History Reimagined	How might we create an alternate history for a pivotal event?	Students will be challenged to design and create a video (5 minutes in length) that offers an alternate history. Students will engage in research and identify crucial points during The Great Depression and World War II. Then, students will generate ideas for an alternate result for their identified historical event. After prototyping storyboards and multiple rounds of feedback, students will produce their final video draft for viewing.	11	United States History	Dewey Finn
