Other notes:

Colorado Digital Maturity Professional Services to provide digital maturity services. Such services match individual digital service experts at various levels of experience to work directly with state and local governments to assess current capabilities, implement modern digital solutions, build internal technical capacity, and accelerate the adoption of user-centered digital services that enhance constituent experience while ensuring operational sustainability and contributing to the larger civic technology practice.

Disclaimer:

OIT solicits these OIT Enterprise Agreements for IT products and services with the intention that they are cooperative purchasing agreements under Article 110, Intergovernmental Relations, of Colorado Revised Statutes (CRS 24-110-101, et seq.) making all branches of state government, institutions of higher education and local public procurement units eligible to participate in the resulting awards. It is up to these entities to determine if they are authorized (under each entities own procurement rules or policies) to use these OIT solicitations and resulting Enterprise Agreements to procure IT products and services.
