

HEADLINE:

How I managed to scale **multiple brands** to **6 figures** and live the **life of my dreams** and how YOU can do it too

A place for a quick introductory clip 

In this world its almost impossible to succeed without a mentor, and despite all the “free” content that is on the internet it can sometimes get confusing on where to start to guarantee success in your Ecom journey

There are currently 5,600,000 stores and guess what, only 10% of them succeed.

This is why you need guidance, a clear vision, and a community with more like-minded individuals.

You'll get

Instant access to my [always-growing](#) Discord community full of ambitious people

Personal coaching by me: (Name, accomplishments, testimonials) You can have the about me zone on the end of the page

Step-by-step plan on how to build your first-ever store from *scratch*

Of course, an e-commerce store without traffic is nothing
That is why you'll receive guidance on

SEO- Optimization - How to optimize your page to be among the first in search engines

Organic ads - How to bring traffic to your site and actually get people to buy from you

Paid ads - Complete course on the "steroid" of businesses which is the paid option of advertising your store and product through social media marketing

(You could also implement email marketing in scaling your program if you haven't until now and also implement teaching it in the program)

(Some other idea can be the creation of a free ebook and having them type their email so you can implement email marketing campaign, this way it can be far easier to sell to them through combination of value and salesy emails)
