

## Implementation Report

*1. The outcomes of the implementation: student learning outcomes and technical procedure outcomes.*

For the purpose of the time that I was given in the classroom with my lesson we worked on creating a graphic organizer on the chromebooks. I was able to show the students how to use the software

*2. The adjustments you have made to accommodate students with special needs.*

This assignment can be done in small groups and the students can get more help on the lesson. This lesson can also be done without the technology component.

*3. The adjustments you had made for the effectiveness of classroom management.*

For next time I would previously create the graphic organizer for them

*4. The questions asked by the students.*

They asked how much detail they needed to add.

*5. The problems students had encountered during the implementation process.*

*They struggled with making the graphic organizer themselves but we adapted the lesson to be easier for them.*

*6. The decision(s) you had to make on the spot to make the implementation easier and smooth.*

The teacher in the classroom and I had to make the decision to help the students to create their graphic organizers for them.

*7. The feedback from the students.*

They really liked the lesson and they said that it would really help them to create their stories.

*8. The time frame (was there enough time as you planned for).*  
Yes it was enough time. We used the entire hour.

*9. What you learned from the implementation including proposed changes for future lessons?*  
*I have learned that I need to be very quick and be able to jump in and adapt the lesson quickly to help the students succeed.*
