PROFESSIONAL EXPERIENCE

Project 1: Zeedo ->[Web Link](#)

Designation:Developer and QA

Zeedo is web3 platform to deliver the client initial offerings to public, similar to any BSE or NSE listings on Web2 in India.

Responsibilities:

- Initial Dex Offering(IDO) for \$ZEE token holders.
- The user selection was performed using chainlink algorithm.
- Developed dashboard for Zeedo project.

Project 2 : Staking ->[Web Link](#)

Dashboard to attract users identity towards maximum staked assets. This is similar to users holding shares in Web2.

- Backend development been developed through shadow resource(Solidity language)
- Using the Application Binary Interface(ABI) to interact with the contract from frontend.
- Developed dashboard for native staking where the users can earn extra passive income.

Project 3: Client: Acknoledger - Front End Administrator -> [Web Link](#)

- Developed an Admin dashboard to manage LP Staking.
- Admin can start or stop the program and initiate the reward tokens.

Project 5 Client:Pontoon - Front End Administrator

- Developed an Admin dashboard to manage LP Staking.
- Admin can start or stop the program and initiate the reward tokens.

QA

- Deployed the code towards Dev environment for testing
- Tested with Wallet Connect, Switch Network and Start and Stop of LP program.

Project 6 : Zerodex -> [Web Link](#)

- Zerodex is meta aggregator decentralised exchange which provides a platform to trade for users with additional functionalities including zero trading fee on assets for bridging and swapping.
