

Hello,

My name is **NAME** and I am the owner and the lead purchasing agent of **COMPANY NAME**.

Our company is an international brand building company based in Israel and our main market is in USA, UK and Europe.

We are interested in manufacturing products that you are offering in your Alibaba website and would like to introduce ourselves, as well as create a profitable long-term partnership between our two companies.

We came across your store and website and we are interested in having you become the nationwide manufacturer of our products.

We are interested in this specific product and since you're a manufacturer I was wondering if you can manufacturer it for us with a small change in design?

Please see attached image of the product and product's specifications:

Item size/image:

We have a few more questions please:

1. Are you aware if there is a patent registered somewhere in the world for this product?
2. Are you able to print our logo on the product?
3. Are you able to provide custom box packaging for the product and what kind of packaging do you have (please send me examples)?
4. What is the cost of the product per unit including custom packaging with an order of 500 units, 1000 units and 5000 units?
5. How much will you charge for a sample including shipment in China?
6. How long will it take to manufacture and package 500, 1000 and 5000 units?
7. Are you able to work with DDP shipping terms by Air and Sea or do we need to provide our forwarder?
8. What kind of certificates can you provide? Do we need a Prop 65 warning for this product or any other certificates to import to USA, UK and Europe?
9. How will you package the product to ensure that it does not break during shipping?
10. Are you able to provide a standard, general or government invoice?

We greatly appreciate your response to our questions above. Please inform us of any shipping or other policies you may have.

We look forward working with your company and establishing a great and lucrative long-term business relationship between our two companies.

Best regards,

NAME
