

March 2024 Update – Notice of Moratorium Liberty Pipeline Company (LPC)

Dear LPC Shareholders,

LPC will continue to provide Class C Shareholders with a Will Serve Letter upon request. Due to the amount of necessary infrastructure work required to upgrade the system, the Moratorium for purchasing new shares will remain in place. LPC will not sell new shares until all Class C shareholders have an opportunity to connect to the system and the Pipeline and Booster Pump projects have been completed. After completion of the projects, an Impact Study will be required to determine the number of additional connections the System can adequately handle. There are currently 84 Class C shares that have not been connected to the system.

If the Impact Study confirms that the system can accommodate additional connections, the lots of established subdivisions that were approved by prior Board members will have priority over other requests to purchase LPC water shares. The LPC Board members can be contacted through this website by clicking on the “Contact Us” tab, or by calling LPC 801-745-2088.

The LPC Board appreciates all of the Shareholders efforts in reducing water use over the past several years and we ask that you continue to do so. All Shareholders have a base entitlement rate of 20,000 gallons per month. We realize those of you that do not have access to secondary water find it difficult not to exceed the 20,000 gallons and are subject to increased levels of rates for each additional 10,000 gallons used as required by Utah Code 73-10-32-5 Culinary water pricing structure.

Respectfully,
LPC Board Members
Jami Hadlock
Matt Bailey
Mitch Holmes
Ed VanDyke
John Wood
