PSAT/SAT Overview

As our students progress on their Chippewa Journey at MMHS they will take the College Board Suite of Assessments, an integrated system of tests that measure what they are learning in class and what they need to succeed in college. The culminating assessment for students is the Scholastic Aptitude Test (SAT) which is taken in the spring of their junior year as part of the Michigan Merit Exam (MME). The Pre-Scholastic Aptitude Test (PSAT) is a series of tests that predicts college readiness and success on the SAT. There are actually three different PSAT exams:

- PSAT 8/9- sets readiness baseline and taken in 8th and 9th grades
- PSAT 10 - allows check-in on student progress and taken in 10th grade
- PSAT/NMSQT - National Merit Scholarship Qualifying Test; students take in the fall of 11th grade and may qualify for the National Merit Scholarship Program
- SAT - taken in the spring of 11th grade, scores are reported directly to colleges

After each test students will receive a clear and detailed report on their scores and performance percentiles in each area of the test. Please visit www.collegeboard.org for more information.

Student Support

In 8th grade students create a Khan Academy account giving them access to practice tests/questions, video tutorials, and both test taking and studying strategies. Visit www.khanacademy.org/sat for more information. Practice tests may also be downloaded on our www.chipslead.org website.

Parent Support

Check out the ***For Parents*** section on the bottom of the Khan Academy website above.
