

# YEAR 10 GEOGRAPHY MODULE 2

## Homework 8

### Population change in London

- All questions in red must be complete on your document
- Find a map of London within the UK
- Insert the map and describe the location of London.
- Find a graph that shows the population of London for the past 100 years.
- Insert the graph and describe the change in population over the past 100 years. Describe the trend and any major changes.
- Research the natural increase of the London population and immigration data for London
- Analyse this data, how are these two factors responsible for population change in London
- Research historic migration into the UK and London.
- Describe where people have migrated from historically to make up the multicultural London we know today.
- Research the migration of people from an EU country to London. You are going to use this as a case study.
- Create a table to show the push and pull factors for migration into London from an EU country (Poland for example)

Push Factors	Pull Factors

- Explain how being part of the EU has impacted London, its population and urban growth.
- Find a map that shows the location of ethnic groups in London.
- Insert the map into your document and describe the distribution of ethnic groups in London.
