Auto Detailing Packages

Ceramic Coating

Ceramic Coating provides the best protection for your car while also giving your car the best look. Dirt falls off easier and during rainfall it acts as a self-cleaning agent. Cleaning the car becomes much easier since all it needs for the most part is a garden hose or a pressure washer.

All Ceramic coating applications include an extensive wash. Following the wash the car will be physically and chemically decontaminated. At this point the paint can be polished to take out scratch and swirl marks before applying the coating.

	<u>Small car</u>	<u>SUV/Truck</u>
1 year	300	400
1 year (With 1 Step Paint Correction)	550	750
5 years	400	550
5 years (With 1 Step Paint Correction)	650	900
