Article Title Maximum 16 words *(The title must be clear, concise, and represent the content of the article. It is highly recommended to use a creative and engaging title to capture readers' attention. Avoid using the words "influence", "relationship", and "case study" in the title. Note, the location of the research is shown in the methods section, not mentioned in the title, except for certain studies where mentioning the location has a very significant meaning)*

Abstract
Please provide an abstract of between 150 and 250 words, giving a concise statement of the introduction of the research phenomenon and gap, objective, methods, results, and conclusions of the article. The abstract should not include any subheadings. Three to five relevant keywords should be listed directly under the abstract. Abstract written in Indonesian and English, max. 250 words in one paragraph, Times New Roman 10 font.
Keywords: keyword$_1$, keyword$_2$, keyword$_3$. (Min.3-Max. 5)

1. INTRODUCTION

The introduction should explain the phenomenon that underpins the research and establish the main topic of the study. The author should summarize and cite previous research relevant to the current study and highlight the knowledge gaps that this research can address. The introduction should clearly state the research question and outline the author's hypotheses.

2. METHODS

This section contains a brief explanation of the research design, variable identification, research subjects, data collection techniques, research instruments (name of measuring instrument and its manufacturer, aspects measured, number of items, and several examples, as well as validity and reliability information), research instrument procedures, and statistical analysis techniques used. The explanation in this section focuses on clear descriptive explanations of the various activities carried out by the researcher in conducting the research, so that it can provide an opportunity for other researchers to replicate or verify the research procedures carried out. Avoid including definitions regarding parts of the method, for example: definition, population, and others.

3. RESULTS

Research results consist of a description of the data obtained during the study. The data referred to is not raw data that has yet to be processed, but rather the results of analysis or hypothesis testing that clearly answer the research questions and demonstrate the current

findings. If presented in tables or figures, their meaning should be easily understood by the reader. Tables and figures should be written using APA Style 7.

4. DISCUSSION

The discussion section provides a description of the researcher's analysis of the research findings, linking them to previous research findings. This section focuses on a critical and substantive analysis of the research findings and comparisons with previous findings based on a review of relevant, current, and primary literature. Comparisons should highlight differences with previous research findings, demonstrating the research's contribution to the development of scientific knowledge. The final section presents the limitations of the research. The discussion should be a minimum of 30% of the total number of pages, which should not be shorter than the introduction.

The research results section is presented first, followed by the discussion section (with or without subheadings).

5. CONCLUSION AND SUGGESTIONS

The conclusion section formulates answers to the research objectives and research questions. The conclusion is not a summary of the research results. When explaining the conclusion, it should be concise, clear, and concise, based on the results and discussion, and should be presented in paragraph form, not numerically. The conclusion explains the research findings and new developments that contribute to the development of psychology. Recommendations based on the findings are addressed to specific parties, with operational suggestions presented in short paragraphs

.

6. Acknowledgments (if any)

This is a short text to express gratitude for the contributions of colleagues, institutions, or agencies that have helped the author's efforts. If you do not have any, please write "None" in this section.

- REFERENCES

Create a bibliography using a reference manager such as Mendeley, EndNote, or at least the References feature in Microsoft Word using APA Style 7th Edition. For all manuscripts, the maximum plagiarism level is 25%.

The reference list is written alphabetically and chronologically. The reference list must include all sources referenced in the manuscript, originating from sources that are: (a) relevant, (b) at least 81% up-to-date (within the last 5-10 years), and (c) at least 81% up-to-date (within the last 5-10 years), and (c) at least 81% primary, preferably from journal articles. [Example of Reference Writing]

[Article Writing Format]

Articles should be written in good and correct Indonesian or English, neatly typed in Times New Roman font size 11, 1.15 spacing, aligned left and right, and printed on A4 paper. The article should be arranged with the following margins: Top: 3 cm, Left: 3 cm, Right: 3 cm, Bottom: 3 cm, Gutter: 0, with Gutter Position: Left; using a two-column format.

[Subtitle Writing]

First Subheading (Title Case, Bold, Left Aligned, Blue)

Second Subheading (Title Case, Bold, Left Aligned)

Third Subheading (Title case, Bold, Italics)

Fourth Subheading (Title case, bold)

Fifth Subheading (Title case, italics)

[Writing Quotes]

The source of the in-text citation is written between opening and closing parentheses, including the author's last name, the year separated by a comma, and the page number if deemed necessary:

- If the citation comes from a single source and one author: (Javed, 2017), or (Javed, 2017, p. 27).
- If the citation comes from a single source with two authors: (Fernandez & Walker, 2021) or Fernandez and Walker (2021).
- If the citation comes from a single source with three or more authors: (Guo et al., 2022) or Guo et al. (2022).
- If the citation comes from two different sources by the same author: Peterson, 2014, 2018), if the year is the same (Peterson, 2014a, 2014b).
- If the citation comes from an institution: (UIN, 2019).

Tabel, Gambar dan Rumus

Each table or figure is given a sequential number, a title, according to the contents of the table and figure, and a source of the quotation, if any. The source of the quotation is written below the table or figure, in Times New Roman font size 10. The table title is written above the table and the figure title is written below the figure. The formula is created using the Equation feature in Microsoft Word. Example table:

Table 1 (table nomor)

Validity and Reliability of Measuring Instruments (table description, Title Case, italicized)

Dimension	Validity	Reliability
Integrative psychological wellbeing	.944	.969
Social Support	.980	.890
Coping Strategy		
Logical analysis	.961	.620
Guidance support	.950	.600

Note : ….

Picture example:

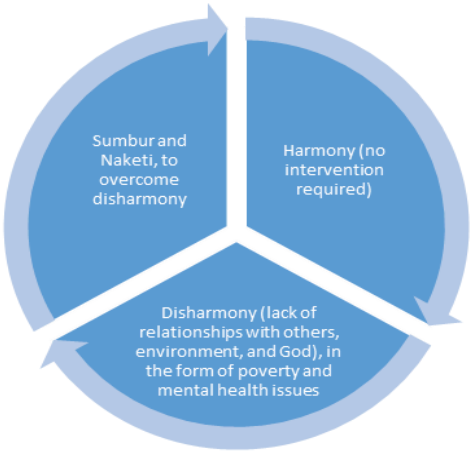

Figure 1. Sociocultural disharmony in the form of poverty and mental health issues

Figure 1. Image caption... (if the image is taken from another source, the source must be stated; Center position if the caption is 1 line, and Align Text to Left if it is more than 1 line).

Example formula:
Use the Equation feature in Ms Word. Number the equations starting from (1), (2), etc.

$$(1 + x)^n = 1 + \frac{nx}{1!} + \frac{n(n-1)x^2}{2!} + \dots \quad (1)$$
