PROFESSIONAL SUMMARY

Senior Software Engineer with professional experience in JavaScript/TypeScript and .NET ecosystems, specializing in React, ASP.NET Core, Node.js, and comprehensive web application development. Proven expertise in building scalable, high-performance applications with strong proficiency in frontend architectures, RESTful API design, and CI/CD implementation.

PROFESSIONAL EXPERIENCE

Royalti.io

Senior Software Engineer

Lagos, Nigeria

June 2023 - Present

- Led frontend development for a rapidly growing SaaS platform using React, TypeScript, and Next.js
- Architected and implemented scalable UI component system using Tailwind UI and Shadcn
- Established CI/CD pipelines using GitHub Actions, improving deployment efficiency by 40%
- Collaborated closely with product and design teams using Figma and Slack for seamless iteration
- Implemented monitoring solutions for frontend performance tracking
- Reduced bundle size by 15% through code splitting and performance optimization
- Mentored junior developers and established coding standards for the team

Zojatech

Software Engineer

Lagos, Nigeria

January 2021 - May 2023

- Developed full-stack applications using React, ASP.NET Core, and SQL Server
- Implemented microservices architecture using .NET Core and Docker
- Built and maintained SaaS admin dashboard serving 1900+ users using React and TypeScript
- Designed and optimized database schemas across SQL Server and MongoDB
- Implemented data visualization features using ApexChart, increasing user engagement by 50%
- Led the implementation of Tailwind CSS, improving development velocity by 30%
- Established monitoring practices using Application Insights and Sentry

Babyivyleague

Software Engineer

March 2019 - January 2021

- Created a library of reusable UI components focusing on scheduling interfaces
- Implemented responsive design system ensuring consistent user experience across devices
- Developed style guide documentation for maintaining design consistency
- Reduced UI inconsistencies by 40% through systematic component implementation

PROJECTS

Enterprise Resource Management System

- Architected and developed a scalable ERP system using .NET 7 and React
- Implemented domain-driven design principles with CQRS pattern
- Integrated with Azure services for cloud infrastructure
- Achieved 99.9% system availability through robust error handling and monitoring

Nagai Agro
Software Engineer

Lagos, Nigeria
February 2023 - April 2023

- Pioneered the development of a system enabling seamless agricultural transactions, demonstrating full-stack proficiency and innovation, emphasizing UI/UX design and coding standards.
- Conceptualized, developed, and launched a comprehensive application, showcasing end-to-end project ownership for 100+ existing users, ensuring compatibility with various JavaScript frameworks and back-end ecosystems.
- Designed and implemented a feature-rich admin panel, emphasizing efficient control and management capabilities, contributing to a fast-paced startup environment with a focus on web development and payment integration.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Regular contributor to React.js community
- Active participant in TypeScript discussions
- Continuous learning in blockchain and Web3 technologies

EDUCATION AND HONORS

University of Benin, Banking and Finance
Honors Bachelor of Science

Benin, Edo
July 2017

TECHNICAL SKILLS

Core Technologies

- Frontend: React, TypeScript, Next.js, Redux, Context API
- Backend: ASP.NET Core, Node.js, Express
- Databases: SQL Server, PostgreSQL, MongoDB
- Testing: Unit, Integration, and End-to-End Testing (Cypress)
- State Management: Redux, Context API, Zustand

Development & Tools

- Build Tools: Webpack, Vite, Metro
- CI/CD: GitHub Actions, CircleCI, Fastlane
- Monitoring: New Relic, Sentry, Firebase Analytics
- Database: PostgreSQL, Redis
- Protocols: gRPC, Protocol Buffers, WebSocket

Architecture & Integration

- API Integration: RESTful APIs, GraphQL
- CMS: Headless CMS platforms, Strapi, Contentful
- SSR/SSG: Next.js, Static Site Generation

SOFT SKILLS

- Strong written and verbal communication
- Problem-solving and analytical thinking
- Cross-functional team collaboration
- Adaptable to new technologies and frameworks
- Commitment to code quality and best practices
