

Orange Improvement Proposals

All sections are required. If they are not applicable, please write N/A.

Once your proposal is ready to be locked for voting, tag [@GovC](#) in the oip channel.

Note that proposals go live on friday midnight, so you want to request a lock before Thursday 2p pt.

OIP-X

Goal:

Send an orange to the moon. For the lulz and flex.

Single Point of Contact: *(Only 1 individual for GovC to reach out with questions, and to represent at TownHall.)*

[Name1]

Sponsors: *Include folks planning to work on this proposal. Do not include folks who are just supportive of this proposal.*

[Name1], [Name2], [Name3], [Name4], [Name5]

Description:

I believe that this DAO should commit itself to achieving the goal, before this decade is out, of landing an orange on the moon, and leaving it safely on the surface.

Benefits:

Being the first orange on the moon will inspire millions of hopeful entrepreneurs who will swell our ranks and deal flow. It's all about the deal flow.

[\(Link to Proposal Details if applicable\)](#)

Success Metrics:

1. KPIs before proposal:
 - a. Oranges on the surface of the moon: 0
2. KPIs after proposal:
 - a. Oranges on the surface of the moon: 1 by 12/31/2029
3. Success Confidence:
(If this proposal was executed 100 times, how many times will it meet its goal?)
 - a. 70%

Duration:

- Start: Season 1
- End: When the first commercial moon mission is launched or 12/31/2029, whichever is earlier.

Tokens Requested: (Treasury control) ([Treasury Guidance](#))

1. \$ORANGE Total: 100
 - a. For Team Leads: 10
 - b. For Proposal Goal: 90
2. \$ETH Total: 0.05
 - a. For Expenses: 0.05

Token Distribution: (Sponsors' control)

1. \$ORANGE
 - a. [Name1]: 3.3334
 - b. [Name2]: 3.3333
 - c. [Name3]: 3.3333
 - d. Swapped to \$USDC: 90
2. \$ETH
 - a. Pay for swap fees: 0:05. If less, will be returned to DAO.

RISKS: (Open to All Members)

1. By [Member1]
 - a. I don't think that's enough \$ORANGE to buy a space for an orange to the moon. I think we should increase it by at least 10 more \$ORANGE. I know because I am a galactic fruit broker.
2. By [Member2]
 - a. Mission may fail, but in most failure modes, will be covered by insurance. The orange will be lost, however. We should not send an orange we feel strongly about.
3. By [Member3]
 - a. We will never develop the technology to send an orange to the moon. I am a flat earther.

COUNTERPOINTS: (Open to All Members)

1. By [Member4]
 - a. We should be sending an \$ORANGE in a hardware wallet. Not an actual fruit.
2. By [Member5]
 - a. We should be sending it to Mars instead. I'll call Elon.

ADMIN: FOR TREASURY:

Transactions Upon Passing:

- Send 10 \$ORANGE
 - From: 0XXXXXXXXXXXXXXXXX (Treasury Gnosis Multisig)
 - To: 0XXXXXXXXXXXXXXXXX ([Name1]'s wallet)
- Send 0.05 \$ETH
 - From: 0XXXXXXXXXXXXXXXXX (Treasury Gnosis Multisig)
 - To: 0XXXXXXXXXXXXXXXXX ([Name1]'s wallet)
