020 "Yesterday 24/3/2020 I had a dream and saw a big up in the crypto market due to some kind of announcement. God bless."

As posted on Z3News 13/4/2020 "Hi everyone, I had a very interesting dream this morning. In the dream I saw the price of BTC was at $2,000. I knew it was dropping quickly. Then I checked the price and BTC was at $0.002 (yes this price!). I was shocked and went to try to buy some. I also heard a voice talking about this happening due to a "China hack" or something like this. Very interesting. It may go with the dream from this thread of BTC under $200 and the price hitting "N/A" which means "not applicable/not available/no answer". God bless you, Christopher."

As posted on Z3News 12/5/2020 "I had a dream yesterday where I saw the lower section of a BTC chart. On the left it showed it had gone up (perhaps a move we have already had) and on the right it had come back down (didn't see the top of the chart) and it was a big decline down to $3,100. God bless. Christopher."

As posted on Z3News 20/5/2020 "Hi Z3 I want to share a significant dream I had on 6/5/2020. I have now decided to share it. In this dream I saw the price of BTC drop from $9.2k to $5k to $2k crashing very quickly, and the price continued to drop to $200 and then to $0. I was hopeful my low buy orders had been fulfilled but then I wasn't sure if I had set them or not. The scene changed and I was still in the same place in front of my computer and the BTC price was at $9,2k again, and I was shocked it had rebounded like that. That was the dream. This is in accordance with several other dreams I have received and shared already. You may want to consider having some low buy orders in for BTC. God bless you. Christopher."

As posted on Z3News 22/5/2020 "Hi Tim you're welcome, I praise the Lord for showing me. Very interesting the dream you shared. This morning I also had a dream and I saw BTC at
$281. The Lord is confirming these things. God bless you. Christopher."

As posted on Z3news 10/6/2020: "Hi everyone, yesterday 9/6/2020 in a dream I saw BTC up %110 percent and RDD up %80 percent. This morning I saw in a dream that BTC was up fairly significantly (I saw it on a chart but didn't remember the specifics well). Not sure on timing. God bless. Christopher."

As posted on Z3News 3/7/2020 "I received two dreams about a week ago. In one I saw BTC at around $11,000. The day after in a dream I saw the BTC prices of $11,000 and $7,000.
God bless. Christopher."

As posted on Z3News 26/7/2020 “Hi Z3, I had a dream this morning and saw BTC at $7,300 approximately. Also I had a dream where I saw a mainstream front page article on an Australian news website talking about how they expected the Dow to drop to 9,000. God bless. Christopher.” As posted on Z3News 6th August 2020 "Hi Z3, I had a dream on 1st August 2020 where I received the knowledge of gold at $300, then after this BTC going up a lot. That was short but I believe it was from the Lord. I don’t know what would cause such a low gold price. I also had a dream on 17th June 2020 where I saw four steps written down. The first two I couldn’t make out, but the third was “$10 Trillion tax payer bailout”. The fourth step was “Hyperinflation”. I believe the dream was about the USA and was economic related. I believe that way bigger taxpayer bailouts are coming and after this is hyperinflation. God bless you. Christopher."
As posted on Z3News on 10 August 2020 "Hi Z3, I had a dream two days ago (8th August 2020) of seeing BTC at $14,000. I then saw a chart with a lot of green candles that the price had gone up. Then I saw RDD at I believe 0.20 cents ($0.0020). God bless, Christopher."

As posted on Z3News 14th August 2020 "I had a dream this morning of seeing the BTC price change from about $10k to $380. Then later in the night I had a dream of $200 BTC. God bless. Christopher."

As posted on Z3News 31/8/2020 "Hi I had a dream this morning where I saw online people were talking and celebrating a major Reddcoin (RDD) move. I saw the price had gone up to
$0.23 (23 cents). I was surprised. That was it. God bless you. Christopher."

As posted on Z3News 3 September 2020 "Hi Z3, this morning in a dream I checked the price of RDD on my phone it was down 45% and was $0.00086 and I wanted to buy some extra. We are not that far off the price (price now is $0.00113). Only recently the price was $0.0014. God bless. Christopher."

Posted 25/10/2020: "I had a dream a few weeks ago where I saw Bitcoin Cash (BCH) on an exchange and I had a lot of coins, and the price was very low (I didn't see it), then the price moved up to $100 USD and I thought this was a good price to sell some coins. I believe this is after the "crypto winter" or massive BTC crash that I believe will bring down the market, and is showing BCH will make a good recovery in time. Also about one week ago I dreamed of seeing BTC at $6,000 and another dream of $20,000 I believe. God bless you. Christopher."

As posted on Z3News 28/11/2020 "Hi Z3, I had a dream yesterday (27/11) and I saw BTC had crashed and the price was around $1,124, and there was a short dream after this where I heard “Buy some when BTC is at $5k”. Then this morning I received a short dream where I saw I had posted this to z3, being a confirmation. God bless you. Christopher."

As posted on Z3News 29/11/2020 "This morning I had a dream where I received “Buy at $300” in reference to the BTC price. Also on 23/11 I had a peculiar vision where after I had woken up and was laying there with my eyes closed I saw a vision of $2,100 in red letters quickly zoom in towards me as it got bigger. I wasn’t sure what that was about, but it’s possible it has to do with crypto (BTC price). Also David yes I saw the sequence BTC to $30/35k then to $2k then to $60k. God bless. Christopher."

As posted on Z3News 10/12/2020 “Hi Z3 I saw in a dream this morning BTC at $6,700 after a major decline, and 25,000 DOW and -25% but I don’t know if this was BTC or the DOW the -25% was referring to. God bless. Christopher.”

As posted on Z3News 15/12/2020 "Hi Z3 just sharing few short dreams. I saw BTC at $11,700 on 11/12/2020, and saw $10,000 twice in two dreams on 1/12/2020 but I wasn’t sure what it was in relation to (could be BTC). Thank you. God bless. Christopher."

As posted on Z3News 20/12/2020 “Hi Z3, I had a dream this morning where I was personally directed to buy today, where I saw instructions for myself written on a poster even telling me to buy by a certain time today. Before I was mostly on the sidelines awaiting BTC crash. I had been praying for a few days if BTC was going up to the $30k+ area God showed me ages ago or is it going to crash first. The dream today may indicate we are continuing to head up for the third wave/$30k/35k BTC before the major crash to $2k and below where the extremely cheap prices will be (fishing from the bottom). I believe RDD could have a good rise from here as my dream from 17th May 2018 I saw RDD at about 1.7 cents ($0.017) when BTC was nearing $30,000, then I saw BTC dropping fast and RDD dropping fast from 1.7 cents. I don’t know for certain what will happen as the instructions were for me personally, but I wanted to share. God bless. Christopher.”

As posted on Z3News 20/12/2020 “Hi Z3 I made a PDF document compiling all the crypto dreams I received that I could find. The first part of the document links crypto videos I made on my Youtube channel where I discussed dreams that are not written in the rest of the document. The list is up to date as of today 20/12/2020 and is written in order of OLDEST to NEWEST (scroll to the bottom for newest). Please be advised these matters require godly interpretation of sequences and timing. In some cases I was overzealous in my interpretation of the sequences and timings, so consider my interpretations separately from the dreams themselves. Please seek the Lord Jesus Christ in prayer and guidance regarding your financial decisions. Here is the link: [removed as updated document provided] God bless you. Christopher.”

As posted on Z3News 26/12/2020 “Hi Z3 I had a dream on 21/12/2020 where I saw the price of BTC on my laptop and the price was $855,000 AUD each coin (which at current exchange rates is equal to approximately $650,000 USD) and I sold 3 coins. After I woke up from the dream I was surprised to see such a high number. I then asked God for confirmation and shortly after saw a vision of people gardening and working the soil with a hoe and the seasons quickly changing in the background (I believe this is showing both the passage of time and how our investments are like planting for harvest). Then I saw a brief vision of the number $60k change rapidly moving to over $800k (I didn’t see USD or AUD in this vision). I believe the Lord is showing me what kind of numbers can be expected over a longer term for BTC, which is very high. I imagine many other coins will increase to great prices. God bless you. Christopher.”

As posted on Z3News today 29/12/2020 "Hi z3 I had a dream this morning where I saw BTC moving up around 28k and then I saw RDD at $0.0155 (1.55 cents). This confirms the dream I had over 2 years ago of RDD at 1.7 cents around BTC 30k. Perhaps this is very soon, that would be great if so! God bless. Christopher."

As posted on Z3News "Hi Z3 yesterday 30/12/2020 I saw BTC at $16,000 in a dream so I wanted to share.”

As posted on Z3News 5/1/21 "Hi Z3, yesterday I received a dream where I checked my phone and was shocked to see RDD at $5. I thought in the dream this happened sooner than I thought and I rushed over to try to login to the exchange. There was a thought in the dream that BTC had dropped and people were funnelling money into RDD, though I'm not sure if it was from the dream or my conscious reacting to the dream. In any case I have previously seen over $3 RDD which occurred while leaves were on the ground in Aus (Autumn/Winter time). We are in summer now. Also I'll share on 21/12/20 I had a dream about April 17 and New Year something to do with BTC. God bless. Christopher."

As posted on Z3News today 9/1/21 "Hi Z3 I saw in a very brief vision RDD move from $0.0027 to $0.0040. God bless. Christopher."

As posted on Z3News today 9/1/21 "Also on 28/12/20 I saw $50,000 in a dream. I don't know why but at the time I thought it was something else and not related to crypto so I didn't share, but now seeing BTC break $40k it could be that it was about BTC. God bless. Christopher."

As posted on Z3News 18/1/2021 "As I was laying down to sleep tonight 18/1/21 I heard audibly "Five, One, Zero, Zero, Zero" which is 51,000. It could be about BTC though I didn't see a reference to BTC. I haven't heard numbers like that before. God bless. Christopher."

As posted on Z3News 19/1/2021 "I had a dream today where I saw BTC at $28,000. God bless. Christopher."

As posted on Z3News 22/1/2021 "Hi Z3 I had a dream this morning where I saw the price of Electroneum (ETN) was at $51. Yes $51. Then the next part of the dream I was telling my brother my dream and what an amazing return it will have given the current price is about half a cent. I take that as confirmation of telling my brethren in Christ. Then I saw a chart of BTC having dropped down substantially from a higher price, a major decline and the price was $11,000. God bless you. Christopher."

As posted on Z3News today 30/1/21 "Hi Z3 this morning I had a dream to buy some Etherium and Stellar Lumens, and the amount for me personally to buy was told to me. Then I woke up and prayed for confirmation from God and had another dream after confirming it. And a few days ago I had a dream of BTC at $7,000. God bless. Christopher."

As posted on Z3News 1/2/21 "Hi Z3 I had a dream this morning where I saw the ETN price rising rapidly and quickly changing and rising to over 30 cents. I had a prior dream of a 30 cent target for ETN from 1st June 2018, and this is a confirmation. God bless. Christopher."

As posted on Z3News 11/2/2021 "Hi Z3 this morning I had a dream where I heard "BTC fading, Reddcoin continuing to drop". I don't know when this will be applicable. Then later I heard "59,000". I believe that is referring to BTC. Then near before I woke up I saw section of a rainbow with its colours (similar colours to RDD logo). I will draw Z3's attention to previous dreams I received where I was shown about selling RDD at 4 cents and the dream I had where there was a prophetic and technical target of 5 cents for RDD. I believe 4 to 5 cents could be the target for the move up past 1.5 to 1.7 cents I have seen. The Lord has directly led me to be prepared for this move and it could be soon. God bless you. Christopher."

As posted on Z3News 13/2/21 "I am aiming for the 4 to 5 cent area which the Lord has led me to, based on the dreams I shared above of selling at 4 cents (a clear marker) and the prophetic and technical target of 5 cents in the other dream. I was also given a sell price in this region (though it is private). I don't know if we may go to this area early or late march but I hope it's this march, and I hope it will be soon based on some other reasons. I also had a dream yesterday about a big RDD move "very soon" but the figures I received I am not certain because I didn't remember very well from the dream. It was something like 6 or 7 or 67 (I don't know cents or dollars). I have seen 19 and 59 cents before. God bless. Christopher."

As posted on Z3News 15/2/21 "Hi Z3, before I woke up yesterday I received "ETN moving first". Then this morning I saw written buy prices for ETN of 1.5 cents ($0.015) and $0.004. Then I saw steel water bottles over the fire with water inside I was tending them and they represented ETN and they were heating up, shaking and getting quite hot. I believe the Lord is showing me that 1.5 cents (current price) is still a good buy for ETN based on what it will soon move to, and that it may make a big move soon and heat up (price action). The $0.004 represents another buying opportunity (I don't know when that will be reached). Targets I am looking for with ETN from dreams I received are 13.7 cents, 31 cents and 51 cents. I did post in this thread of a move in ETN over 30 cents. God bless. Christopher."

As posted on Z3News 17/2/21 "Hi Z3, I had a dream a few days ago I saw my Blockfolio amount had increased based on what I have now would correspond with a RDD price of $0.019 (1.9 cents). This morning I had a dream where I saw ETN moving from 1 cent to 0.44 cents. Then I saw the price of ETN at $0.45 (45 cents). I don't know when the 0.44 cents will be reached, and from my previous dream of two buy prices written of 1.5 cents and $0.004 (0.4 cents) could mean they are at different times so I don't know if ETN will go down to that level before taking off. It might be risky to wait for a lower entry when it could move earlier. The move for ETN based on my dreams looks to be a big one, over 30 cents, potentially 45 cents as much as 51 cents or higher (I have not seen any tops). God bless. Christopher."

As posted on Z3News 18/2/21 "Hi Z3 this morning I had a dream of seeing my Blockfolio amount increased corresponding to a RDD price of approximately 4.71 cents based on my current holdings. God bless. Christopher"

As posted on Z3News 26/2/2021 "Hi James and Z3, thank you for the post. I want to share some significant dreams I received this morning. I one dream I saw ETN and RDD moving up. I saw RDD was nearing 1 cent ($0.01), a decent rise. Then I saw ETN was at $0.88 (88 cents). I was shocked, and the two prices were side by side, and I believe I saw that ETN was 88 cents and RDD was 1 cent. Then I saw ETN had kept rising and was over $1 and the dream ended. I prayed about this and was shown to take a larger holding in ETN, and saw the prices of 1.2 cents to 0.4 cents for ETN (probably highlighting the similar buy range I was shown earlier). I also saw a dream of my father and mother had written a number of ETN price targets between $5 and $5.30 on a large whiteboard. Also I'll add that yesterday I received "reinvestment opportunity 45k" which I thought meant when BTC was at $45,000 but I'm not sure when that is relevant. Please seek the Lord regarding your approach. God bless you. Christopher."

As posted on Z3News 27/2/21 "I saw in a dream this morning the whole crypto market seemed up, fairly significantly. Also on 23/2/21 I had two dreams where I saw ETN at 4 cents. God bless. Christopher."

As posted on Z3News 2/3/21 "Hi Z3, a few dreams I had yesterday I saw RDD at $0.0089. I also saw 2 cent RDD. I also saw 0.00000006 BTC. I assume that is a lower price for RDD given it trades in that kind of range. I also saw $20,000 BTC. God bless. Christopher."

As posted on Z3News 10/3/21 "Hi Z3, a few dreams to share. This morning I heard “Each coin $91,000”. I assume that is BTC, no idea on timing but that is quite a high price. I had a dream on 7/3/21 of seeing a $ amount in the ETN web wallet corresponding with a ETN price of 10.6 cents. I also saw BTC at 50k and it had been up 20%, meaning a rise from about 42k. On 6/3/21 I saw a dream that ETN was rising and was at 18 cents, I saw a vertical list of prices written above this with the top number 111 cents. In the same dream there was something about gold contracts with ETN, or something to do with gold and ETN, I’m not sure. God bless. Christopher."

As posted on Z3News 21/3/21 "I had a dream this morning of seeing the number 68,000 (approx). It may be about BTC. God bless. Christopher."

As posted on Z3News 21/3/21 "Also this morning I dreamed of seeing the ETN price on Blockfolio move from around its current price to 30 cents. I also had a dream where I saw a scene outside of heavy snow with someone in a big puffy coat, and this was to do with investments. It made me think of crypto winter is coming (I just made a video yesterday about that topic on my Youtube, here's the link if you are interested https://youtu.be/sZW7wKeNJnM). Then I saw gold/silver being represented by a rubber band stretching forth fast to $35,000 (I assume gold price), then snapping back (a big crash). The lowest price I've seen for gold is $300 that I received on 1/8/20. God bless. Christopher."

As posted on Z3News 26/3/21 "Hi Z3, I have some dreams to share from the last few days. On 23/3/21, I saw in a dream BTC was at 77k, and I saw a hand drawn chart with a line up to 91k (the previous figure I received). That night I also saw BTC at $39,000, and at $50,000.

On 24/3/21 I had a dream where I saw the BTC price on an exchange, the price was over 100k. The price froze on a figure like 109k, then changed to 111k and froze there for several seconds. I sold at this price in the dream and saw my balance on the exchange (based on my current holdings would equal an ETN price of approx $1.50). Then I saw the price change lower rapidly, numbers were flashing lower and lower all the way to $0. Then I saw my balance on the exchange was also $0 and I was confused. Then I was telling my brother this was important information. Then I woke up. With this dream my interpretations are that 111k is not necessarily the top of the move. While I saw the numbers rapidly changing to lower values for BTC all the way to $0, I believe there will likely still be ups and downs during that time. My holdings on the exchange going to $0 might be because I hadn’t converted into fiat, or it may suggest that BTC going to $0 might cause the exchange to even fail or that you will not be able to withdraw. These are my thoughts about it. The crash happened very rapidly in the dream but I don’t know how much time it would take in reality. This dream suggests it is important to be able to exit safely when you decide to, and that your funds may not be safe on the exchange during a BTC crash to $0. I believe this would be the crash of the third wave (from my earlier dream) giving those strong buying opportunities (fishing from the bottom) and beginning of a crypto winter time period before recovery (I made a Youtube video about

my dreams on this topic recently). On 25/3/21 I saw 2.2 cent ETN in a dream. Later I heard "22.5k strength". I believe this could be referring to BTC having a strong support at this level. Then I had a dream of seeing ETN at 7.89 cents, and I heard someone was saying that people were about to pile into ETN to try to take advantage of the rise. Later I received $2.10 and $3 (I believe these could be ETN prices, as I received over $5 before). Please seek the Lord regarding your approach and interpretation. God bless. Christopher."

As posted on Z3News 2/4/2021 "I have some dreams to share, and a few amazing ones I received this morning (Good Friday, praise the Lord). On 29/3/21 I saw 2.2 or 2.5 or so cent ETN price. On 31/3/21 I had a dream where I saw BTC price on an exchange, it was crashing, I didn't see the upper figures only the lower ones, changing rapidly to $20, $18, to zero, up to $18, then it changed to $32,000, then went back to zero again! In the dream I was trying to place orders but was having difficulty due to the rapidly changing price, and it made me think to have orders set in advance. Later in the night I had a dream reminding me that Tim saw BTC drop from 32k area, and to mention this also. Then I had a dream of having RDD on Bittrex, and I saw my amount rapidly reduced to zero and someone was withdrawing my RDD and had stolen it. I saw on my computer there was an unknown program on the taskbar that I knew was responsible and I thought it was a keylogger. This dream I believe is a warning to beware of theft of your crypto, to take precautions. I don't believe this literally applies to me, but was given to me so I could share as a warning. After I got this dream I enabled only withdrawals to selected wallets, and I already had two factor authentication (google authenticator) on my account. Please secure all your crypto holdings and don't let the enemy steal from you by not taking proper precautions yourself. Then later that night I had a dream of ETN target of 29 cents and saw a lower figure after under 10 cents but I can't remember it. Yesterday on 1/4/21 I had a dream where I saw a post on my Youtube video about ETN, and it said something like "I wish I would have gone all in on ETN…" and it had many thumbs up. I believe that person and those who agreed were lamenting because they only held a small portion of ETN in their crypto portfolio, and they didn't believe the prophetic dreams potentially, so when it went up they regretted not being all in. Then today 2/4/21 I had a dream where I saw posts online about how BTC had dropped to $20,000. Then I saw $64,000 BTC price. Then I had a dream where I saw ETN and RDD side by side. ETN was rising and went up to 30 cents, and RDD rose also and went up to 2.4 cents. Then while ETN was still at 30 cents, RDD dropped to 1 cent. As I saw this it seemed ETN paused on 30 cents for a while, then suddenly dropped and crashed, and I saw only the ETN price as it went all the way to $0.00513. This is a very amazing set of dreams because I believe the Lord is showing me, and you, that my earlier dreams of ETN prophetic target of 30 cents is confirmed, but ETN will drop from there or soon after (that may not be the exact top). Then the price will go to the second buy price I was given by God. The first was 1.5 cents and the second was 0.5 cents, both it is clear now represent buying opportunities. I believe the ETN price moving to 0.5 cents may correspond with BTC moving to 20k. I don't believe this is the major crash to zero and crypto winter I have been shown, and I believe the market will recover to 100k plus BTC I saw and over $1 ETN. What this could mean I will show by an example: Say you put in $500 in ETN at current price of 3.2 cents (15,600 ETN coins). If you sold at 30 cents this would be $4,687 (over 9 times your money). Then if you used that to rebuy ETN at 0.5 cents ($0.005) you would have 937,400 ETN (60x more ETN than you had before). Then if you sold this at $1 ETN when BTC moves over 100k you would have $937,400 (1874x increase from $500). Then if you cashed out and put aside some of this to buy when BTC crashes to zero and under $1,000, the ETN you would have would be enormous. Then hold until longer term $51 target. The multiplication of wealth is phenomenal. I believe the Lord gave this to me so I can share with you and those who are led

by God will be blessed and will be able to bless others. These are my interpretations of what I received, please seek the Lord and exercise your own decisions. God bless you. Christopher."

As posted on Z3News 10/4/2021 "Hi Z3, I have some recent dreams I want to share. On 3/4/21 I saw $0.0032 ETN, and saw BTC at 19k and saw a minus 44k next to it, as if it had been subtracted from it, meaning it had gone down from 63k. On 8/4/21 I had a dream where I was trying to sell something on Bittrex at $0.044 (4.4 cents). I believe this could be RDD as I have this area as a target and sell price from other dreams. Today 10/4/21 I saw ETN at $0.93, and saw $0.0045 but I didn't see what it was (may be ETN again). Interestingly I had a dream where I saw different instructions written down overlaying my view in a dream and I saw RDD's price changing up to 15 cents, then up to 80 cents, then up into the $ range. I saw at the bottom of the writing it said "RDD to $1 soon…" and it also said "Be conscious in what you do My sons". I believe that is a message from the Lord. Conscious can mean being aware and also being deliberate and intentional. It could apply generally but may apply to receiving money from the Lord, to be conscious in what we do with it. These are my thoughts on it anyway. Also I believe both ETN and RDD are very significant and will be used by the Lord. God bless you. Christopher."

As posted on Z3News 12/4/21 "Hi Z3, this morning I saw in a dream $545 silver. Later I saw around $54,000 which I assume may be BTC. At the current silver price of $25.1 this is an approx 21.7x increase. Gold at $35,000 where I saw it on 21/3/21 is an approx 20.1x increase from its current price of $1,740. God bless. Christopher."

As posted on Z3News 14/4/21 "Hi Z3, yesterday on 13/4/21 I saw in a dream 40k BTC and ETN was at 1.7 cents ($0.017) I believe. Today 14/4/21 I saw in a dream RDD at $0.0025. Then I saw in a dream ETN at 3.1 cents ($0.031), and saw it rising up. In the background I saw writing saying something like 60% first wave, 90% second, as the price moved up to 37 cents ($0.37) and the dream ended. Then later in the night I saw in a dream the vertical axis of an ETN chart with prices listed from 0 to 10 to 20, 30, 40, 50 in cents. Then I saw the price on the chart move steadily from near 0 up to 10 cents, then to 20, and 30, 40, 50. It was a line moving vertically up through these prices. Then it rose above 50 cents and I saw more prices above, and it sped rapidly through 60, 70, 80, 90 cents and then my view changed and I saw a Trading View page of a person called "ETNBEARGUY" and his image was a picture of a chicken and I saw him post something like "OMG ETN TO $1!!!" This was the dream. From this dream it showed ETN moving up rapidly in one huge move from near zero to $1. On 10/4/21 I saw $0.0032 ETN, and received $0.004 as a buy price for ETN on 15/2/21, so these are prices to watch for ETN and buy zones. For example $500 into ETN invested at $0.004 is 125,000 ETN and sold at $1 is $125,000 (250x increase). The last part I believe was humour from the Lord showing a person who spoke against ETN (ETN bear) and his image was a chicken and he was astonished when ETN hit $1 as he was used to speaking against ETN rising, and never thought it would happen. As of now my view of the dreams is I am looking for a move to the 30 cent area, though I don't think that's the exact top of the move and it may go higher, and a crash to $0.00513 which I saw. I did see ETN at 2.2 cents ($0.022) on 25/3/21 so we could possibly go there before moving up to 30 cents. After the crash from 30 cents to $0.00513 from that range I am expecting the massive spike to $1. I hope those led may be ready. I hope the Lord guides you and strengthens you in faith. These are my interpretations of what I received, please seek the Lord in your approach. God bless you.
Christopher."

As posted on Z3News 24/4/21 "Hi Z3 on 23/4/21 I saw in a dream 1.6 cent RDD ($0.016). Later I had a dream where I heard “Reddcoin break at…” and I saw the figures $0.42 and $0.037 (3.7 cents). I’m not sure what that means. I have had dreams about selling RDD around 4 cents ($0.04). I also saw $0.0072 RDD but because I am posting this later RDD already hit that after dropping from $0.01. I’ll try to post earlier in case the dreams have a short fulfilment. God bless. Christopher."

As posted on Z3News 1/5/2021 "Hi Z3, I had a brief vision this morning after waking up, I saw the market was up, it seemed significant, and I saw RDD was up something like 60 percent. God bless. Christopher."

As posted on Z3News 2/5/21 "Hi Z3 I had a dream where I saw a chart with RDD moving up to $0.0199 (1.99 cents) and then it started to drop back down. God bless. Christopher."

As posted on Z3News 4/5/21 "Hi Z3, this morning in a dream I saw ETN was around 4.5 cents ($0.045). I had another brief dream of seeing RDD at $0.0097 (almost 1 cent). That’s not a huge move from where we are but I thought I’d share. God bless. Christopher."

As posted on Z3News 12/5/2021 "Hi Z3, I want to share some recent dreams. On 30/4/2021 I had a dream where I saw the price of BTC on trading view and I was shocked at first, to see how many digits were on the screen. Part of the number was cut off, and then the screen panned over some and I saw the price of BTC as astonishingly right around $111,000,000,000 (111 billion dollars). I counted out 12 digits (not decimals), and then I received the word “Government Stimulus” and the dream ended. I was surprised by this one, and took a bit longer to share it. I believe it is very possible due to possible hyperinflation and devaluation of currencies. On 1/5/21 I saw in a dream $3,800 BTC. On 11/5/21 I had a dream where I saw a man comparing before and after the value of his crypto, as the market had gone up significantly and he compared the amount he had before it rose to after it rose, and he had made a good amount and was pointing it out (I didn’t see how much). This seems to suggest the market moving up significantly, but I am not sure on timing. Today 12/5/21 I saw in a dream 37 cent ETN ($0.37). Later this morning in a dream I saw the BTC chart which seemed like the current price level, then I saw BTC at $3,100 with a -85% next to it. An 85% drop to $3,100 would mean a drop from approximately $20,600, which is near the level I have been shown before. Please seek the Lord. God bless. Christopher."

As posted on Z3News 15/5/21 "Hi Z3, this morning in a dream I was talking about ETN nearing $0.004. Then later in a dream I saw ETN was at $0.007 and I saw this on the chart, and it looked like there was some kind of support further down represented by a line. This brings me back to the two buy prices for ETN the Lord gave me of 1.5 cents ($0.015) and $0.004 on 15/2/21. It looks like we could be heading down to the lower figure, I’m not sure on timing.. Please seek the Lord. God bless. Christopher."

As posted on Z3News 17/5/21 "Hi Z3 I had a dream this morning where I heard a man talking about RDD dropping from a certain point and it looked like it was from 8 satoshi (0.00000008 BTC). It seemed the price was above this but then it went to 8 satoshi and he pointed it out and then the price of RDD crashed very hard. That was the dream. God bless. Christopher."

As posted on Z3News 20/5/21 "Dear Z3, I had a dream this morning of seeing a price at $0.00015. I did not see what it was but I believe it may be RDD. My dream from 1/12/2019 was seeing RDD move from $0.00027 to $0.00017 and I wanted to buy. Also on 20/12/19 I saw BTC at $4,000 and RDD at $0.00019 but I wasn't sure if it was at the same time. Also I had a dream this morning where I was discussing with another person that another very severe crash is coming, it seemed like maybe the market had gone up some as I was warning of the impending crash. I am looking for ETN buy price of $0.004 I saw and lowest I've seen of $0.0032. For RDD as I said above. I was hoping we were going to head up before such an extreme crash, but this would present an opportunity to obtain more coins at low prices. On 10/4/21 the Lord showed me 19k BTC with a -44k next to it (down from 63k). Previously on 10/3/21 I have seen BTC at 50k up 20% (from 42k). I don't know what ups and downs we will have but be prepared for a very deep crash. I don't believe this is crash to zero for BTC as I saw that happening after BTC reached 111k, but its good to be ready either way. God bless you. Christopher."

As posted on Z3News 25/5/21 "Hi Z3, this morning after I woke up I had a brief vision where I saw the RDD price move from $0.025 (2.5 cents) to $0.03 (3cents). God bless. Christopher."

As posted on Z3News 27/5/21 "Hi Z3, yesterday 26/5/21 I had a dream of a warning of the economy dropping in the USA and I saw an image of Biden and then the Dow was at 17k. That's a 50 percent drop from current levels, and it seemed to be under Biden in the dream. God bless. Christopher."

As posted on Z3News 29/5/21 "Hi Z3 this morning in a dream the price of BTC was at 20k. Then later I had a dream seeing the number for BTC in red of 20k and ETN was 0.34 cents ($0.0034). I believe the red means the price went down. I believe we are going down to 19/20k as I was shown earlier in a dream I received on 3/4/21 and shared on 10/4/21 when BTC was 58.5k, the dream was seeing ETN at $0.0032 and 19k BTC with a -44k next to it (down from 63k). The market topped at 64k which was 4 days later and has been down since, so praise the Lord for showing me that dream, and I think the rest is coming soon. The buy price for ETN I received of $0.004 is coming into play. I do expect we will go up from there to the higher targets in the over 30 cent move as $0.004 is the lowest buy price I've been given by the Lord for ETN. Yesterday I was given in a dream $0.488 (48.8 cents) as a target to share with others for ETN and I believe that is a target for the over 30 cent move. God bless. Christopher."

As posted on Z3News 31/5/21 "Hi Z3, this morning I had a dream where I saw BTC spiking up from 20k, then my view changed and I saw RDD going up steeply on a chart and I had a RDD sell order at $0.04 (4 cents) that was fulfilled. God bless. Christopher."

As posted on Z3News 8/6/2021 "Hi Z3, this morning I had a dream where ETN was at 4 cents ($0.04) and it seemed like BTC was around the same price, and hadn't moved that much. Then after the dream I had another dream of different people saying the same thing of ETN to 4 cents, and I was telling someone also. God bless. Christopher."

As posted on Z3News 23/6/21 "Hi James thank you for sharing. The Lord has been showing me about long/short opportunities recently, some have been correct with amazing accuracy, but I also have received attacks in the form of deceptive dreams from the enemy to try to make me confused and doubt what I initially receved. That said, what I share I believe is from the Lord. I saw this morning BTC peaking at 34k and declining to retest the bottom (the 28k bottom but I didn't see exact price it went down to) then bouncing hard and rising over the 34k

peak but I didn't see a figure for how high it went. I have received a few figures around $54,000 today and yesterday but I don't know if it will go that high or will be less. On 16/6/21 I prayed about a bottom or safe exit and I received after spiritual battle a figure in the low $16,000's. I believe we may go under the 19k I saw at least for a short time. I saw today a chart in a dream of BTC moving from 19k to mid 14k. I also in another dream saw a decline from a higher point and halfway down what I saw the price was 41k. Also today I saw a special revelation of BTC crashing from a peak of 35k to $200 then rising to 66k and crashing to $0 or $200 (I can't remember which). Now I don't know exactly when that will be but my view is that it could be the entry into the crypto winter timeperiod I saw where cryptos were near 0 for some time. Now the right interpretation of timing is needed. I suggest everyone pray to the Lord and ask what you should do. Doing long/short and seeking the Lord is like a faith journey with a lot of battles so make sure you seek the Lord. I will try to share if I receive something more that I am sure about. God bless you. Christopher."

As posted on Z3News 24/6/21 "Hi Z3 I need to make a correction to the dream of seeing BTC peaking at 34k. In this dream I saw the top of a hill on a chart of BTC peaking at 34k, then decline sharply and go down. I did not see a figure it went down to. Then it spiked up and went higher than 34k and I did not see a figure. I do not know if it was bouncing off 28k that was an interpretation I did not see that so it was wrong to assume. It is very possible we could go lower before bouncing, possibly even to 19k (my dream before the market crashed was 63k to 19k), and I believe this is more likely than bouncing from 28k again, as we have hit 28k two times already. Also I have received a figure I believe is significant at the 19k level. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 24/6/2021 "Dear Z3 and Tim, this morning I had two dreams where I saw BTC crash from seemingly around the current price all the way to zero or very near zero. In the first I saw it crash through 19k then 16k and under 10k then to zero. I dreamed about BTC crashing to zero before and also on 2/4/21 where I was prompted to mention Tim Price's dream (in the above post). I am not certain with timing, but I believe it will happen, and I suggest you consider having low buy orders in place for BTC, as if they are fulfilled you will rejoice. God bless. Christopher."

As posted on Z3News 26/6/21 "Dear Z3, on 21/6/21 I saw BTC move from 32k to high 39k and I saw this twice. This reminds me of the dream I posted above of seeing a peak of 34k, moving sharply down and rebounding and moving above 34k. This could be what may be happening or is soon to, and its possible the rebound point is 32k or around it. We may retest the high of 41k area before continuing the downtrend. I have also seen a few figures around 43-44k. Please seek the Lord regarding your approach, I wanted to share if this is may be coming up. God bless you. Christopher."

As posted on Z3News 26/6/21 "Hi James and Z3, I had some dreams this morning which may give further understanding. First have a look at this BTC chart on trading view by author TradingShot https://www.google.com/amp/s/www.tradingview.com/chart/BTCUSD/gUuuWrAE-BITCOIN-Short-term-Megaphone-pattern/%3famp I believe the 34k top I saw was not an exact figure, it did go above to 35.5k at most before declining. I saw the price decline sharply then rebound above 34k significantly. It is possible it is about a smaller time-scale but I don't believe so. This morning I had a dream of 3 impulse waves downwards and wave 4 went up some, then wave 5 went down very steeply. It seemed in the dream we were beginning the wave 4 up before the steep decline. I believe the bottom may not be in yet and the move will go down further likely retesting 28k, perhaps wicking under. But then I believe we may be going to the top of the channel identified in the trading view chart of 40k area, before

beginning another decline I believe which will break the 28k area and go down to 19k. Yesterday I saw a brief vision of 28k area being broken hard through to the downside. I believe my dream of 32k BTC to 39k is not indicative of the exact turning points, but part of the move, and it may drop lower than 32k before moving up to 39k and may peak around 44k area. I believe my interpretation of what I have received coincides with the chart also. So we may have a further steep leg down before bouncing IMO, then moving above 34k up to test the upward resistance. There we may fail to break the upward resistance and fall down to 19k. Please seek the Lord regarding the correct interpretation and sequence. If you use leverage don't assume prices received are exact turning points and give yourself plenty of room. Make sure prophetic aligns with what the trend and the chart is doing in this type of trading as this helps get the right interpretation. God bless. Christopher."

As posted on Z3News 27/6/21 "Hi Z3 I saw a vision of a chart as I woke today. The chart appeared to show moves with no figures but I knew what it meant. It began with a downtrend line from the 41k move that hit 28.5k that already happened, then up to the 35k move, then down to test the bottom, then up to 35k again, then down to test the bottom again, then up to 40k area. This is what I saw but without the figures but I believe its as I said. Be prepared for a decline from 35k area to retest the bottom before a move to 40k. This is important information. I also received numerous figures around the 34k area. God bless you. Christopher."

As posted on Z3News 27/6/21 "Also I saw a figure two days ago in a dream of "$35,100 top" but I didn't know what it meant at the time, so I believe we will top around 35k on this up move, before moving down to test the bottom, then rebounding to 40k. Leave room if you are leveraged as I have received top figures that were very accurate but some within as much as 1k to 1.5k from the very peak of the top most wick. Please seek the Lord. God bless. Christopher."

As posted on Z3News 27/6/21 "Also this morning I saw in a dream ETN at 1.1 cents ($0.011). God bless. Christopher."

As posted on Z3News 29/6/21 "Hi Z3 I've had a few dreams of a wick going up extra high before this move turns over and tests the bottom. I have two figures in the high 36k, so be cautious. God bless. Christopher."

As posted on Z3News 30/6/21 "Thank you James I agree that's what I think also. I have had dreams tonight I believe we are near the top for this move just shy of 37k, and some figures I received around 34-33.5k. Also highest figure of 39k for the next leg up. Also when this whole move is done and we head back to the bottom I got the figure $26,800 which confirms your 26k James. When this third wave leg up ends I think it may not retrace all the way to 32k. Depending on the count, next could be an overall 4th wave down to 34k and the fifth wave to 39k. If the wave count is correct (count it from the beginning of this move from 30k) if we have a 5th wave up, wave 4 cant go lower than wave 1 which may be right around 33.5k. I may be mistaken on this as also saw $31,349 tonight. I also just had a dream of BTC dropping quickly but then it started going back up quickly without dropping too far, and it was like it turned around quicker than expected. From what I have been shown so far, I am looking at a turn around 37k, dip to 33.5-34k (possibly 32k area) rise to 38-39k, crash to 26.8k, rise to 40k plus, crash to sub 19k. The later moves I usually get more info as we get closer, praise the Lord. Also I recommend Kucoin futures mobile app and trading view mobile app for charts. You can have a lot of capability with these, though obviously futures has higher risk than the leveraged coin options. I got into this in recent times because I had a vision about shorting

BTC. Futures has the advantage of being able to make profit from market moves before the major prophetic coins take off, which can be used to increase holdings. It is not easy, I've had some good results and some losses, and discernment, interpretation and seeking the Lord is vital. Thank you Hoyoung for sharing your dream, I believe the Lord wants us to seek Him to guide us and to help us understand what is coming next. God bless. Christopher."

As posted on Z3NEWS 1/7/21 "Hi Z3 I had some dreams showing a rise up past 35k BTC I believe towards 38k as I saw 38k also. We may be done with the 4th wave correction and are moving up for the final leg up of this move and I believe its to 38k before hard crash to 26.8k. Please seek the Lord, be careful if you are in a short position. God bless. Christopher."

As posted on Z3News on 1/7/2021 "I also saw this morning in a dream a chart down from the recent 36.5k peak and it bounced and seemingly retracted up half way, then went down lower than where it bounced. I'm not sure if this happened shortly after I dreamed this in the early morning with the short term move to 35.2k, or if there is a higher bounce before dropping. I believe we are in the setup for the move to 38k but I don't know where it begins from (how low we will go first) as I didn't see that. Please seek the Lord. The major clearer moves I am more certain on, intermediary moves and turning points not as much. God bless. Christopher." Show less

As posted on Z3News 1/7/21 "Looks like I got off track with thinking the move to 38k was from 35k. I only saw a rise from 35k to 38k, that didn't mean it would not go lower, my apologies for that. I am now thinking we are going to 32k before moving up. This goes back to the dream I posted on 26/6/21 of seeing 32k to 39k twice. This I believe is soon and an important trade. I saw as high as a high end 39k figure so give room if you short from the top of that move. After we hit 39k I believe we are crashing hard to 28k. Please seek the Lord. Interpretation is very critical and the also the right timing. Its easy to get off track but seeking the Lord He will help you. These are very large moves and God willing He will help us in them. God bless. Christopher."

As posted on Z3News 2/7/21 "Hi Hoyoung, as of now I believe the move to 39k is the final leg of this move which began from 30k. I can see 3 large waves, wave 3 topping at 36.5k, wave 4 we are in now down to not sure how far, wave 5 up to 39k. I believe the crash will be to at least 26.8k which is a number I saw recently. Its possible we go lower but I don't think it's 19k yet. I believe we will then move above 40k even possibly over 50k I have some higher targets like 54k etc. I believe the crash from here will be a major one that will break through down to 19k. That's my view at the moment based on the June 27 dream I had seeing that chart. It looked like this move tested the bottom but didn't seem to go way below (like 19k) before moving up higher than the previous move. Ill share if I receive more guidance from the Lord. God bless. Christopher."

As posted on Z3News 2/7/21 "Hi Z3, an update. This morning in dreams/visions I saw zig zag sideways price movement. I saw around $33,890 twice. Then I received "up then down further". This was before a short leg up to $33,900. I then saw figures under 33k, and one at high 24k. That is very low I am not sure if we are moving that far down. If we do it would change my perception of this move, that this move is over and we are going to the 40k leg next. I am not certain of that. Please seek the Lord on this. I also saw $0.0033 ETN and I believe that is a great buy price. God bless. Christopher."

As posted on Z3News 3/7/21 "Hi Z3 tonight I woke up after seeing around $18,900 in a dream. I have seen such low figures before. I don't know if we are going all the way down to

that on this move. Please seek the Lord regarding sequence and timing. God bless. Christopher."

As posted on Z3News 6/7/21 "Hi Z3 I had some dreams today of a big fast green candles upwards after a reversal, I saw approx 37.5k and 35.7k. I have seen figures around 36.8k a few times over the last few days also. God bless. Christopher."

As posted on Z3News 6/7/21 "Hi Z3 I had some more dreams indicating a huge breakout upwards. In the dreams it appeared to begin from around 34k area. I had multiple confirmations, and it may be soon. If we do, the target is 38k. I was told previously about taking a short from around 38k also. Please seek the Lord in your decisions. God bless. Christopher."

As posted on Z3News 7/7/21 "Hi Z3, I had two dreams of seeing a chart move from 35k to 15k. I don't know when it will be. Please seek the Lord. God bless. Christopher."

As posted on Z3News 9/7/21 "Hi Z3, I saw the following sequence in a dream this morning, approximately 33k to 40k to 31k BTC. Later I also saw the figures $27,800 and in another dream I saw $65,100 or so in red. God bless. Christopher."

As posted on Z3News 10/7/21 "Hi Z3 this morning I had a dream BTC had gone to 40k then declined to 30k. I also had two dreams one today and one a few days ago indicating a drop below were we went recently (below 32.8k). In the dream from a 8/7/21 I saw big green candles moving up to 34.5k and I wanted to go short. I believe this may be close to fulfilment as we reversed and are heading back up to where we dropped from 34.5k area. My current thoughts (interpretation) is that we will rise a bit further, be rejected again and go down to 31k area (not sure on exact bottom) and bounce very hard to 40k. Have a look at this chart which presents an interesting channel, topping around 34.6k and with a bottom value around 31.5k before moving up, this chart represents what I am currently looking for https://www.tradingview.com/chart/BTCUSD/C1RwxWSE-Good-enough/ Please seek the Lord regarding the correct sequence, timing and interpretation. God bless you. Christopher."
NOTE: LINK DOES NOT WORK!

As posted on Z3News 10/7/21 "A short correction to my post above, the dream from 8/7/21 the big green candles were moving up towards 34.5k which was the price around the time I had the dream, but I didn't see it go all the way to 34.5k but it was moving towards it and seemed close and the dream ended. It may or may not make it all the way there. God bless. Christopher."

As posted on Z3News 12/7/21 "Thank you James. This morning in a dream I saw ETN was at $0.024 (2.4 cents) and RDD was at $0.021 (2.1 cents). I was talking about how that was a great return especially from RDD's current price ($0.00187 to $0.021 is an approx 11x increase). It reminds me of the dream I had a long time ago about RDD at 1.7 cents and BTC in the 30k area. God bless. Christopher."

As posted on Z3News 13/7/21 "Thank you James for sharing. I saw in a dream this morning the BTC price crashing hard and it seemed to be about $30,500 and I wanted to go long in the dream. I don't know the bottom of this move down, so seek the Lord in your approach, and my desire to long may be a general desire not about going long from a specific price. God bless. Christopher."

As posted on Z3News 14/7/21 "Hi Z3, over the past couple of days I have been seeing visions of an upward movement. I also saw a movement of a chart that appeared to go down, up, then down again. Yesterday I believe, I had a dream where I saw the BTC price with green candles moving up past $33,800. We just bounced from the lower trend line (see here for example https://www.tradingview.com/chart/BTCUSD/QLjMdIov-btc-expected-movment/), and might head up to the top of the channel before continuing lower. Please seek the Lord. God bless. Christopher."
NOTE: LINK DOES NOT WORK!

As posted on Z3News 16/7/2021 "Hi Z3, in dreams this morning I saw a BTC move going up to $33,250 and I exited, but the move continued up to around $35,250 (another 2k), is what I saw. I saw in another dream the figure -0.56 ETN. I believe this is about a big drop for ETN, after it moves up. I shared a target of $0.488 before for ETN, I believe the move over 30 cents may be as high as $0.60 potentially, therefore the drop of $0.56 would take ETN very low back down, which is consistent with the dream I had where I saw ETN move from $0.30 to $0.00513. I saw in a vision $21,240 in red which I believe is BTC. I also saw some visions of some big uptrend with a lot of green candles. I believe we may be heading to the $30,500 figure I saw for BTC, and potentially reversing near there and heading up to 35k. Please seek the Lord. God bless. Christopher."

As posted on Z3News 19/7/21 "Hi Z3 I saw in a dream today a big drop from seemingly around current price area down fast to 30k, rebounding fast up to around 32k, then dropping fast back toward 30k it got close and the dream cut off. This goes with the dream I posted earlier about seeing the price crashing to 30.5k and wanting to go long, but from today's dream it looks like a double bottom so be cautious. Yesterday I saw $33,480 BTC and also $9,233 BTC. I believe we may be heading for this crash to 30k sequence, once that's complete then moving up to 33 to 35k. From there I think the market may roll over again and go lower (maybe 26k?) before the move to 40k. Ill give an update if I receive more relevant dreams. That's my current interpretation, which can and does change. God bless, Christopher."

As posted on Z3News 24/7/21 "Thank you for sharing James. I had a dream a couple of days ago about BTC dropping to 31k and rebounding up to 32.5 or 33k. It seemed to me to be a sequence before crashing down to 30k. I saw yesterday $26,110 and $19,290, and today around $25,590 and I also saw $55,000. Also today I saw $31,300, and $31,500, which could be related to a bounce from near that area. Please seek the Lord. God bless. Christopher."

As posted on Z3News 25/7/21 **DATE CORRECT?** (looks like I forgot to post it here also) "Hi Z3, an update. We crashed to 30k, we went lower with the lowest wick to about $29,300, before rebounding and we are currently at $31,561. Praise the Lord for showing me this sequence, though I didn't know it was going under 30k that far. Now the price already dipped to 30k and went under. When I saw the price rise up, then I saw it trading sideways at 32k and drop towards 30k. I don't know if it went up higher before trading sideways at 32k and dropping. Heads up we could go up higher than 32k, I have some figures around $33,400, one today of $34,968, the earlier dream of a move from 33k to 35k. It is possible we go higher before dropping back to 32k, trading sideways, then finally dropping towards 30k. I clearly saw the price drop from the 32k area towards 30k. Now the drop to 30k was cut off in the dream so I don't know how far it will go. I saw in a dream today $27,400 and $40,700 next to each other, and I have an older figure of $26,800. It could be that after this rise, we crash to 30k and lower possibly to 27k, and this might be the beginning of the rise to 40k. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 25/7/21 "Hi Z3 I saw in a dream this morning seeing the BTC price crashing from seemingly around the 34k area which was the price when I had the dream. I saw a chart which looked like the similar chart of the price at the time (not completely definitive as I didn't see numbers) then I saw the price went down to 29.3k and the dream ended. I saw this move but didnt see whether there were ups and downs on the way down. I mentioned about a move from 33.2k to 35.2k on 16/7/21 and warned again 3 days ago we could head to 35k as I saw a figure in high 34k. I am looking for a turn around soon then heading down to 30k. I believe this will be at least to 29.3k, and possibly lower as I shared before figures in the 26k range. Please use stop losses if you are trading futures as interpretation of sequences is difficult. God bless. Christopher."

As posted on Z3News 27/7/21 "Hi Z3 I had some dreams to share. Please seek the Lord on the sequence and timing. Yesterday in a dream I saw the BTC3S price was $47, then something about going long. Today I saw in dreams BTC price of $16,000. After this I saw $42,000. Then I saw $30,000. When I shared about seeing $55,000 a few days ago, I saw specifically the chart of the price at the time, then on the chart where it reads the price it suddenly read $55,000 (approx) with two $55,000 on top of each other, and I was shocked. I don't know if it implies we are heading there or not, or if the double stacked $55,000 means its more significant or something else. Please seek the Lord. God bless you. Christopher."

As posted on Z3News 28/7/21 "Hi Z3 I had a dream this morning of seeing BTC push up to 42k with large huge candles and the dream ended. I assume it will go there soon. There is an old top of $42,300 which would be a resistance, something to watch for. God bless. Christopher."

As posted on Z3News 30/7/2021 "Hi Z3, I saw in a dream this morning the figure $41,700. Later in a dream I saw the figure $25,700. I believe that is for Bitcoin (BTC), and these ranges have been shown to me numerous times. God bless. Christopher."

As posted on Z3News 1/8/21 "Hi Z3 I saw in a vision this morning a drop in BTC price, and seeing something similar later. I didn't see the magnitude or timing. Then later I saw in a vision $43,800. We may be going higher than 42k. God bless. Christopher."

As posted on Z3News 2/8/21 "Hi Z3 I saw in a dream this morning the figure $16,000. I believe that is about BTC. Later I had a dream seeing the BTC chart and the current price was about $53,300. I now have seen numerous figures in the 53-55k area, the 26-27k area and 15-16k area. Please seek the Lord regarding sequence and timing. God bless. Christopher."

As posted on Z3News 3/8/21 "Hi Z3 this morning before I woke up I had a dream where I saw the BTC price crashing very severely, continuing to go down. I didn't see the price it went to, but I assume towards 30k at least. I don't know exactly when it will start. God bless. Christopher."

As posted on Z3News 5/8/21 "Hi James thank you for sharing. I had some dreams recently I want to share. Yesterday I saw $49,853. I saw two figures in low 40k (we moved up from 38k so sharing this late). I saw $21,819. I saw 100k. I saw -$65,329 (like minus symbol). Today in dreams I saw 0.29 (I thought it may be about ETN about the 30 cent plus move). Then I saw $50,500 in a vision. Then I had a dream of the BTC price rising up to 50k, there was a sharp decline but then the price pumped to 62k and I wanted to sell BTC and ETN, and then I saw the BTC price was at 55k. I also saw the figure 71%, describing an increase (perhaps it could be

BTC which would be a rise to 68k, but I'm not sure). Please seek the Lord for the correct interpretation and sequence. Be aware if we move to these higher figures its quite possible ETN could run. As I mentioned some time ago when I got the two buy prices for ETN of 1.5 cents and $0.004 at the same time in a dream, that I didn't know if $0.004 would be reached before the rise to 30 cents. We didn't get down to $0.004 yet, and I believe this occurs near 19k or so. I have dreams showing a major crash, but timing I don't know. We could head up to 50k plus area first, and if we do then watch ETN. Please seek the Lord. God bless. Christopher."

As posted on Z3News 5/8/21Hi James thank you for sharing your dreams and this writeup! I had some dreams this morning I want to share. The first was that I was on Kucoin and saw the BTC price crashing very steeply with what seemed like a single candle. The crash continued and I had thought it was going to stop, but it kept going steadily down to zero. I was shocked and checked my low BTC buy orders but didn't seem like they got filled, but some did. Then I was trying to go long as the price began to rise and steadily recover (quickly though), and I mentioned be careful encase there is another crash. In this dream the price declined quickly but steadily to the point where it seemed tradeable. It wasn't a momentary flash to zero and back up. My order not getting filled (only small part was) suggested to me to raise them up somewhat. In the dream I saw a 0 figure seeming the price went to that, but it somehow it didn't correspond with my order being filled, consider that how you may. Later in a dream I saw $0.096. I asked what it was and saw RDD so that is 9.6 cent RDD I believe. Later I saw $39,130 and $39,358, not sure about these figures as they are close to where we are currently. I also saw $28,492. Then I saw $0.009 RDD price (approx 300% from where it's at now). Then I saw an ETN price of $0.0038 (just under the buy price previously I was given of $0.004). Please seek the Lord. God bless. Christopher.

As posted on Z3News 8/8/21 Hi Z3, I've had some dreams over the last two days, and took some extra time before sharing this time. On 7/8/21 I heard the phrase "Short Squeeze" and saw $0.41 which I believe is ETN. A short squeeze is a large spike in price that is fueled by short positions closing. I saw $35,700 and $34,000. I saw Blockfolio the whole market was red and ETN was $0.005. I heard in a dream "The Black Swan is getting closer". The meaning of black swan is "unpredictable or unforeseen event, typically one with extreme consequences." I saw BTC at $343,000. I saw the BTC chart, I saw a big spike up, then a reversal of the spike going back to where it started, then it traded sideways and dropped rapidly (not sure on $ prices). Today in dreams I saw $0.38 and $0.52 ETN and something at $0.023 (2.3 cents). I've been seeing a lot of ETN prices lately. Its possible it could run soon, but I don't know, I asked about it but wasn't shown anything definitive. God bless. Christopher.

As posted on Z3News 10/8/21 Hi Z3 I want to share some dreams I had recently. Yesterday I saw $33,000 in a dream. I saw a big red candle form downwards on a higher time frame (maybe daily?), this could possibly already be fulfilled from the $46,800 top. In another dream I saw a chart of BTC it was significantly under the smoothed 200ma (so under 33k). I saw $14,790 in a dream. In another dream I saw a big move up over $62,000 but I didn't see where it started from. Today in dreams I saw high end $66,000. I saw $38,900. I saw a short vision of BTC trading sideways and retesting the 0.5 fib at $46,800. Also a short vision of BTC dropping under the 200ma (under approx $45,000). I have seen numerous figures around the 39k area, perhaps there is a correction before moving higher, I don't know. Please seek the Lord regarding the correct sequence and timing. God bless you. Christopher.

As posted on Z3News 11/8/21 God bless and thank you for sharing. I just woke up from a dream and I saw the BTC market moving up from 35k fast with high volume to 50k I believe it was, it was very close and the dream ended. I don't know how far it went down prior, but I saw

it moving up from around 35k. I also saw $0.0092 ETN. God bless. Christopher

As posted on Z3News 12/8/21 Also James I saw a steep drop from 50k BTC area I didn't see how far down but it was a significant sell off, which then the price went up to 62k afterwards and I wanted to sell ETN, then I saw the price stable at 55k. I shared this dream earlier. That decline could be the B wave possibly? I have some dreams to share also from the last few days. On 11/8/21 I saw $73,000 BTC. I saw $0.89 which could possibly be ETN. On 12/8/21 I saw $0.105 and $0.12 ETN. Today 13/8/21 I saw $34,090 BTC and I saw $53,800 BTC. I saw $128,000 BTC. I saw $0.0072 RDD. I saw ETN at $0.31. I saw ETN rising suddenly to $0.50. I saw ETN hit $0.009 and slightly under but go up quickly (not sure when this is). I saw ETN at $0.72. Then I had a dream seeing ETN going up, and next to each major price level were different comments of people who were upset and frustrated they missed out getting in, the price levels were from 5 cents up to 18 cents, there appeared to be a small correction, and the chart kept going up. Some of the comments were like "I can't believe I missed out getting in!", "What! Look at it suddenly go", and other more frustrated comments, as the price kept on rising. I take that as a warning to be careful as possibly the spike to over 30 cents is soon (I don't know how soon, but the Lord told me previously "ETN Moving First". Please seek the Lord. God bless. Christopher.

As posted on Z3News on 14/8/21 Hi Z3, I want to share some dreams I had recently. Yesterday 14/8/21 I saw BTC very near 50k and I was wanting to sell ETN I had. After I sold I saw the chart and it looked like the top was possibly up to as much as 50-53k. After this I had a dream seeing BTC at 18k, with a line drawn with past lows being shown by red arrows showing this was a support level. On 13/8/21 I did see $53,800 BTC. Today I had a dream of a large grizzly bear seeming to attack someone close to me, and I thought the bear was standing ontop of them and I went up to the bear and stabbed it in the side of the neck/shoulder. The bear moved to the side but was unphased and just stood there motionless. I saw the person close to me was not under the bear but was off to the side and was unharmed. They then told me that BTC would go up some first, and to "get out". I believe the drop that happened today was not the real bear move about to come. Later I had a dream that BTC went up to re-test the high. Later I had a dream that ETN had declined to $0.004 and people on Z3 were remarking about it. I saw something about ETN and heard about "next week" and seeing big red candles and crashing. I also had a dream about BTC to zero. Early in the night I had a dream I saw myself holding a huge fish that I had caught, it was like the size of the fish you see on the show River Monsters, so big you normally physically couldn't hold something so heavy. Fish has been shown to me before as crypto and price related (fishing from the bottom ETN after 3rd wave). This dream I believe may show me catching a huge fish, possibly meaning BTC as it flash crashed to zero, that would be a huge catch indeed! I recommend varied price low buy orders for BTC. At the moment I'm thinking we could go up and re-test the high, perhaps go as much as 50-53k before a big bear move. Otherwise if I'm wrong about that we could start the bear move earlier. My bear dream reminded me of Hoyoung's bear dream he had recently. I had a dream on 8/8/21 where I heard "August 18" as I saw the top of a crypto move. I didn't share this immediately as I wanted to pray more about it, but we are coming closer to the date, and my other dreams suggest a possible top soon, so I thought I'd share it, but I am not sure about that dream. God bless. Christopher.

As posted on Z3News on 15/8/21 Hi Z3. I had quite a strong dream this morning. In the dream I was sitting at my computer. I have a ticker widget at the top of the screen which shows the BTC price and ETN price. All of a sudden I saw the ETN widget say $0.42. I hesitated for a moment and then looked closer to make sure I wasn't reading it wrong. I immediately went to the exchange page. I knew ETN was still rising and I sold my coins. After I sold I saw a chart

of ETN with two peaks touching or almost touching $1. I was shocked it went up that high. I don't know the timing. Earlier in the night I saw $53,300 BTC and $53,260 twice. God bless. Christopher.

As posted on Z3News on 18/8/21 Hi Z3. This morning I had a dream of seeing 1913 in green. At the time I checked the BTC price, if that's indicating a rise it would be a rise to 48k. I saw $56,000 BTC. Also I had a dream about shorting from 51 to 56k BTC. That's quite a range given I suggest you seek the Lord regarding your approach. I also saw 35k BTC, and $0.068 ETN (6.8 cents). Yesterday I saw a move down to 36k, and in another dream I heard the phrase "We have to get to $24,500". God bless. Christopher.

As posted on Z3News on 19/8/21 Hi Z3 I had some dreams this morning I want to share. I saw BTC3S at $8. I saw ETN back up around 1.85 and also 1.95 cents. I saw $38,800. I saw $35,000, $23,000, something about technical analysis to $21,000. Most recently right as I woke up I saw a big red candle plummet down on the 5 min BTC chart from around 44.5k going off screen, fully appearing to break down from the upward channel we have been in. If we were heading up I thought this channel would hold. I am thinking we could move lower, and my recent bear dream is possibly active, and I don't think it was a harmless bear because the way my loved one spoke with seriousness about getting out, but that it would rise some first (which it did), and it was a really big grizzly, if it wanted to attack it could. I posted recently about hearing about next week and seeing ETN crashing but I'm not sure if there's more to it. I thought we may try 50k before going down but I'm not so sure now. My other dream of 35k to 50k in a big move is something I'm keeping in mind, and the lower ETN figures I saw. Regarding August 18 seeing the top of a crypto move, as we ticked over to 12am last night and began the 18th of Aug ETN was at 1.89 cents which is very close to its recent high, and has declined since then. I don't know if its applicable to ETN or something else as I wasn't sure about it when I shared. Please seek the Lord regarding your approach. God bless. Christopher.

As posted on Z3News on 20/8/21 Hi Z3, this morning in dreams I saw BT3S at $10. I saw $0.94 ETN. I saw BTC 15 % down, and when I saw this and woke up BTC was at $44,700, so 15% down is $37,995. I saw in a clear dream a close up shot prominently showing 3 bars of 1kg silver in the air as they were rotating around slightly. I believe this is about buying silver. God bless you. Christopher.

As posted on Z3News 21/8/21 Hi Z3, some dreams to share I received today. I saw $50,500 BTC, $50,656, and $50,700. I saw $0.026 (2.6 cent) ETN, and 2.7 cent, 3.0 cents, 3.4 cents. I saw ETN at 2.4 cents with BTC at 45-46k and another dream of ETN at 3 cents with BTC high 45k. I saw there would be a drop and it would be to 37-39k area. I believe this correlates with my dream of seeing the rise to 50k, sharp drop, then rise to 62k. I believe we will move to 50-53k area and crash to 37-39k and then rise again to 62k. Please seek the Lord. It appears based on my dreams ETN was rising after the drop lower, and I have an old target of 4.5 cents for ETN which seems likely. Targets for exits I've been shown is around 50k area, 62k, (short 51-56k range) and entry 37-39k, but seek the Lord for your approach. God bless. Christopher.

As posted on Z3News 22/8/21 Hi Z3 in a dream this morning my view was under the ocean seeing a huge amount of sharks swimming around for a few seconds, and it ended. I'll attach an image of roughly what it looked like. Seems bearish to me. May come into play soon. God bless. Christopher.

As posted on Z3News 23/8/21 Hi Z3, this morning I heard in a dream a story about 5 bears and 4 attacked and one circled around. Please seek the Lord. I don't know when it will be active. I

also saw this chart pattern (see image). God bless. Christopher.

As posted on Z3News 24/8/21 Hi Z3. This morning in dreams I saw $54,080 BTC. I saw BTC moving under $37,125. I saw RDD at $0.016 (1.6 cents), and at $0.011 (1.1 cents). God bless. Christopher.

As posted on Z3News 25/8/21 Hi Z3, in a dream this morning I was shocked to see the BTC price at 12k as I didn't think it would go that low. I've seen plenty of lower numbers without being shocked in the dream of seeing them. I think that means the 12k is unexpected. Another possible interpretation of the 5 bears and 4 attacked I heard is that each bear is $10,000 points and 4 bears is a $40,000 decline, with the meaning of the 5th bear circling around I'm not sure. I'm not saying this is a definitive interpretation, but I wanted to put it out there as a possibility. Also, when I saw the dream of a crash from 50k and a rise back up to 62k I don't know how severe or how far it went down in between. Please seek the Lord. God bless. Christopher.

OTHERS:

27/7/21 Colton

Hi Everyone, so far Christopher was right about the megaphone pattern. We have seen lower local lows and now higher local highs. I believe the $20k and $50k BTC levels he has seen are confirming more megaphone pattern. Also I've been thinking about these 3 insights and wanted to remind everyone:

1) James seeing short term moving average passing above the long term moving average and then a dump. Are we in the first stage right now?

2) Silent Warrior sharing the line with two distinct up cycles and low cycles. I believe we could be in the first up cycle (or hill) now but I'm not sure how high we go. Perhaps to the $50k mark on this run? Perhaps the $50k mark is the 2nd bump and we top out around $40k on this first bump (in line with megaphone pattern). This also confirms Robyn's Doge movements below.

3) Robyn from Fireside grace shared with me on the phone a few weeks ago about Doge movements: "buy in the teens, then sell over 25 cents. Then buy in the teens and sell over 33 cents. Then buy in the teens and sell before 90 cents. Then a huge market crash to very low levels for some time" (crypto winter?). Then blast off in 2022. So far the first buy, sell, and buy are complete… so is Doge on it's way to 33 cents right now? If so, I would assume BTC may climb to $50k. If not, then maybe we go back to another "buy in the teens" opportunity.

The Lord gave me a dream of 22 cent Doge a few days ago when it was at 19 cents. I don't know if this is a top or just showing me the direction as I was praying the night before about Doge prices.

Bo Polny expects upward crypto movement until August 5th. Bo and Robyn both expect August/September for the summer bull run to new all time highs. Bo does not predict the crypto winter yet. Robyn (and I believe Emmanuel Johnson also) have confirmed the crypto winter for fall/winter of this year 2021. Both of them have also confirmed once the dust settles with regulations then cryptos go to the moon by mid 2022.

Robyn told me that in August he believes XRP SEC lawsuit settlement will be announced. He

saw XRP go to $12, then retrace, then go to $50. He thinks the $12 range will be this year likely in August/September.. Maybe the $50 target as well. There are also multiple confirmations of BTC flash crashes and XRP dropping to 18-30 cents VERY FAST before blasting off upwards. I believe we may need to have buy orders in Ku Coin (still traded there) if we want to catch this dip. Perhaps this XRP dip coincides with a BTC flash crash or one of the BTC price targets in the $20k area.

My best guess is that by mid August cryptos will be pumping and the XRP settlement will be a huge bull flag. There will be at least 1 great buying opportunity for alts before that but it will likely be brief. If we keep pumping from here, I expect Doge at 33 cents and BTC at $50k. If we fall from here, I expect BTC at $30k or less. Perhaps the brief XRP crash coincides with our low alt buy targets that are about 50% of today's prices:

LTC under $70 (sell $700 to $1,000+?)
DGB under 3 cents (sell at $1?)
Doge under 20 cents (sell at 90 cents?)
XRP under 30 cents (sell at $12?)
ETN under $0.004 (sell at 30 cents to 60 cents?)
THETA and ZIL I'm not selling as they are staking for me 🙂

Lastly, remember we are expecting ETN "goes first" and DOGE to "lead the alt coin rally". There was also a revelation of the order that 3 coins will spike… could someone help me remember what that is? Was it ETN then RDD then XLM? Or maybe LTC was in there? If we see the price of silver spike then perhaps we can anticipate cryptos following shortly after.

Please take this to the Lord in prayer and let me know what you guys think!

Sincerely,
-Colton

1/8/21 James Bailey

Thanks for the update Christopher. I also saw BTC in a dream last night. I was watching a price chart as it was dropping fast into the $19,000 range. I did not get any insights into timing but I don't think this is very soon.

21/8/21 SW

Hello everyone, I hope you all are doing well. During my prayer time today, God told me to be prepared to short the crypto market and to get ready to buy DOGE coin. This correlates with what others have posted recently. 1. CH comment about BTC 50-53k top (8/15) 2. CH comment about BTC 50k top, then a sharp decline (8/4) 3. Fireside grace's comment about DOGE declining from 33 to 19 cents (8/20) 4. CH comment about 35k and 24k BTC (8/17) I believe we all must be VERY careful at our buying price for shorting and MUST consult The Lord about it. I believe this phase will be a fast turnaround before my 100% market increasing dream is fulfilled at about 60k. As of now, it seems we are about at the A phase, followed by a drop in prices to a B phase (for shorting), then followed by the high rise up to 60/70k BTC (C phase), then another drop (D phase). Praying for you all, SW

25/8/21 James Bailey

Today I saw $2.12 and I knew it was the price of BTC3L which is currently about $1.20. I did not see any timing but estimating BTC would have to get up above $60,000 for BTC3L to reach $2.12, so my current thinking is this comes after the rally up to $53,000 (possibly a little higher) that I saw two days ago which is followed by a big drop (possibly to $37,000-$39,000 based on prices seen by Christopher Harris). So $2.12 seems to be confirming an even larger BTC rally following that drop.
