RSS Reborn Install Instructions

Coming August support for this version of RSS-Reborn will be dropped, download the newest project here: Sol

(You may want to turn off print layout for better viewing)

1. Install RP-1 Express Install (Technically Optional but highly recommended)
2. Remove **EnvironmentalVisualEnhancements, Kopernicus, Parallax_StockTextures, RSS-Textures, RSSVE, RealSolarSystem, Scatterer** from GameData
3. Download Kopernicus from here.
4. Install EVE/Scatterer from blackrack's patreon.
    a. Do **not** use StockVolumetricClouds
    b. Do **not** use StockScattererConfigs
5. Verify Parallax is installed,
    a. **DO NOT USE Parallax_StockTextures OR Parallax_ScatterTextures**
6. Download RSS-Configs from the page below.
    a. If you have issues extracting any files try using **WinRAR** or **7zip**.
7. Download one of each texture packs below, the folders will merge into an 'RSS-Textures' folder..

*For example you'll need to download the **Inner System Pack**, **Earth32k**, **Luna32k**, **Mars64k**, and so on, but you do not need to download both **Earth64k** and **Earth32k**.*

8. Download one of the terrain packs.
9. Download one of the visual configs.
10. Download one of the visual texture packs.
