Hey! My name is Joy, and I am a non-binary, neurodivergent person who is passionate about art and design! I love creating in a digital environment, as well as traditionally. Sketching my art on paper, then scanning it in and fleshing it out digitally is fun for me! I hope to work for a company that is as passionate about art and designing as I am, and is willing to let me work mainly at home as well.

PORTFOLIO

My portfolio is here: <https://www.techynatureportfolio.info>
