

VOICE ALERT SYSTEM-6

VOICE ALERT SYSTEM-6 is a new system featuring wireless Passive Infrared motion detector sensors, transmitters and a remote receiver speaker base. Users record their messages and then are notified when activity in a monitored zone is detected. You can divide the total area you need covered into multiple zones then monitor them separately. Alter your messages and place the wireless sensors wherever you wish.

Features:

- 1. All weather PIR
- 2. .Adjustable mounting.
- 3. Sends a signal up to 1000 ft.
- 4. System has six zones
- 5. Includes the base unit and a <u>one</u> wireless sensor.
