Privacy Policy — RoomRay: AR Measure

Effective date: October 17, 2026

1. Introduction

This Privacy Policy explains how RoomRay: AR Measure (“the App”) handles information when you use the application.

The App provides augmented reality (AR) measurement features using your Android device’s camera and supported AR services.

Developer: Ron Games
Contact email: gif37.rk@gmail.com

2. Information Processed by the App

Camera and AR Data

The App requires camera access to provide its measurement features. Camera images and AR tracking information are used to detect surfaces, estimate distances, and display measurements.

The App is designed to process camera data and perform measurement calculations on your device. The developer does not operate a server to receive or store your camera images through the App.

The App uses Google Play Services for AR (ARCore) on supported devices. Google may process information as necessary to provide its AR services, according to Google's own terms and privacy policy.

Google Play Services for AR:
https://play.google.com/store/apps/details?id=com.google.ar.core

Google Privacy Policy:
https://policies.google.com/privacy

Measurement History and Settings

The App may store your measurement history and preferences locally on your device.

This locally stored information is not intentionally transmitted to the developer's own servers. You can delete locally stored information using the available features in the App, where provided, or by clearing the App's storage or uninstalling it.

Uninstalling the App or clearing its storage may permanently delete your locally saved measurements.

3. Advertising and Google AdMob

The App may display advertisements provided by Google AdMob.

Google Mobile Ads SDK and its associated services may collect or process certain information to provide advertising, prevent fraud, measure advertising performance, and maintain service security. Depending on the configuration, your location, and your consent choices, this information may include:

- IP address;
- device and advertising identifiers;
- information about the device and the App;
- advertising interactions and usage information;
- diagnostic and performance information;
- approximate location information derived from an IP address.

Google's processing of this information is governed by Google's applicable terms and privacy documentation.

Google Mobile Ads data disclosure:
https://developers.google.com/admob/android/privacy/play-data-disclosure

Where required, the App may display a consent message allowing you to manage choices relating to advertising and personal data processing.

The App also offers a one-time purchase intended to remove advertisements. After a purchase has been successfully completed and recognized by Google Play Billing, the App is intended to stop displaying advertisements.

4. In-App Purchases

The App uses Google Play Billing to process the one-time Remove Ads purchase.

Payment transactions are handled by Google Play. The developer does not receive your full payment card details through the App.

The App may receive purchase status and related information necessary to verify a purchase, enable the Remove Ads feature, and restore eligible purchases.

Google's handling of purchase and payment information is subject to Google's terms and privacy policy.

Google Privacy Policy:
https://policies.google.com/privacy

5. Sharing of Information

The developer does not sell your personal information.

Information may be processed by third-party services integrated into the App, including:

- **Google AdMob**, to provide and measure advertisements and support related advertising functions;

- **Google Play Billing**, to process purchases and verify purchase status;
- **Google Play Services for AR (ARCore)**, to provide augmented reality functionality.

These services may process information according to their own privacy policies and terms.

The developer does not intentionally upload your locally stored measurement history or camera images to the developer's own servers.

6. Data Retention and Deletion

Measurement history and preferences stored locally remain on your device until you delete them, clear the App's storage, or uninstall the App, subject to Android system behavior and any device backups.

Information processed independently by Google or other third-party providers is retained according to their applicable policies and settings.

The developer cannot directly delete information held independently by those third-party providers.

7. Children's Privacy

The App is not specifically designed to collect personal information from children.

The App's availability, advertising configuration, and data practices must comply with applicable laws and Google Play requirements concerning children and the intended audience.

If you have a privacy concern regarding a child using the App, please contact the developer using the contact details provided in this policy.

8. Data Security

The App is designed to keep measurement history and preferences locally on your device rather than on a developer-operated server.

However, no method of electronic storage or data transmission can be guaranteed to be completely secure. Third-party services integrated into the App maintain their own security practices.

9. Your Privacy Choices and Rights

You can:

- manage camera permissions through your Android device settings;
- manage available advertising consent choices where presented;
- manage eligible purchases through Google Play;
- delete locally stored measurement history using the App's available controls;
- contact the developer with questions or requests concerning privacy.

Depending on your location, you may have additional rights under applicable data protection laws, including rights to access, correct, or request deletion of personal data.

For requests concerning information handled by Google, please use Google's privacy tools or contact Google directly.

10. Changes to This Privacy Policy

This Privacy Policy may be updated when the App's features, integrated services, or applicable legal requirements change.

The latest version should be made available at the public Privacy Policy URL provided in the App's Google Play listing.

The effective date at the top of this document indicates when this version was prepared.

11. Contact Information

If you have questions about this Privacy Policy or the privacy practices of RoomRay: AR Measure, contact:
