

Two years have passed since the release of dance-pop album *Gemini*, and L:OVELESS’s leader and main vocalist Sunnie has made her return with her second full album, *Supernova*. Unlike her previous releases, the ten track project showcases the actress-turned-idol’s beautiful vocal capabilities. With the returning assistance of Techne Culture’s SLADE and Flora, fellow L:OVELESS member Mina, along with several others, *Supernova* is a mature, beautifully crafted album focused on love, heartbreak, and the confines felt by an industry veteran. Though Sunnie is only credited with writing one song on the album, her influence can be felt through every track, showing the level of intention and thought that she frequently puts into her work.

Known for her awe-inducing performances, Sunnie has traded out impressive choreography for performing the tracks from *Supernova* with a live band. In lieu of promoting on music shows, she will be holding a fan concert on the 22nd and 23rd at the KSPO Dome.
