

Tab 1

**Job Title:** EasyA Trading Associate

## About EasyA 🌟

Founded by Oxbridge/Ivy League grads, EasyA is the world's leading Web3 super app with over 1,000,000 users globally. We've been featured in the New York Stock Exchange, BBC, Yahoo Finance and as Apple's App of the Day. Our in-person events attract thousands of people from around the world, and have incubated some of the world's fastest-growing startups backed by a16z, Y Combinator, Founders Fund and many more top VCs.

Our mission is to accelerate the development of Web3 and the overall adoption of blockchain. To do that, we build the tools and infrastructure to make crypto accessible to everyone. We partner with over 350 of the world's best universities (from Harvard to Stanford, and Cambridge to Oxford), forming the launchpad for the latest generation of Web3 as well as AI startups.

Today, startups launched by EasyA alumni are worth over \$4 billion, and EasyA has become the trusted partner of the world's leading Web3 companies like Ripple and Solana, as well as the goliaths like Google and Amazon.

And we're still just getting started...

If you're excited about joining one of the world's fastest growing startups and are passionate about changing the world, this is the place for you.

## About the Role 🖥️

The EasyA Trading Associate role offers a unique opportunity to apply your mathematical, economic and trading skills. You'll help shape and execute EasyA's strategy for capital deployment on exchanges, as well as risk analysis when placing these trades. You will be a key decision-maker and thought-leader, and manage a portfolio directly.

## Responsibilities 📝

In the EasyA Trading Associate role, you'll:

- Evaluate strategies and deploy capital across exchanges
- Manage risk across our portfolio
- Assess and monitor collateral/margin levels
- Stay up to date with the broader macro environment and rapidly evolving economic landscape

# EASY·A

- Develop proprietary tools for tracking, reporting and analyzing strategies

## About you

- 1-2+ years of experience in asset management, hedge funds, investing, or trading
- Strong understanding of trade execution and hedging strategies
- Direct experience building automated trading systems
- Passion for markets and finance
- Degree in Finance, Computer Science, Engineering or related fields preferred
- Excited to learn about DeFi and permissionless protocols

From day 1, you'll be executing independently and will learn more in your first 3 weeks at EasyA than you learnt in your years before this.

## Benefits ✨

- Opportunity to travel to our in-person events and conferences around the world (in just the past 2 years alone our team has come with us to New York, Miami, Toronto, Boston, San Francisco, Los Angeles, Bogota, Paris, Amsterdam, Singapore, Hong Kong, Istanbul, Tokyo and other incredible cities!)
- Opportunity to make your name with one of the world's fastest-growing startups
- 28 days' holiday
- Pension

## Application Process

We move fast! This process takes 1-2 weeks approximately.

- 30-minute initial interview with co-founders Phil and Dom
- Technical assessment and interview (centred around hypothetical trading scenarios and execution)
- Final 1-hour in-person interview

## Additional Info

### Commitment

Full time.

### Technical skills required

- Python/JavaScript/Java skills
- Experience developing trading systems
- Experience managing risk within trading systems
- Comms tools: Slack/Emails

### Location

UK: WFH

## Salary

£50,000-£75,000 per year

PLUS bonus and equity options available.

## 👋 Personal Note From Phil, Co-Founder of EasyA 👋

Heya! I'm Phil, and I just wanted to write this note because this role is such a once in a lifetime opportunity. If you're excited about startups, travelling the world, trading, marketing, business etc, this is the perfect job for you. It genuinely is a very special role.

You'll get access to the most incredible network of founders, academics, students and marketers. Literally all over the world.

Sound too good to be true? Just head to our website and see for yourself. Cities where we'll be over just the next 2 months: Boston, New York, Paris, San Francisco, Singapore, London...

I honestly wish a job like this had existed when I was first starting out.

But I'll also be honest about what this job is not: easy.

If you like the sound of it just because you want to escape the long hours of banking or law, this is not for you. If you're the kind of person who needs to be hand-held, this is not for you. If you don't have attention to detail, this is not for you.

This job doesn't fit into a simple category. We had to label it under Trading Associate. But honestly the best name I can really think of to describe it is Special Ops. You'll be more like a Navy SEAL. You'll need to learn about new topics and stay on top of the latest developments to execute, work harder than you've ever worked before, but also gain the confidence in learning how to do anything under pressure.

And we're happy for you to treat it like being a Navy SEAL too. You can stay with us for 12 months. Or beyond. This is a job where you can grow with us, and you'll have a stake in EasyA's rapid success. Or you can move on after those 12 months and take your new skills with you to your next adventure. Those are the expectations.

Having this role on your resume will be more respected than becoming a partner at Goldman Sachs.

And of course you'll get to work directly with [Dom](#) and [me](#).

So.

If you're reading this, it means you've got all the way to the bottom of this JD. And that means you're excited. You've got EasyA in your DNA. And what does that mean? It means we want to hear from you :)

Email [recruitment@easya.io](mailto:recruitment@easya.io) with your cover letter and CV.
