%FIRSTNAME%,

A few months ago... my daughter was about to turn 16.

My husband wanted to gift her a car.

But all he kept thinking was...

*“The car only comes with one key, not two... that's an extra \$300.”*

*“The car doesn't include the warranty. That's an extra 900 bucks.”*

All he did was focus on money going out.

And unsurprisingly...

He kept figuring out more ways it was going out.

It was funny to watch.

Because the trick is simple.

... just “**SWITCH IT**” around!

So I had to remind him how things work.

*“Honey, please start focusing on money coming in. You know how the game works. Right?”*

And we started talking about it...

Soon, he realized he was about to hit a **\$6,000** bonus at work.

You see, that's how this game works...

**Where your focus goes, that's where your energy flows.**

And this is also where most people get it wrong. They just complain about the money going out...

*“This costs so much.”*

*“The bills went up.”*

*“A big expense is coming up.”*

But the thing is...

If you focus on the money going out... guess what happens?

More of it will go out.

And without realizing it, you even put yourself in situations where you'll have to work harder for it.

So the trick is...

Just switch your focus to receiving.

Because once you reverse your thought patterns, you switch the game in your favor.

And this is something I teach in my “Abundance Acceleration Kit”.

I share 11 powerful and little-known ways to rewire your thoughts and financial beliefs so you can manifest a life of prosperity, wealth, and limitless abundance.
