

SALE IS CLOSED. THANK YOU!

FUNDRAISER: Capella treatment. Goal is reached!

UPDATE:

GOOD NEWS:

CAPELLA MADE IT THROUGH HER TREATMENT!

The treatment was not an easy one. A rocky road that had many ups and downs. Sadly, Capella managed to contract a panleukopenia virus (even though she had her shots done) during her stay at the vet-clinic.

That was a disaster that unfortunately could happen and did happen.

But thanks to the efforts of the vets Capella managed to pull through.

I had to get one of my cats to donate blood for her.

While she did fought the disease that mean she can not go back home to join the pride.

As it is believed that cats stay contagious for panleukopenia for a year at least.

That would mean that Id need to find a foster home that is ready for such a cat while Id be looking for a forever home for Capella.

Here comes more good news. Sad, bittersweet, but ultimately the best possible.

The vet, who basically is responsible for keeping little white princess alive offered to take Capella.

So while I am heartbroken as Ive got attached to this lovely bean, Im happy that she will go to the home that will be the best for her. Considering her fragile health and connection the kitty and the vet established over these 3 months.

So this is a story with a very happy continuation. <3

And that all is thanks to you all, who participated in this sale!

Hello, awesome people.
Maybe some of you are familiar with the situation already.
One of the two Bengal kittens that were abandoned by their “human parents” in favor of safer
life, Capella, got very sick.
Darling bean in question:

She was diagnosed with FIP. The treatment that she gets seems to work (thanks God). And it

is great.

But the meds are extremely expensive and a full treatment plan should be completed. It can not be interrupted.

Normally I'm more than capable of taking care of the animals that I've decided to rescue/adopt/shelter. But I did not intend to keep the bengal sisters and agreed to temporarily take care of them until they grow up a bit to be good enough to take their vaccine shots and fly after their "parents". But things went sideways.

Kittens came with infections, I did not get a penny of compensation for their vet bills. The situation went ugly and long story short, I've ended up with two cats I was not planning on having.

And with all that is going on in my life, including 11 other cats (9 of them are rescues, half of them with their own chronic or recurring issues), bedridden mom (had a bad stroke case) and two senior dogs I'm not exactly able to cope on my own right now. There will be better and brighter days, but an ill bean can not wait till then.

THE GOAL IS: 3 000 USD

You can add two physical conditions/health conditions to your custom:

You can replace one physical trait from the custom chart with physical condition/health condition from the list beneath.

And you can add one more trait on top (regardless physical traits from the chart)

So you can get:

2 physical traits + 2 health conditions

3 physical traits + health condition

! ONLY TWO CUSTOMS WITH HEALTH/PHYSICAL CONDITIONS per DA-member.

Enlarged heart + 5 speed
Ermine fur + 5 to conformation factor
Soft gaits + 5 to movement factor - 5 to speed
Overgrown muscles + 10 to strength factor, - 10 to stamina
Hard rock bones - Give a reroll for some injury rolls in shows, partially protects cubs from risk of having fragile bones
Joints of steel - reduces chances for weak joints problems to happen (both for the cat itself and it;s cubs)
Iron lungs - + 5 to stamina factor (mitigates the PH condition in offspring)
AMH-1.2 - mutation - Multiply bonus from dry foods by two times (x2)
Polydactyl

+ 2 stats to each category - 50 \$ (total 20 points)

+ 2 stats to each + random 5 points booster - 70\$ (25 points total)

Only one stat buster per custom.

As this is the sale, dedicated to a real life cat in trouble, illusive [Lucky Charm](#) is back.

20\$ - Lucky charm - 2 charms per DA-member limit.

unique item that will allow you to revive one cub in the litter if it was rolled stillborn or deceased due to

various genetic abnormalities. Lucky charm should be applied to a cat. Due to the unique nature of the item, it can be put back in the bank if a cat that had it was marked as deceased. In any other circumstances the item follows all normal rules of permanent items.

This is a unique item that won't be present in loot pools in the game. Only way to obtain it is to buy it here and now.

CLARIFICATION: Item applies to the cub that was rolled as deceased. The item stays with the revived cat until its death. If such a thing happens, you can take the item back and use it for another cub that caught an unlucky death roll.

The reason for death does not matter. Be it WW on black or BPD. Cub survives (think of it as intense vet assistance) and lives a perfectly healthy life.

The item does NOT affect cubs or litters born from the cat that has the lucky charm.

The item should be applied to the cub no later than two months after it was rolled!

SHEDU IMPORT AFTER YOUR RL CAT

You can recreate your real life cat as a shedu.

The price for these imports are set and will not differ no matter which genes you will need to get the look-a-like big kitty.

20\$ - 2 per DA-member (available builds: classic shedus, asians - maneless, longhair, bobtails, folded ears, big ears, curved ears, heterochromia, scars and injuries ARE possible to be added (you will get auto damage token for this)

NOTICE, however, that fancy mutations such as silky mane/full mane etc are not available, as cats do not have such traits in real life)

IMPORTANT - Cats that you are going to recreate should belong to you! Do not try to sneak in random photos from the internet of cats that you like.

If your cat is complex in color and is in need of rare genes to be recreated, such cats can be imported as sterile or with low fertility health issue.

SHEDU IMPORT AFTER YOUR RL PET

30\$ - 1 per DA-member (available builds: all (except arabians). Be prepared that most likely such a cat will be imported as infertile due to restricted build/complex genetics.)

OCTOBER FERALS

You can order more october/halloween ferals - all the same conditions, but post your request under this sale log (custom LOG) listing the type of feral (1,2 or 3) and it's price.

Lined + flatcolour or painterly. Full body + accessories .

DINOSAUR DESIGNS/IMPORTS

Some of you may know that in my free time I'm working on a dino ARPG project.(Breeding sim + survival + Fast evolution. No JP vibes/abandoned islands and genetic modifications)

At this time it is too early to even go into Alpha-stage.

But this thing will come alive at the end of next year.

And with this I offer you OC dino-characters designs (pre-made and created on order) that will be compatible with the dino-ARPG project genes/system/species.

While you get them now as your OCs not bound to anything, they will be created on dino-ARPG lines, and you will be able to import them into ARPG without any additional payments/hurdles to jump. You will also get an item package to go with them as a token of gratitude for the support in a really rocky moment.

Examples of the pre-made designs:

These can be bought too ;)

Pre-made ones: 10 USD

Semi-Custom: 15 USD

(here you can order the color scheme, and describe the overall look. Most of colour combos and stripes/spots are possible ;)

THE FUN PART:

You can also order a design for any dinosaur you like.
A lineart will be created and... that dino species will go into the ARPG right from the start.

With the start you will get a gratitude bundle of items and skill points for your dino.

Before that you can use your import as you like wherever you like.

New species lineart + design: 50 USD

CHANGE COFFEE FOR RDS

If you just want to help the case, you can toss a coin here: Any amount you like.

PAYMENTS & PAYMENT METHODS

IMPORTANT: Refunds are not an option. If you bought something and then decided you do not need it, you can not return the thing.

Payment plans are possible for trusted members for every category, except for instant cubs. (this time short term plans only, sorry, 2-3 months at best, unless your order is 500USD+) Breeding slots will be available during 12 months from the date of permission publishing. Keep in mind that goods you are paying for will be available only after the payment is fully done. Opting for using a payment plan you should be aware that a refund is not an option at any time.

You can extend the payment plan period in case of unexpected complications. Just be sure to contact Templado and inform them about it.

Payment methods: DA points via gift, Paypal or Boosty.

All prices are listed in USD (USA dollars). Please, note that.

IMPORTANT! Please, do not proceed with any payments before you get a confirmation of your order.
