Key learnings

- This project is a place to provide information about blockchain technology, especially Cardano. These are documents that motivate learners and give them confidence when implementing blockchain applications. We have a website https://cardano2vn.io and a YouTube channel in Vietnamese. It can provide information for technology enthusiasts, technology students and people who want to know about Blockchain, Cardano.
- We have organized nearly 40 meetups and seminars for people who want to learn about blockchain and Cardano platform, starting from basic level like what is Blockchain, how to create and use wallets (yoroi, Daedalus..) staking with Cardano, how to become SPO, Proposer, PA/vPA then advanced sessions like writing Marlove smart contract, Plutus, generating token, generating NFT, DAOS or integrating with infrastructure their current business and website.

.

Next steps for the product or service developed:

- We continue to hold seminars at coffee in two places Hanoi and Ho Chi Minh City
- We will continue to develop this project in the next funding rounds with more in-depth content: like Hydra, Mirth, Sidechain and more technical sessions like Haskel, Plutus.

.

Final thoughts/comments:

- Many young members of the Vietnamese cardano community have given positive feedback on the translation content and examples we have.
- We will focus on developing
