

The Quickest Way I Know To Hit The
Forex Markets For A Cool Million,
Without Spending Endless Hours
Watching Price Movements!!!

See How Professionals Get The Winning Trades
Brought To Them... One Simple Position At A Time

How is that trading thing going?

If you are not on track to make a million in the next year or two, I have something for you.

You will thank me when you finally hit the milestone every great trader dreams of you.

But first, allow me to get you out of your misery.

New ground rule, **Stop What's Not Working.**

If you are spending all day in front of a monitor, you need to stop!

If you are trading on emotion, fear and greed, rather than a proven, logical approach.

Time to stop!

See, I was just like you once.

Before I discovered the deep, dark secrets underlying the forex markets.

I spent all my days in front of a giant 24 inch monitor.

The more I tracked prices, I thought, the sooner I'd earn my fortune in the markets.

And yet the reality could not have been more different.

The more I watched markets, it seemed, the worse I did!

I lost money on more forex positions than I'd ever care to recall.

Maybe you've thought it's your lack of conviction that's killing your trades.

You enter a trade, then, hours later, you exit without a profit.

I've Been There.

Yet, even when I made the trades I was entirely sure about, I rarely broke even.

I'd jump in head first, sure I was onto a surefire bull move that would double my money.

If I had a penny for every time I watched every "sure" trade flop and fizzle away...

So what turned it around for me, and how could you make it work for you?

I came upon a SYSTEM.

A definite, system, that works for the forex markets, even for beginners like I was then.

If you had such a SYSTEM, giving you winning trades throughout the day, would you:

- **Make more money than you do now?**
- **Would it make you less stressed about trading the markets?**
- **Would you have more time to enjoy the other parts of your life?**
- **Would your investment goals get that much closer than ever before?**

These are just some of the things that have happened for me since I stumbled, almost accidentally so many years ago, on my "system." But first, a word about me. Let's trace my life back to that fateful day in June 2006 when I made my first foray into the forex markets.

The world sure was different then, before the Great Crash, but the nature of markets has hardly changed...

-----2. STORY-----

My name is Dean Mellor.

I entered the markets in 2003, three years before I "discovered" forex, with goals that any young man would be proud of:

I wanted to make at least a million in my trading.

I wanted to become a world famous trader.

I wanted to learn and master the secrets of the "masters of the universe."

I had a good, steady job but like so many others before me in the markets, I wanted more! I knew I could do so much more than I was then.

The markets provided a natural avenue for an ambitious young men with big goals like I had.

Looking back on it now, it's almost funny how unrealistic and unprepared I was to actually enter the markets.

Sure, looking back now, I did make some money, plenty of money in fact.

And, I guess I did become "famous" in a way, but definitely not world famous!

And sure, I did learn a few "secrets", secrets I'd like to share with you here today.

But all this took me the greater part of 15 years...

15 years of my life, the first part of which I barely survived!

For 3 long, brutal years, I took just about the worst beating you can take from the financial markets.

I'm talking 90% plus losing positions.

Months of little to no trading profits.

Several times, my trading accounts were completely wiped out.

Relying on a high school friend to pay my heating bill in the cold of winter. Because I had lost everything I had in the market!

Beyond the shock of the financial loss, for me, the hardest thing was really the embarrassment.

Being dependent on other people made me realize I never wanted to be in this position again.

Being on the wrong side of the market and losing EVERYTHING.

I had to figure out a way to not make this happen again.

I don't know about you, maybe what drives you is different.

But I hope you never have to go through what I went to in order to master the markets.

I resolved that if things ever turned around for me, I'd pay it forward in some way.

Fast forward to 2006. The year everything turned around for me as a trader.

I had started out mainly as a stock trader, you see.

But I soon gravitated to the forex markets due to their larger potential for leverage.

Whereas a stock broker would only give me a leverage of 2:1, the forex shops were willing to let me trade a position 25 to 50 times larger than my risk capital.

Thanks to those forex brokers, it was in the forex markets that I struck gold!

My early misadventures in the markets actually helped me, because this time I was a little smarter. Due to my early losses, I was better prepared.

I knew not to fall for the first shiny new trade without having a proven rationale for entering it.

I was much more cautious.

And I had carefully studied the anatomy of a winning trade. I had long learned the importance of prudent risk management and position-sizing, fundamentals any trader needs to win and maintain a long term winning position. Besides that, I had discovered a few “secret innovations” of my own that made the quality of my trade ideas better than ever before.

And with the short term signals that came to compose my “Taurus” method, the basics of a winning system began to emerge.

Unlike me, you can have this trading arsenal and complete system in your hands today, and you don’t have to slog through 15 years of trades like I had to do to get it...

MY COPY SUGGESTIONS FOR IMPROVING YOUR MAIN WEBSITE AND MAKING IT CONVERT BETTER:

<https://fxtauruspro.com/>

PART 1: What You Are Doing Right:

The idea of a special-access program is intrinsically sound. It can stimulate interest and get customers' attention.

PART 2: How To Improve It:

Your copy is not consistent with the image you are trying to project. Having first hinted that your program is exclusive, you then turn around and basically offer the visitor to sign up to your list. This reduces conversions. You need to be consistent.

Here is another "closed access" program I like, by internet marketer Glen Allsop

<https://www.marketinginc.com/>

Notice how at the top of the page he lists out the promise:

"How to Build a Highly-Profitable SEO Empire"

And then elaborates why you want this, and has credibility from news mentions of him.

You should explore similar.

Also, look at the TypeForm that Glen is making available for signing up. This is unusual because few people are doing it. The customer does not feel like he is being "marketed to", it really does feel like they are getting special access to a special program, exactly how you want to make them feel.

Here is my suggested copy to improve your landing page below:

PART 3: THE NEW COPY FOR YOUR MAIN HOME PAGE:

The Amazing Secrets Of The Forex Indicator That Dominates Short Time Frames, And Makes Money In Any Market

Dear Friend,

As you can see, the program door is currently closed.

Why?

Those inside know a good thing is best kept secret.

But because you are here, I don't intend to disappoint you completely.

Not after you came all this way.

The good news is access to FX Taurus Pro opens every 3 months.

Between then, there's a brief wait while we work with the hand-selected group who have already made it inside the program.

If this program is for you, it will change your forex trading, and your life!

Please complete the form below to be notified as soon as our doors open up!

Additional notes:

You can also include a TYPEFORM instead of a normal web form, here is where you can create typeforms:

<https://www.typeform.com/>

The advantage of a TypeForm is that fewer websites are using them, so they have a novelty that, as noted above, does not "feel" like marketing. This can help you sign up more people!
