

INTERIM REPORT

TECHNICAL INFORMATION REQUIRED FROM PARTNERS

Project Management Association (ProMAs) ROMANIA

If your project involves other organisations, not formally participating in the project, please briefly describe their involvement.

In Romania our projects involve other local partners. Among them we can mention: The Dolj County School Inspectorate, The Dolj County Pedagogical House of Teachers, The Decebal School, Craiova, Voltaire Highschool, Craiova, Dolj, The Stefan Velovan National Pedagogical College Craiova. They are involved in all the activities of the implementation of the project related to applying the questionnaires, organising the focus-group, ideas for scenarios for the Multimedia game.

If relevant, please describe any difficulties you have encountered until now in managing the implementation of the project and how you and your partners handle them.

The difficulties that we have encountered until now in managing the implementation of the project are related to the pandemic situation. Due to it, some of the activities had to be performed online and not physically, for example the survey. Some students from the target group study online, according to the rules of the Romanian Ministry of Education and because they come from rural areas their possibility of having access to technology is more reduced compared to the situation of the students living in the city.

What has been the project's impact so far on the participants, participating organisations, target groups and other relevant stakeholders?

So far, the impact on the participants, participating organisations, target groups and other relevant stakeholders has been one of great importance. All of them, but especially the students, have become more aware about the laws regarding gender equality in Romania and in all the countries involved in the project, they are more familiar with the main problematic area regarding gender equality in Romania, if there is gender equality in education access, which are the laws against violence towards women in Romania, the legislation on online abuse, violence and bullying at school, cyberbullying and sexting and grooming and the gaming profiles of teenagers in Romania.

In case already applicable, to whom did you disseminate the project results inside and outside your partnership so far? Please define in particular your targeted audience(s) at local/regional/national/EU level/international and explain your choices.

We have disseminated the project's activities inside and outside of our partnership, using the newsletter, the Facebook posts, seminary and regional teacher's meetings (ex. Sport Teachers Biannual Meeting). Our targeted audience at local and regional/national/EU level/international have been the students aged 14-16, but also the students of other ages, their teachers, their parents, our community, our partners from the educational field from all the levels previously mentioned.
