

Call for Sessions | 2019 ESIP Summer Meeting, July 16 - 19, Tacoma, WA

We have opened the session submission portal for the 2019 Earth Science Information Partners (ESIP) [Summer Meeting](#) in Tacoma, Washington!

For 20 years, ESIP meetings have brought together the most innovative thinkers and leaders around Earth observation data, thus forming a community dedicated to making Earth observations more discoverable, accessible and useful to researchers, practitioners, policy makers, and the public.

Be a part of the nation's best-known gathering of Earth data technologists by submitting a proposal for the 2019 ESIP Summer Meeting.

We especially welcome sessions related to our 2019 theme: *Data in Action: Increasing the use and value of Earth science data and information*. Sessions are generally 1.5 hour blocks and fit one of the following formats:

- Breakout Session—presentation-style session with multiple speakers sharing lessons learned, a new tool or new initiative.
- Panel Session—panel-style discussion with one moderator and a group of experts who represent different perspectives on a common topic.
- Workshop Session—classroom-style session to teach attendees; should be hands-on with limited use of slides.
- Working Sessions—roundtable-style session where participants work together to solve a specific problem.
- Business Meetings—dedicated planning time for Collaboration Areas.

Submit your session [here](#). Sessions will be accepted until COB Friday, April 26th, 2019.

To see other submitted sessions, visit [here](#).

Remember, the more information you can provide, the easier it is for the right people to find YOUR session (e.g. specific datasets, technologies, expected skills for workshops, etc.).

You will be able to edit your session content until July 1st, 2019.
