

NAME OF CLUB: Science Club

ADVISOR: [Anders Helgason](#)

DESCRIPTION:

Science Club will meet Mondays after school in Mr. Helgason's room (A206). Students will have the opportunity to pursue areas of science that interest them, as well as tackling STEM challenges given to them. Students will also plan and conduct an experiment, or research that they will present at the science fair in the spring (likely in December before break). The science fair judges will consist of a panel of non-science teachers. Students will explain their experiment and results and prizes will be awarded based on their ability to convey what they have learned.

Usually this club meets at the same time as MathCounts. Students may come to both clubs when they can. Students may also choose to come only during seasons that they do not have a sport that they participate in. Participation is fluid. We will discuss scheduling and participation at our first meeting, which will be **Oct 7th**.
