ABSTRACT

Abstract in English. This is a sample abstract written in Times New Roman, font size 12, with line spacing set to 1. It is italicized to match the required formatting for a manuscript template. The abstract should briefly summarize the key points of the paper, including the purpose, methodology, results, and conclusions. Keep the text concise, clear, and no longer than 200 words. Keywords are typically one- to three-word phrases that are used to indicate the main topics of a submission.

***Keywords**: Keyword 1 Keyword 2, Keyword 3, Keyword 4, Keyword 5*

บทคัดย่อ

Abstract in Thai. This is a sample abstract written in Leelawadee UI, font size 12, with line spacing set to 1. It is italicized to match the required formatting for a manuscript template. The abstract should briefly summarize the key points of the paper, including the purpose, methodology, results, and conclusions. Keep the text concise, clear, and no longer than 200 words. Keywords are typically one- to three-word phrases that are used to indicate the main topics of a submission.

***คำสำคัญ:** Keyword 1 Keyword 2, Keyword 3, Keyword 4, Keyword 5*

**Author 2 is the chairperson of the Department of Marketing at [University Name]. Email: [email@example.com]

INTRODUCTION

This is a sample introduction paragraph, written in Times New Roman, font size 12, with single line spacing and justified alignment. The introduction should provide background information on the research topic, outline the problem or gap in knowledge that the study aims to address, and establish the significance of the research. It sets the stage for the study by introducing the main objectives and the approach taken to achieve these objectives, while also providing a brief overview of the structure of the manuscript. There is no word limit for the manuscript content; however, please ensure that it remains within 20 pages.

REVIEW OF RELATED LITERATURE

This section, written in Times New Roman, font size 12, single line spacing, and justified alignment, provides an overview of existing research related to the topic. The review should summarize key studies, highlight relevant theories, and identify gaps in the current literature that the present study seeks to address. By critically analyzing the findings and contributions of previous works, this section establishes the foundation for the research and demonstrates how the study contributes to the broader academic conversation.

Heading

Supply chain risk encompasses potential disruptions or uncertainties that can negatively impact the seamless movement of goods, services, or information within a supply chain network. These risks may originate from a range of external factors, including geopolitical events, natural disasters, economic instability, regulatory shifts, and reliance on suppliers. Additionally, internal factors such as operational inefficiencies, product quality issues, financial difficulties, and technological malfunctions also contribute to supply chain vulnerabilities (Christopher, 2016; Monczka, 2015).

RESEARCH METHODLOGY

This section, written in Times New Roman, font size 12, single line spacing, and justified alignment, outlines the research design and methods employed to investigate the study's objectives. It should include a description of the research approach (qualitative, quantitative, or mixed methods), the sampling techniques used to select participants or data sources, and the data collection methods (e.g., surveys, interviews, observations). Additionally, it should detail the data analysis procedures, including any statistical tools or qualitative analysis techniques applied. By providing this information, the methodology section ensures transparency and replicability, allowing readers to understand how the research was conducted and to evaluate the validity of the findings.

PRESENTATION AND CRITICAL DISCUSSION OF RESULTS

This section, formatted in Times New Roman, font size 12, single line spacing, and justified alignment, presents the findings of the research and engages in a critical discussion of their implications. It should include a clear presentation of the results, utilizing tables, graphs, and figures as necessary to enhance clarity and understanding. Following the presentation of data, a thorough analysis should be provided, discussing how the results align with or contradict existing literature, their significance in the context of the research objectives, and their potential implications for practice or further research. This section aims to provide a comprehensive understanding of the results and to highlight their contribution to the field.

Heading

The risks outlined below were identified through interviews with the logistics team at [Company Name], drawing on their experiences within the current operational context. These risks are classified as detailed in Table 1.

Table 1: Title

Item	Name	Description

CONCLUSIONS AND RECOMMENDATIONS

This section, written in Times New Roman, font size 12, single line spacing, and justified alignment, summarizes the key findings of the research and presents actionable recommendations based on those findings. The conclusions drawn together the main insights from the study, highlighting the significance of the results and their implications for practice, policy, or further research. Recommendations should be specific, practical, and targeted at addressing the identified issues or enhancing the effectiveness of current practices. By providing clear suggestions for future actions or studies, this section aims to guide stakeholders in making informed decisions and improving overall performance in the relevant area.
