

1. Go to [Discovery Education](https://www.discoveryeducation.com).
2. If you need to make a new account, go to the top under “Passcode/Create New User.”

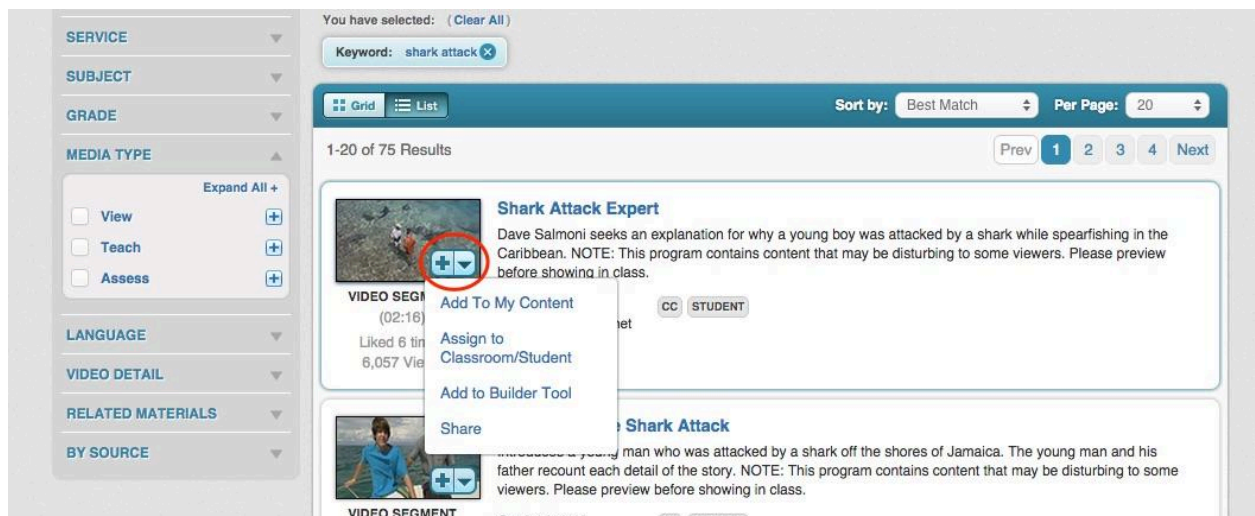

3. It will then ask for a passcode *that is specific for your school building*. Ask your librarian or digital learning coach for the code.
4. Finish registration with your school email address and a password you will remember. If you are already in the system, Discovery will let you know; you may then need a password reset if you are not able to log in with your credentials.

Note: there is currently no easy “single sign in” (SSI) like we have at Shelby County for Schoology or GAFE. Teachers have to manually create their accounts, and passwords will not be automatically updated as they are in Schoology or GAFE. Along those lines, students would still have to make their own accounts first (using a different passcode), and teachers would have to create classes manually if they want to use that feature of DE.

Quick Tour of Resources

There are many resources on DE -- videos are just the tip of the iceberg. There are also text and images as well. If you search and find media that you like, you can easily save it to “My Content” or shortcut to other options by clicking on the plus/dropdown button.

My Content

Not only can you view DE content you have “bookmarked” (see above), but you can upload your own files to a personal cloud library as well.

My Builder Tools

Assignment Builder

Build and store assignments for your students that use Discovery Education curriculum content.

- My Assignments
- Create New Assignment

Assessment Manager

Build formative assessments and view their results by class or by student.

- My Assessments
- Create Standards-Based Assessment
- Create Concept-Based Assessment
- Create Custom Assessment

Board Builder

Create a fun, engaging, digital project with any content using board builder.

- My Boards
- Create New Board

Writing Prompt Builder

Give students writing practice with these images that include composition prompts.

- My Writing Prompts
- Create New Writing Prompt

Quiz Builder

Incorporate video clips into interactive quizzes with Discovery Education Quiz Builder.

- My Quizzes
- Create New Quiz

Once you have created a class (see below), there are multiple ways you can provide material. You can build an assignment to share (a collection of videos, texts, etc. to form an activity), create a quiz, or build a Board. “Boards” are simple but interactive posters (a bit like [Glogster](#)) that you can share with students. Students can also make their own. However, any Boards made by teachers or students can only be shared and seen within DE; they cannot be shared publicly outside the site.

Classroom Manager

The screenshot shows the 'Classroom Manager - Overview' page. At the top is a navigation bar with 'My DE Services', 'My Content', 'Builder Tools', 'Classroom Manager' (selected), 'Teacher Center', and 'Professional Development'. Below the navigation bar is a 'Home' link and the title 'Classroom Manager - Overview'. A welcome message states: 'Welcome to the Classroom Manager – a tool to help you manage your classrooms and students. Create, modify, view and delete classes and students all in one place.' The main content area is divided into two columns: 'MANAGE CLASSES' and 'MANAGE STUDENTS'. The 'MANAGE CLASSES' column contains four options: 'Create a Class from School Roster', 'Create a Class with New Student Accounts', 'Manage Your Classes (My Classes)', and 'Print/Export Your Class Rosters'. The 'MANAGE STUDENTS' column contains four options: 'Edit Student Profile', 'See What Your Student Sees', 'Search Your Students', and 'Print/Export Your Student Roster'. Each option includes a brief description and a 'View Tutorial' link.

Here is where you can create and manage your classes. Remember, classes will not be pre-populated; you will have to create your rosters yourself.

Teacher Center

The screenshot shows the 'Teacher Center' page. At the top is a navigation bar with 'My DE Services', 'My Content', 'Builder Tools', 'Classroom Manager', 'Teacher Center' (selected), and 'Professional Development'. Below the navigation bar is a 'Teacher Center' title and a subtitle: 'Make the most of Discovery Education content with these tools and resources.' The main content area is divided into two columns: 'streaming' and 'Science Techbook'. The 'streaming' column contains a 'CURRICULUM RESOURCES' section with five items: 'ReadyZone: Continuity of Learning', 'STEM Connect', 'Calendar', 'Lesson Plan Library', and 'Thematic Focus'. The 'Science Techbook' column contains one item: 'Meet the Faces of Discovery Education'. Each item includes a brief description and a 'Go To' link.

For those wanting pre-made content around video and other DE resources, this area may help. Note the Calendar function, which finds material tied to a specific date ("this day in history..").

- Mount Kilimanjaro Virtual Field Trip Today!

Hosted at St. Vrain Valley School District, the Virtual Field Trip will provide students with the opportunity to hear about Mount Kilimanjaro first-hand from educators who climbed the mountain. They will learn about collecting environmental data on the mountain's six biomes and meet a NASA Jet Propulsion Laboratory scientist to discuss the SMAP Mission, a [More...](#)

DE Basics

Introduction to Discovery Education
New to Discovery Education streaming?

DE Basics will guide you through the fundamentals of Discovery Education streaming and help you

Digital Media Integration

Get Ideas on Integrating Digital Media

The possibilities are endless when it comes to integrating Discovery Education streaming into your curriculum or presentations.

Here was a surprising find: in this section, not only does DE help with information on how to navigate their site, but it also has a deep library of resources to help learn more about various teaching topics separate from their content-specific material. For example, there is a series of materials on how to flip your classroom. I highly recommend taking a peek at their S.O.S. (Spotlight on Strategies), which can quickly teach you general strategies on how to better manage and assess your students.

FEATURED SOS

Now Screening

Now Screening is a teaching strategy that encourages students to make connections at the beginning of and throughout a unit. This strategy is built upon the use of images from Discovery Education, displayed on students' computers or devices.
