PENDING ISSUES		Need	Owner
Dec, 2025	<a href="#">61150-9</a>   Subjective Narrative scale Nar to Doc  This is used for document section identity. Can we again follow the rule that some Nar items have always been Doc and allow that it can still be used for pure nar by some? Will that break anything?	Discussion and Decision	Rob
Dec, 2025	<a href="#">Question from Forum</a> : Is there any plan in the near future for creating Document Ontology Display Names? Also, what is the rule used to build the Long Common Name and Short Name? We are seeing mixed of upper and lower case in both names in the LOINC db.	Discussion and Decision	Anil/Steven

	10164-2 Hx Present Illness (Nar) 11348-0 Past Illness Note (Doc)

## OPEN ACTION ITEMS

1. Task: Inquiry to identify subsets of documents in VSAC
  - a. Lead: Rob McClure/Lisa Nelson
  - b. Date Identified / Reference meeting docs as needed:
  - c. Due date:
  - d. Status:
2. Task: 80582-0 LOINC Document Ontology associated observations panel  
Review the use of the phrase “Clinical document” in each of 80582-0 LOINC Document Ontology associated observations panel used for axis observations -  
Remove that phrase completely. The axis are not clinical documents

## PARKED TOPICS

1. Potential “rules” for DO extension content boundaries:
  - a. We need to include all scale:Doc and not limit to the document ontology set
  - b. We should also include scale:Nar except the radiology and perhaps molpath
  - c. We need to review some of the scale:Nar and consider adding similar Doc (or just change to Doc)

Document Ontology Committee  
Meeting Agenda  
Date: 2026-12-9  
Time: 14:00 – 15:00 pm ET  
Chair(s): Rob McClure

- d. We need to look at notes/documents/H&P that are scale:nom and consider changing to Doc
