

Needham Public Schools

Staff and Family Health Attestation

The Needham Public Schools will continue to implement a process through [Ruvna](#) as another layer of health and safety.

This symptom screening increases each staff member's and family's role in attesting to the fact that they have checked in with their child(ren) to see how they are feeling before sending them to school. The attestation is meant to acknowledge that all of us, staff and families, are invested in keeping our schools open for in-person learning.

The attestation process uses text messaging to push out a web link each morning, allowing staff/families to quickly tap their way through health screening questions for the students in their household who will be attending in-person learning on that day. Parents do not need to login to an account or application; text messages are simply pushed out to your device.

Please review this [Q & A](#) to receive an overview of the purpose and process and to understand your responsibilities for this new health and safety protocol.
