

Xtra Math

<http://xtramath.org/>

Grades 3-12

Requesting Teacher – Matt Brenner CES

XtraMath uses timed quizzes and practices to encourage students to answer the questions as quickly as possible combined with spaced repetition to efficiently develop recall. The three-second threshold is carefully selected to be long enough to type in a recalled answer but not long enough for the student to comfortably enter a counted or calculated answer. Students should have already learned the basic counting or calculating strategies and be able to solve the problems without time pressure before starting to practice an operation on XtraMath.

Red Flags

First name and pin

Tracks/stores student progress on mastering Math facts

Fields Required: First name, Pin number generated by website

Student Login example: John Doe-

First name: John. Pin: generated by website

Notes: Share student login info with parents since student data is tracked and stored.
