

CONNECTING CAMDEN

CREATING VIBRANT FUTURES

2024 RAILROAD CROSSING ELIMINATION (RCE) GRANT
APPLICATION

City of Minneapolis

August 2024

EXECUTIVE SUMMARY

CONNECTING CAMDEN will improve the health and safety of the Camden neighborhood of north Minneapolis through the provision of grade separating and/or removing one or more of highway-rail crossings, which is affected by trains frequently blocking the crossings in this neighborhood. The extended gate closures impact travel-time reliability of motorists, transit and school busses, emergency management response time, roadway freight movement, and bicyclists and pedestrians. These extended closures often lead to frustration and unsafe behaviors such as pedestrians passing through stopped trains to cross the tracks and motorists driving around crossing gates just prior to the train arriving. By providing grade-separated crossing(s) and/or closing adjacent crossings, the project will enhance safety, improve travel time reliability, reduce barriers to emergency management response times, improve supply chain fluidity for both road and rail networks, and reduce the overall impacts that this existing condition has on this underserved community.

To advance the development of this project through concept planning and preliminary design, the City of Minneapolis is preparing a 2024 Railroad Crossing Elimination (RCE) grant application for planning and preliminary design from the USDOT/Federal Railroad Administration. Applications are due September 23, 2024.

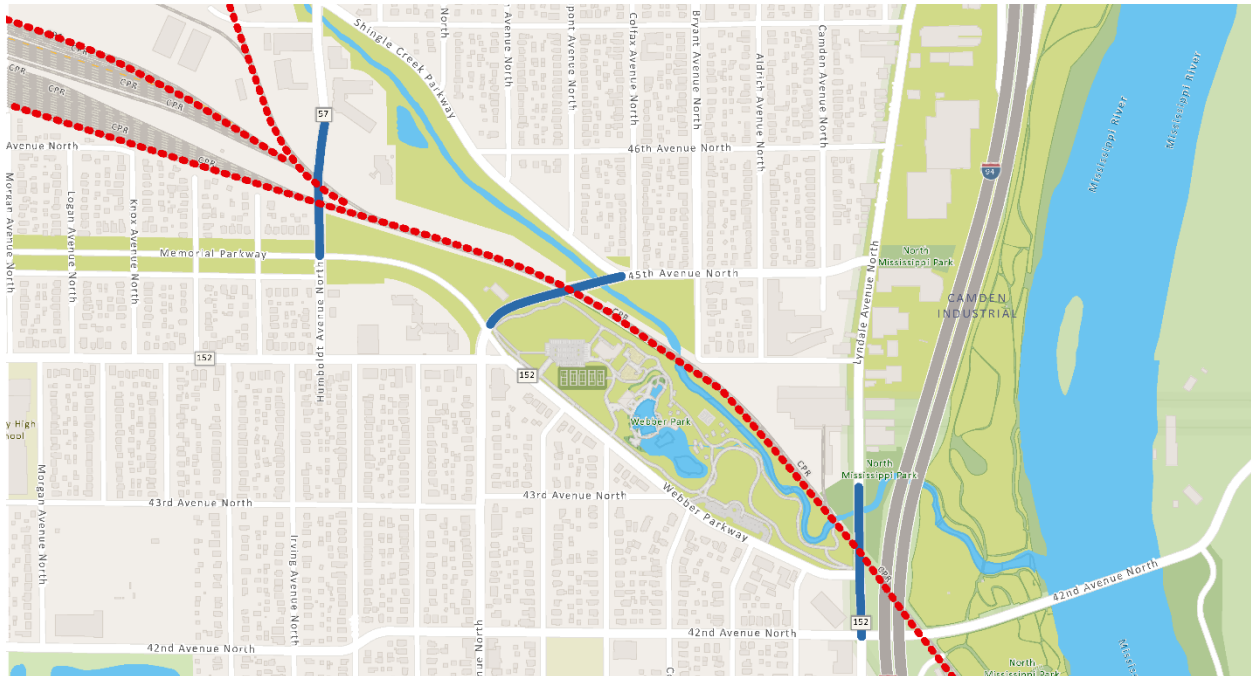

BACKGROUND

The Camden neighborhood is located in north Minneapolis; it is a diverse and vibrant community with a mix of residential, commercial, and industrial areas. The neighborhood is characterized by a blend of single-family homes, apartment complexes, parks, schools, and businesses. This mix of land uses contributes to the unique character of Camden and affects how residents and visitors navigate the area. The neighborhood includes a population with a high diversity index and housing affordability index compared to the city as a whole and the state. There is also a high concentration of Black, Indigenous, and People of Color (BIPOC) residents.

	Project Area	City of Minneapolis	State of Minnesota
Population	14,108	432,828	5,826,205
Households	4,897	191,610	2,309,848
Median Household Income (\$)	62,551	77,839	86,801
Wealth Index	66	84	106
Housing Affordability Index	85	74	93
Diversity Index	79	68	48
Households with Disability (%)	29.61	19.22	21.78
Households below the Poverty Level (%)	16.00	15.00	9.00

The Canadian Pacific Kansas City (CPKC) railroad mainline runs through this neighborhood and it operates the Humboldt Rail Yard in this area.

The City of Minneapolis is embarking on the initial stages of a feasibility study of the potential to grade separate three at-grade roadway/railroad crossings of the CPKC railroad at N. Humboldt Avenue, 45th Avenue N., and N. Lyndale Avenue. The CPKC railroad has one(1) mainline track at Lyndale Avenue, two (2) mainline tracks at 45th Avenue, and two (2) mainline tracks and two (2) siding tracks at Humboldt Avenue. The railroad operates approximately ten (10) day thru trains (6 AM to 6 PM), ten (10) night thru trains (6 PM to 6 AM), and five (5) switching trains through this area. Typical speeds over the crossings range from 5 to 25 mph. Traffic volumes on the crossing roadways range from 7,734 annual average daily traffic (AADT) on Lyndale Avenue, 2,750 AADT on 45th Avenue, and 1,634 AADT on Humboldt Avenue. Together, these vehicle/train volumes contribute to over 240,000 vehicle/train exposures per day.

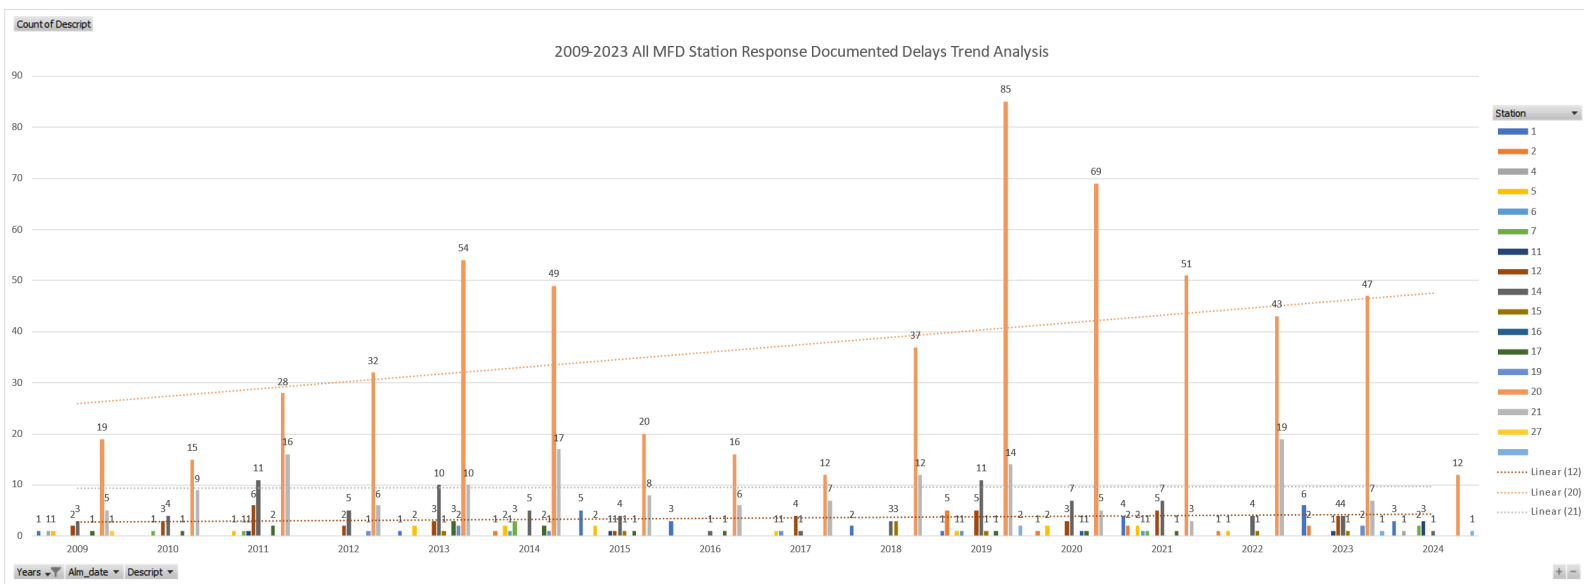

Project Location Map

This study is precipitated by long delays and other issues caused by the proximity of the CPKC Humboldt Yard, which is immediately northwest of these crossings, and the impacts this causes to these intersections and to the surrounding neighborhood. The study will evaluate whether grade separations and/or closures at any or all these crossings are feasible.

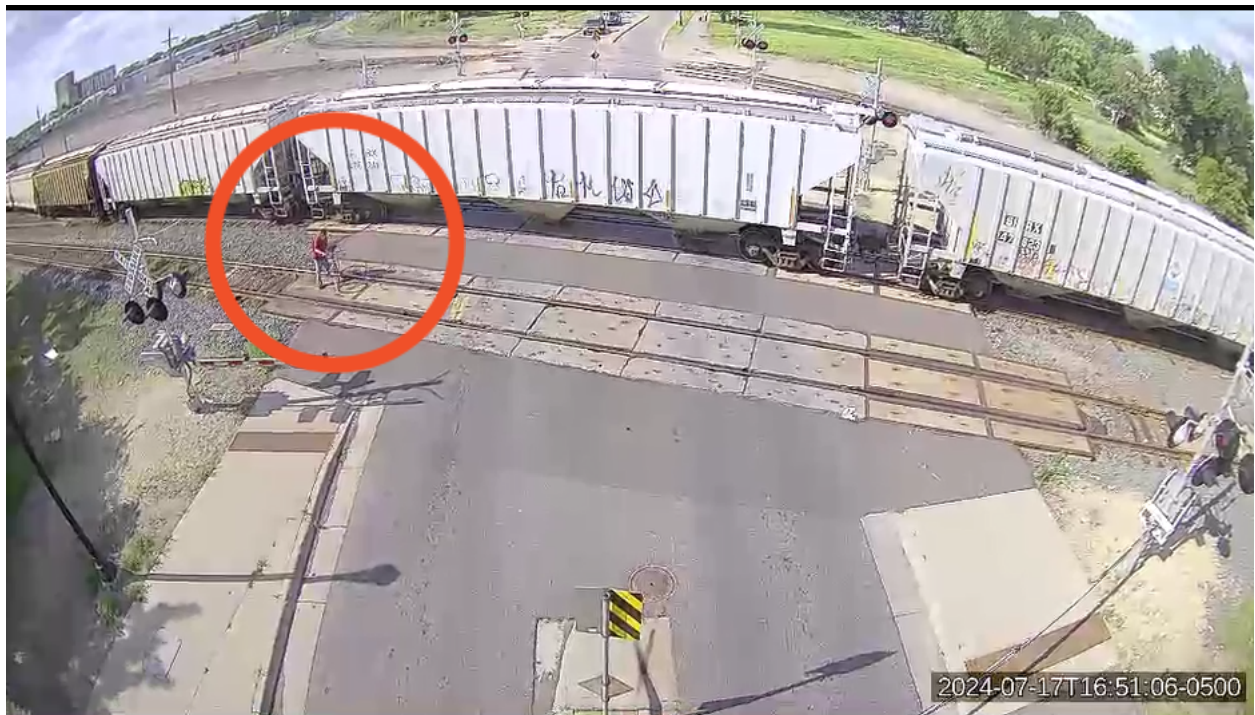

The delays caused at these at-grade crossings is not just anecdotal – the City of Minneapolis has collected traffic and video evidence of the duration of delays and the risky behavior exhibited by pedestrians, bicyclists and motorists. Data reveals that train delays of over 10-minutes are not uncommon in this area, with some train stoppages across these crossings extending over 20, 30 and even 60 minutes! In traffic data collected at Lyndale Avenue N (the crossing farthest from the yard) between September 1, 2023, and August 31, 2024, there have been **470** instances of delays of 15 minutes or longer, 104 instances of delays 30 minutes or longer, and 20 instances of 60 minutes or longer! The longest time recorded during this time period was 194 minutes (twice). For a full view of the magnitude of the issue, see Appendix 1.

To further exacerbate this issue, Minneapolis Fire Station No. 20 on Humboldt Avenue just north of the crossing has exhibited response delays far above any of the other stations in the city due to the at-grade crossings and train blockages.

Graph Illustrating Minneapolis Fire Department Delays Since 2023 (Fire Station No. 20 is colored in orange)

Finally, unsafe behaviors such as pedestrians jumping over couplings, bicyclists dragging their bikes under train cars, and motorists driving around downed crossing gates has all been captured on video.

ACTION PLAN

To advance the development of this project through concept planning and preliminary design, the City of Minneapolis is preparing a 2024 Railroad Crossing Elimination (RCE) grant application for planning and preliminary design from the USDOT/Federal Railroad Administration as authorized by the Bipartisan Infrastructure Law (BIL). Applications are due September 23, 2024.

The RCE Program provides a federal funding opportunity to fund highway-rail or pathway-rail grade crossing improvement projects that focus on improving the safety and mobility of people and goods. The RCE grant request will be for a Track 1—Project Planning to complete the concept design development; and Track 2 – Project Development to complete the preliminary engineering and NEPA document.

Project Planning is the phase which the project sponsor identifies capital project concepts to adequately address transportation needs and opportunities; identifies and compares costs, benefits, and impacts of project options; identifies the impacted environmental resources; and engages with interested parties, agencies, and infrastructure owners.

Project Development means the Lifecycle Stage of a Capital Project during which the project sponsor conducts design, environmental, and other studies to ensure the project is ready for implementation. Project Development activities occur after a project has completed Project Planning, and before a Capital Project can advance to Final Design.

For this application, the City is requesting a federal grant request in the amount of \$2,000,000 which is 80% of the \$2,500,000 estimated project cost.

Washington, DC 20590

Re: Support for City of Minneapolis' Application for a Railroad Crossing Elimination Grant

Dear Administrator Bose:

On behalf of *Organization Name*, I am writing to express our strong support for the City Minneapolis' grant application for the Railroad Crossing Elimination (RCE) Program for the **Connecting Camden** project. If approved, the project would allow a coordinated study to identify appropriate locations for grade separations and/or closures at three existing at-grade highway-rail crossings located near CPKC's Humboldt Yard. Located in the Camden Neighborhood in north Minneapolis, this effort will enhance rail safety, improve the health and safety of the community, and reduce the impacts that freight movement and railroad operations have on this underserved community in the City.

The problem we are facing is *(brief description of the issue or problem: excessive delays, promoting risky behaviors, disrupting transit and school bus routes, interfering with emergency responders, etc.)* which has had a negative impact on our community by *(impact of the problem: dividing our neighborhoods, hampering our businesses, disrupting the mobility of people, goods and emergency services, reduce emissions, protect the environment, etc.)*. This is a pressing issue that demands immediate attention and action.

Fortunately, the City of Minneapolis has developed a call to action to address this problem. By *(briefly describe the proposed solution: moving forward with a coordinated study, engaging the community to understand the issues, working cooperatively with the railroad, identifying a feasible and reasonable solution, etc.)*, we can find a consensus solution for **Connecting Camden** once again.

I strongly believe that the City of Minneapolis has a plan that is the right solution for our community. The City has a proven track record of success and has the experience and expertise to execute this project with excellence.

In summary, this project will improve safety and mobility of people and goods and we compliment the City's proactive approach and partnership with all the project stakeholders in working towards this grant application. *Organization Name* is in full support of the implementation of this project.

Respectfully,

Name

Organization
