

Process Note for Domain Verification on Shopify

The following steps are only required **IF** Shopify requests an additional domain verification via TXT records - please note: this does **NOT** usually happen. This is only shared in case it does.

The screenshot shows the 'Connect existing domain' interface in Shopify. The domain 'sunnywilfusa.store' is listed. A yellow box highlights the 'Connecting your domain' section, which states 'TXT record not verified'. Below this, it provides instructions to check the TXT record values. The 'TXT record' section shows the Name as 'shopify_verification', the Current value as '[Empty]', and the Required value as '01J86V68YK2HRMCXJDPF6MRZVC'. A red box highlights a message at the bottom: 'Domain ownership verification failed for this host, please check your TXT record.' To the right of the main interface, there are partial views of other UI elements, including a search bar labeled '/Search Orders' and a notification area with 'Ann' and 'You vie'.

There are no promotional offers.

Note: DO NOT EDIT ANY A/AAAA/CNAME RECORDS that might already be present

Manage Records for  

[A Records](#) [AAAA Records](#) [MX Records](#) [CNAME Records](#) [NS Records](#) [TXT Records](#) [SRV Records](#)
[SOA Parameters](#)

Below is the list of Address (A) Records. Click the 'Add Address A Record' button to add more 'A' records. Alternatively you may click on any row to manage the corresponding 'A' record

List of Address A Records

[Add A Record](#) <<< 1 >>> pg no [Jump To](#)

Sr No	Record Id	Name	Destination IP Address	Status
1	144792836	                               	23.227.38.65	Active

<<< 1 >>> pg no [Jump To](#)

4. Select Add TXT record (Ignore any records that might already be present)

[A Records](#) [AAAA Records](#) [MX Records](#) [CNAME Records](#) [NS Records](#) [TXT Records](#) [SRV Records](#)
[SOA Parameters](#)

Below is the list of TXT Records. Click the 'Add TXT Record' button to add more 'TXT' records. Alternatively you may click on any row to manage the corresponding 'TXT' record

List of TXT Records

[Add TXT Record](#) <<< 1 >>> pg no [Jump To](#)

Sr No	Record Id	Name	Value	Status
1	144792839	                               	                     	Active

<<< 1 >>> pg no [Jump To](#)

5. Enter:
shopify_verification

In the Host Name field and the alphanumeric value presented to you by Shopify in the Value field from the initial error screen. Hit Add Record.

A Records	AAAA Records	MX Records	CNAME Records	NS Records	TXT Records	SRV Records
SOA Parameters						

Add TXT Record

Host Name : .demo.store

Value * :

TTL * : seconds

Enter: shopify_verification

Value from the Shopify Error screen

6. Your Shopify domain will now be automatically verified after 24 hours.
