PSORIASIS DIET FOODS TO EAT

- 1.) Eat organic if possible when you consume the skin, leaves or stems. Soak non-organic for 10 minutes in filtered water with vinegar or baking soda. I soak organics most times as well.
- 2.) Eat raw whole foods & a well-balanced diet. I'm not telling you to avoid any foods completely. Practice moderation and eat mindfully. The goal is to get more of these foods in.
- 3.) These foods are in order of importance, top of the list is best. Focus on ADDITION over SUBTRACTION which empowers you. Eat a diverse and satisfying diet. This is not strict.

Apples (organic if possible, wash and rinse well, red are best, all varieties good)

Wild Blueberries (frozen)

Garlic

Turmeric (I sprinkle the organic powder on foods and in coffee/tea)

THINGS TO AVOID (MINIMIZE)

heavy metals (copper i.e. old water pipes, mercury i.e. amalgam 'silver' fillings, lead paint, cadmium, aluminum which is in many household items etc)

radiation

conventional pesticides ("Organophosphates"), herbicides, glyphosate ("Roundup"). Eating organics, and non-GMO foods helps a lot.

processed sugars, corn syrups, agave syrups, aspartame (splenda), refined honey

GMO products
canola oil (check ingredients on bags, boxes, cans and ask at restaurants)
dairy products (try ghee, coconut milk or almond milk, use goat or low-fat feta cheeses)
alcohol
conventional gluten wheat products (go for ancient grains, study the ingredients list)
antibiotics (unless emergency situation of course, be sure to use probiotics during and after done)
conventional corn & soy products
MSG ("natural flavors" "artificial flavors")
conventional household chemicals (especially OLD, unused bug and weed killers)
fluoride, bromide, chlorine
immunosuppressants
antihistamines
OTC painkillers
antacids
junk, processed, fast, fried foods
conventional pork
eggs (go cage-free, local if you eat them)
conventional red meat products (NO antibiotics, go organic or grass fed)
canned tuna or other canned meats
aluminum foil for storing and cooking foods
tobacco
electromagnetic toxins (don't charge your cellphone or other devices right next to your body. Put all devices in Airplane Mode while you sleep if they are in your bedroom, no screens in the dark, use "Night Light" settings, no laptops on your lap, use a towel.)

get all conventional household chemicals you don't use out of your house

Be sure to check your house for black mold. You can use cedar oil and borax mixtures to kill mold back. Do NOT use antifungals

plastics (slowly use more glass storage and less plastic. Don't microwave in plastic)

JUICERS & BLENDER

[Angel Pro Juicer](#)

My Angel Juicer is an incredible machine. It's very expensive but is in a league of its own and will last forever. I got one as a gift, which is the only reason I have one. This is a worthy investment.

MASTER THESE 3 SKILLS

MASTER THESE 3 ADVANCED SKILLS AND YOU WILL HEAL YOUR PSORIASIS NATURALLY

1.) ALKALINE WATER

In the morning drink 1 liter (32 ounces) of pure water with a lemon or lime squeezed in, upon waking up FIRST THING. This is a powerful tonic, be prepared for symptoms at first, this will pass, push through. This cleanses the Liver. Do this again 1 hr before bed for more cleansing.

Correcting chronic dehydration is the first step in natural healing. It must be done, no questions asked. A good goal is 1/2 your body weight (in lbs) in fluid ounces of water every 24 hours. Water is now your most important asset in your life. Treat it with respect and source it well.

I add zinc and chlorophyll, watermelon, or thin cucumber slices. Drink raw coconut water. Raw coconut water from green young coconuts, 16oz cans, no added sugars are typically the best to grab. This brings the water to life as you drink it. This is what makes "Alkaline Water", a most crucial skill.

2.) CELERY JUICING

Organic celery if possible, (conventional ok - soak in filtered water with vinegar or baking soda for 10-15 minutes). Rinse and cut to fit your juicer and it's ready.

Juice 16-32 ounces fresh and drink on empty stomach within 10-15 minutes. I drink the celery juice as I clean the juicer parts. By the time I'm done cleaning I'm done drinking and on with my day.

If needed, you can store for up to 24 hrs. Make 2 batches at once for 2 mornings. It is much better to drink it fresh.

If you don't have time to juice at home, look for a place that makes fresh juices and request celery juice or get their 'green juice' combo. This is pricey in the long-run but does get the job done for those who can't juice at home.

3.) SMOOTHIE RECIPE

The smoothie is very tasty and very important to help the body eliminate heavy metals and pathogens causing psoriasis.

The ingredients are:

- 👊 Wild Blueberries (frozen)
- 👊 Cilantro (coriander)
- 👊 Parsley
- 👊 Banana
- 👊 Orange or Papaya or Watermelon or Cantaloupe
- 👊 Ginger root
- 👊 Atlantic Dulse flakes (in supplements list)
- 👊 Chaga mushroom powder (in supplements list)
- 👊 Spirulina powder (in supplements list)
- 👊 Barley grass juice powder (in supplements list)
- 👊 Pitaya (dragonfruit) powder (in supplements list)

Add a little water in bottom of cup, then 1 banana, chop the ginger and cilantro up, then add the powders and atlantic dulse flakes, then 2 cups of frozen wild blueberries. Blend and Enjoy!
