

## How to Use OBS and Set Up for a First Stream

### Introduction

OBS (Open Broadcaster Software) is a powerful and free tool for live streaming. This guide will walk you through everything you need to know to set up OBS and go live for the first time.

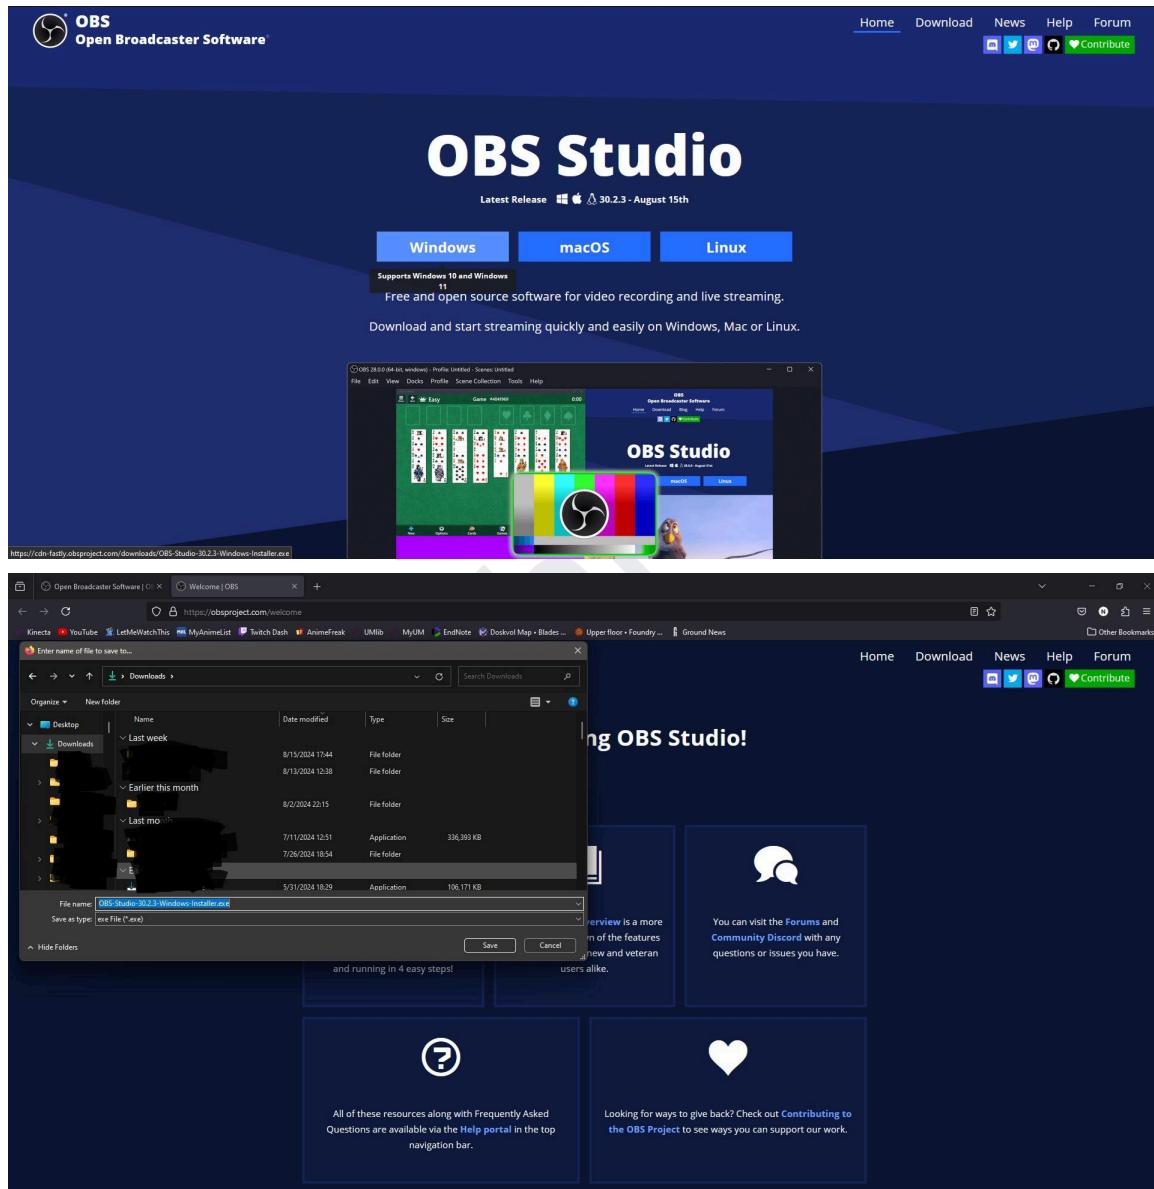

### 1. Download and Install OBS

Step-by-Step Instructions:

1. Visit the [OBS website] (<https://obsproject.com/>).
2. Select your operating system (Windows, macOS, or Linux).
3. Download the installer and run it.
4. Follow the on-screen instructions to complete the installation.

## Visual Aid:

## 2. Initial Setup

### Step-by-Step Instructions:

1. Launch OBS.
2. The Auto-Configuration Wizard will pop up. Choose 'Optimize for streaming, recording is

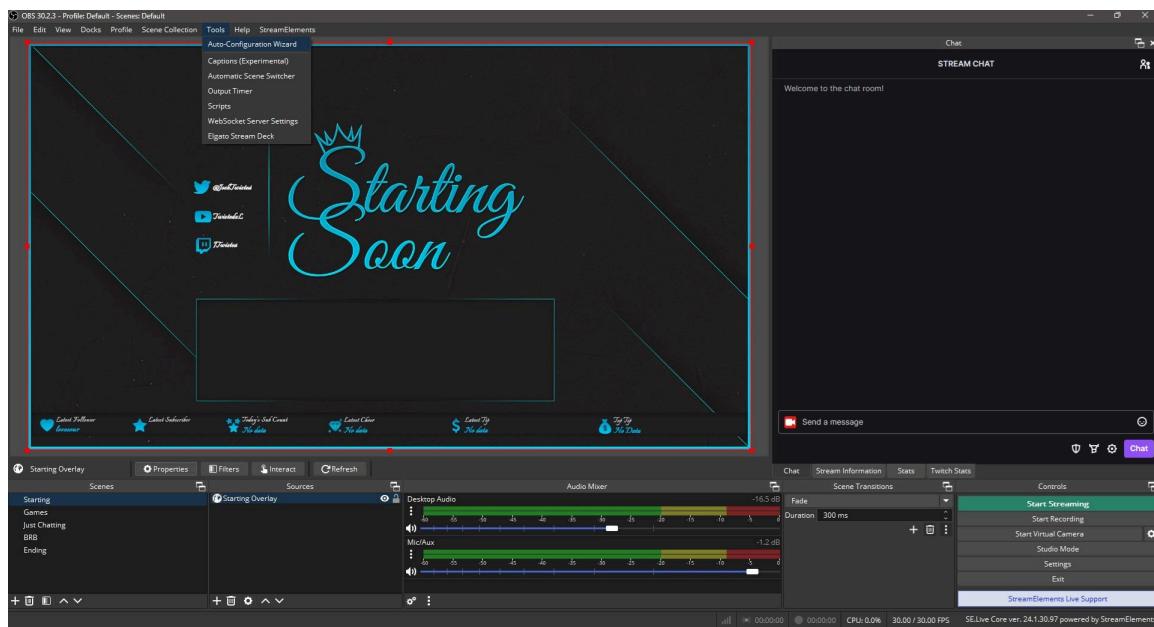

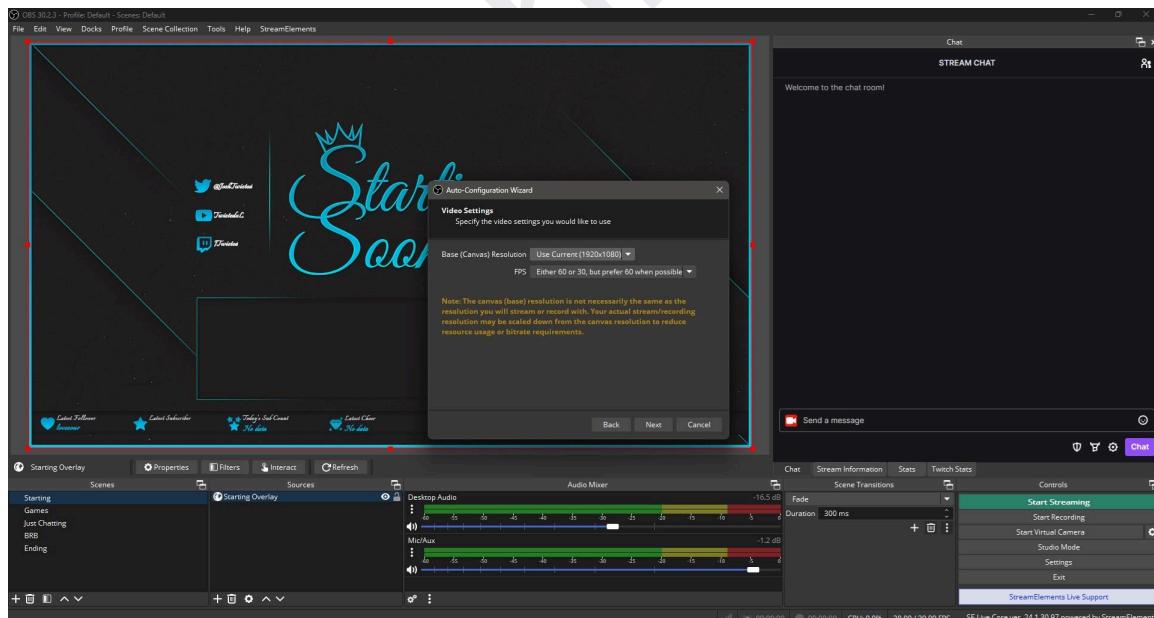

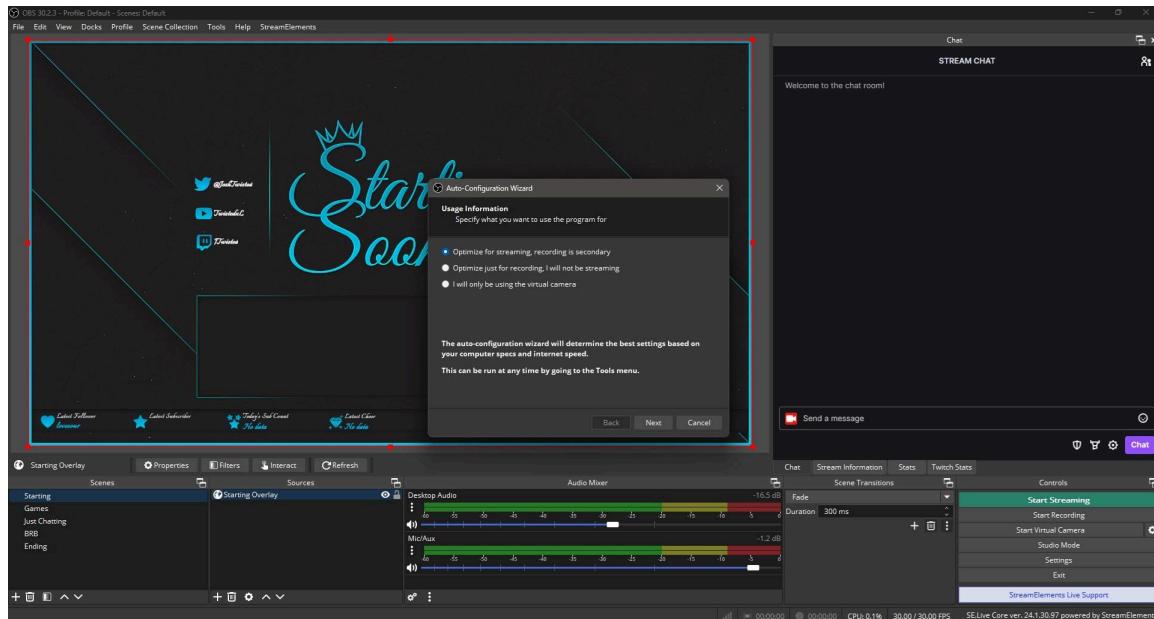

secondary' and click 'Next.'

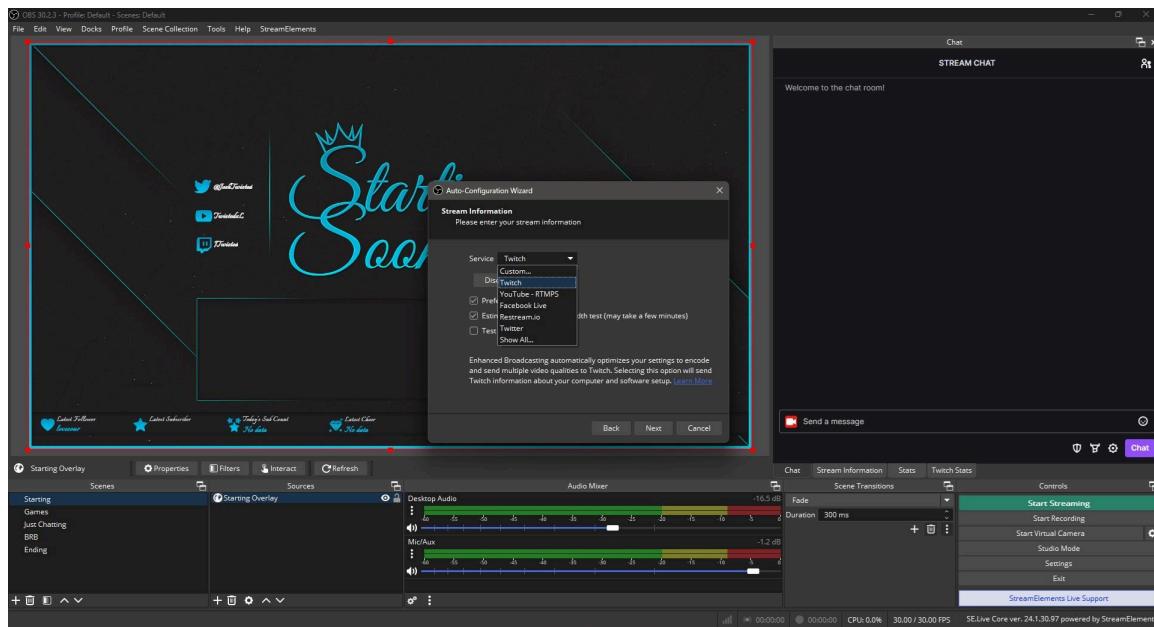

3. Follow the prompts to configure your settings based on your computer's performance.

### 3. Creating a Scene

#### Explanation:

A scene in OBS is a collection of sources (like video capture, images, and audio) that you want to display in your stream.

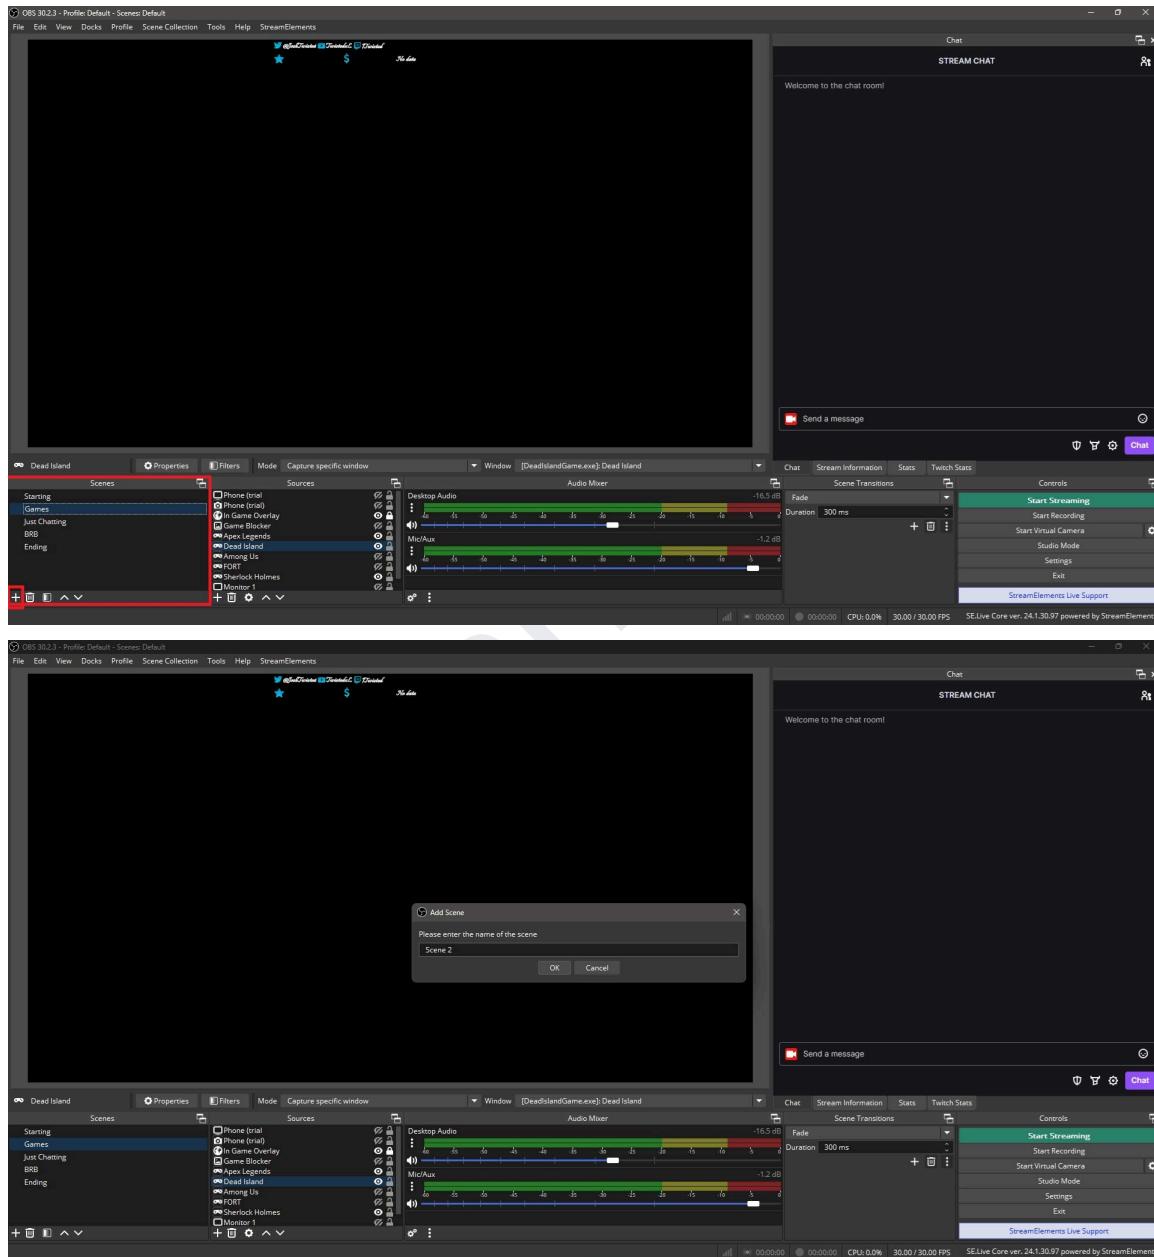

Step-by-Step Instructions:

1. In the OBS interface, locate the 'Scenes' box at the bottom left.
2. Click the '+' button to add a new scene. Name your scene (e.g., 'First Stream') and click 'OK.'

### Visual Aid:

## 4. Adding Sources to Your Scene

### Explanation:

Sources are the individual elements that make up your scene. This can include your display,

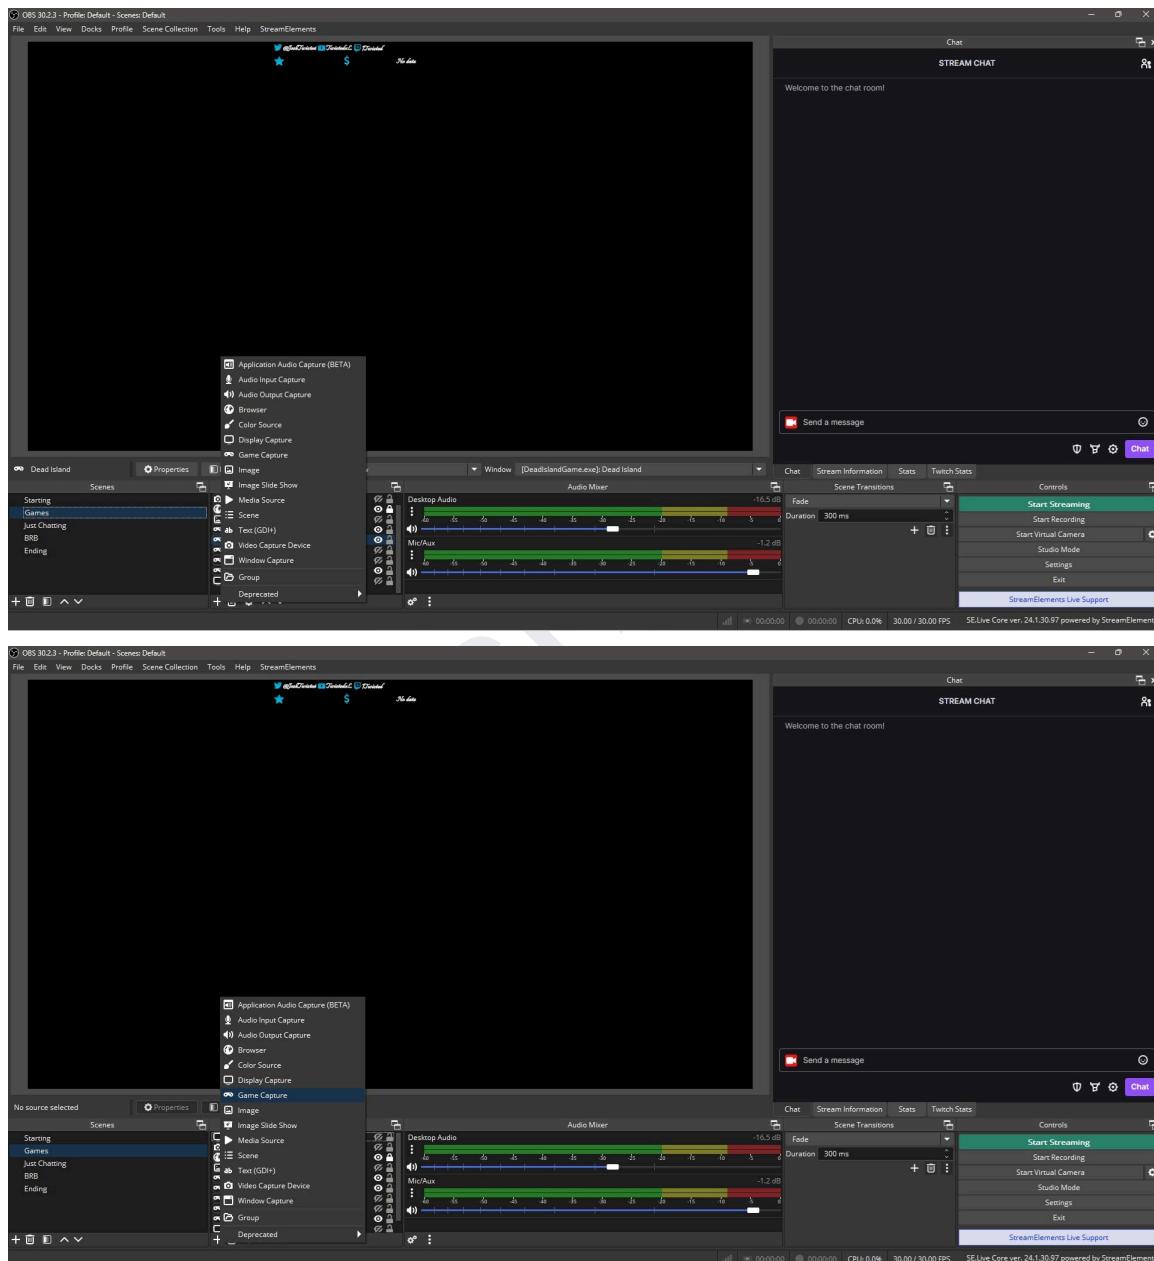

webcam, images, text, and more.

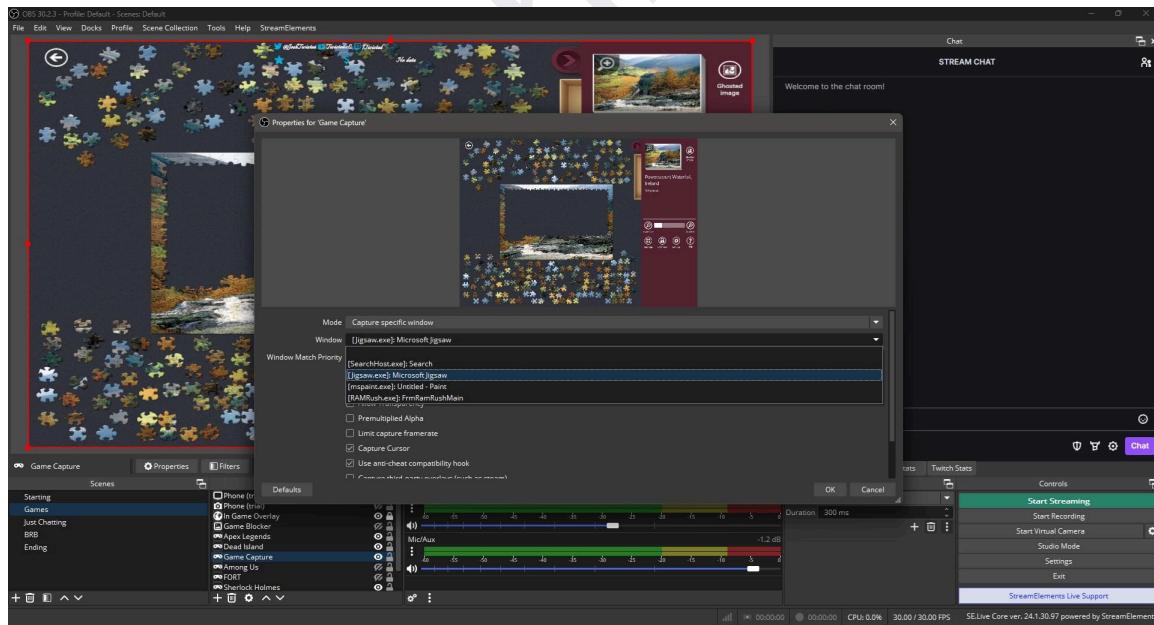

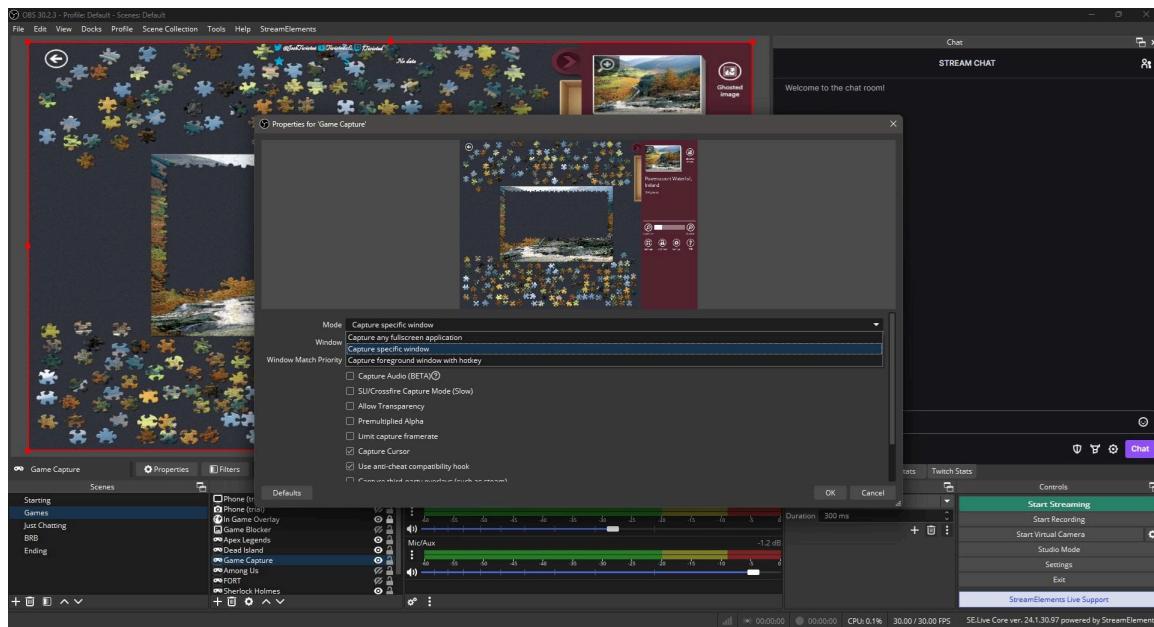

**Step-by-Step Instructions:**

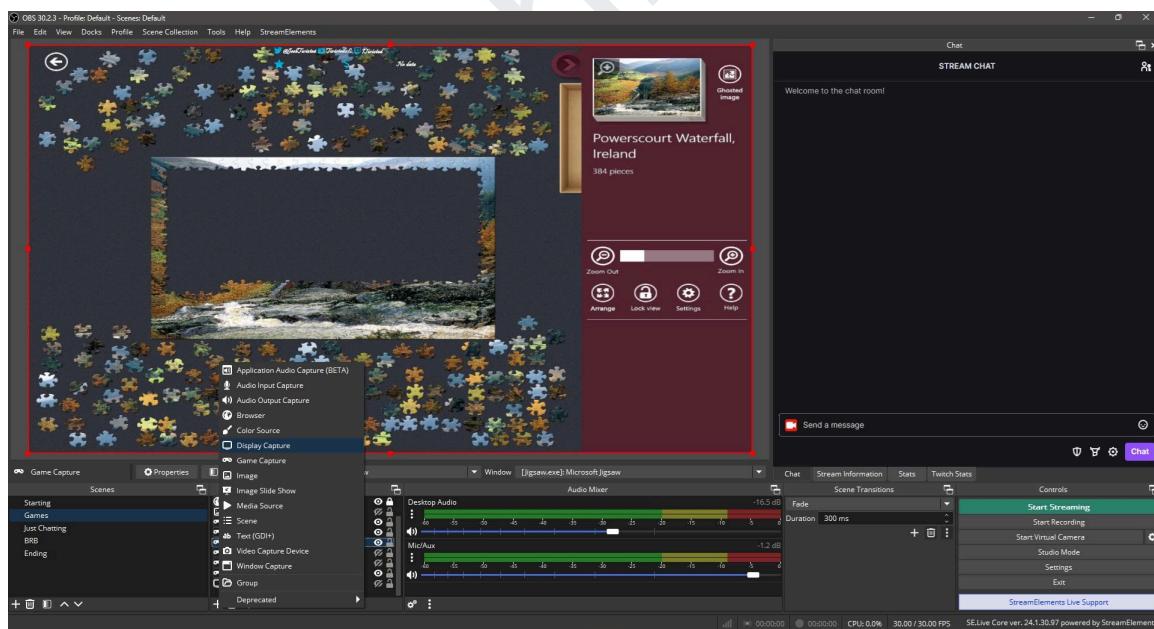

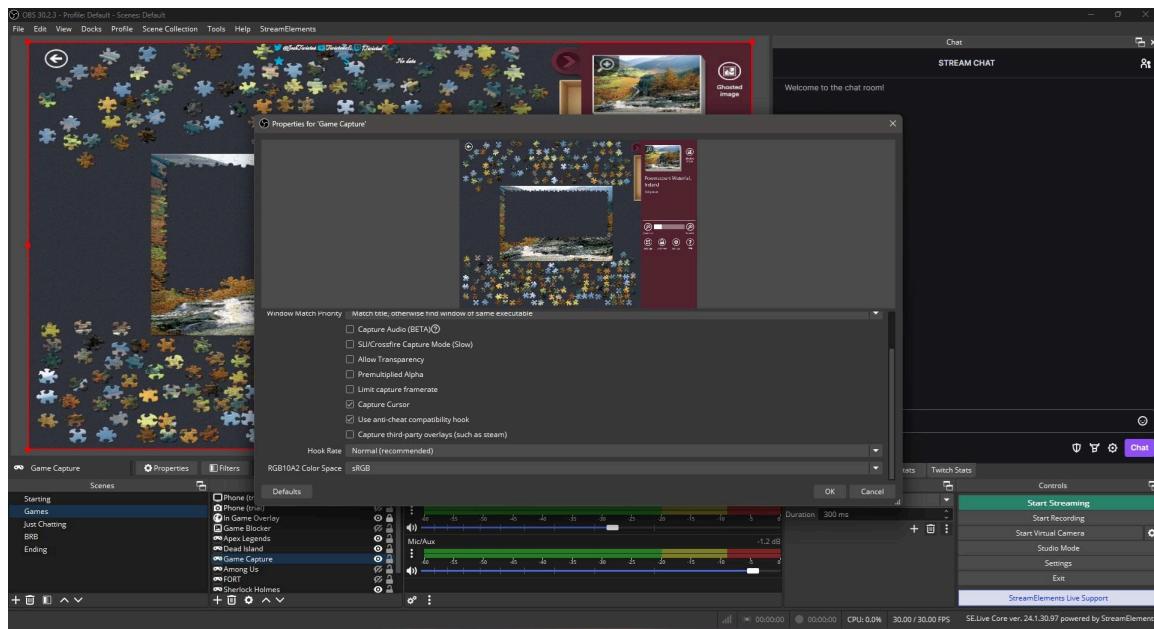

1. In the 'Sources' box next to 'Scenes,' click the '+' button to add a new source.
2. Choose 'Display Capture' to capture your screen. Name it and click 'OK.'
3. In the properties window, select the display you want to capture and click 'OK.'
4. Repeat the process to add a 'Video Capture Device' for your webcam. Select your webcam from the list and click 'OK.'
5. Add 'Audio Input Capture' to capture your microphone audio. Select your microphone from the list and click 'OK.'

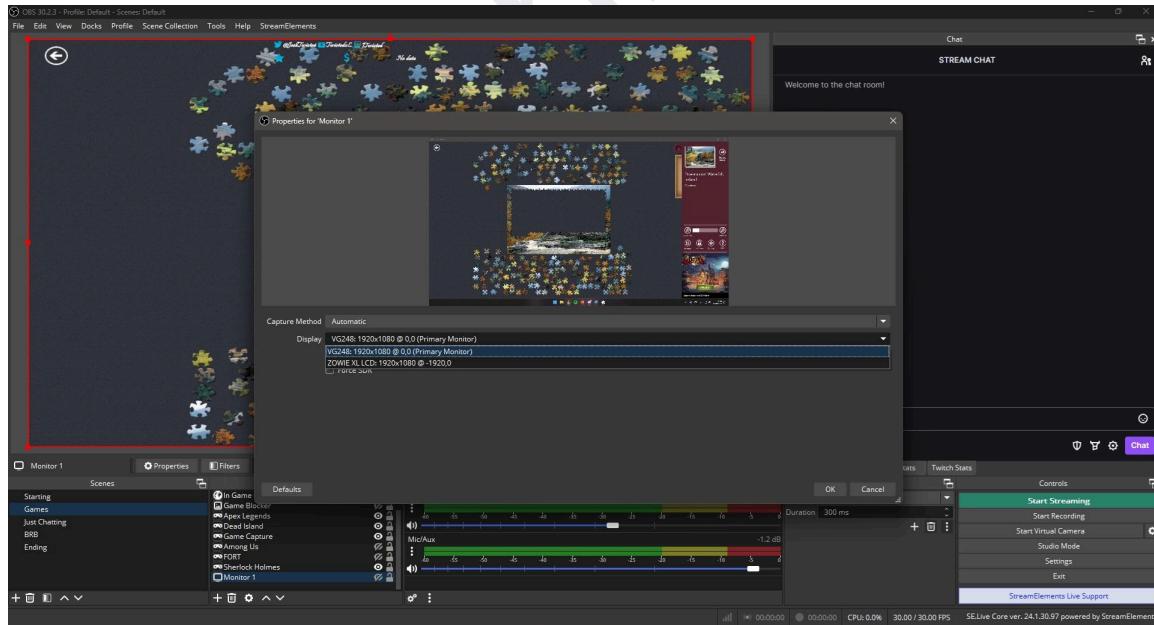

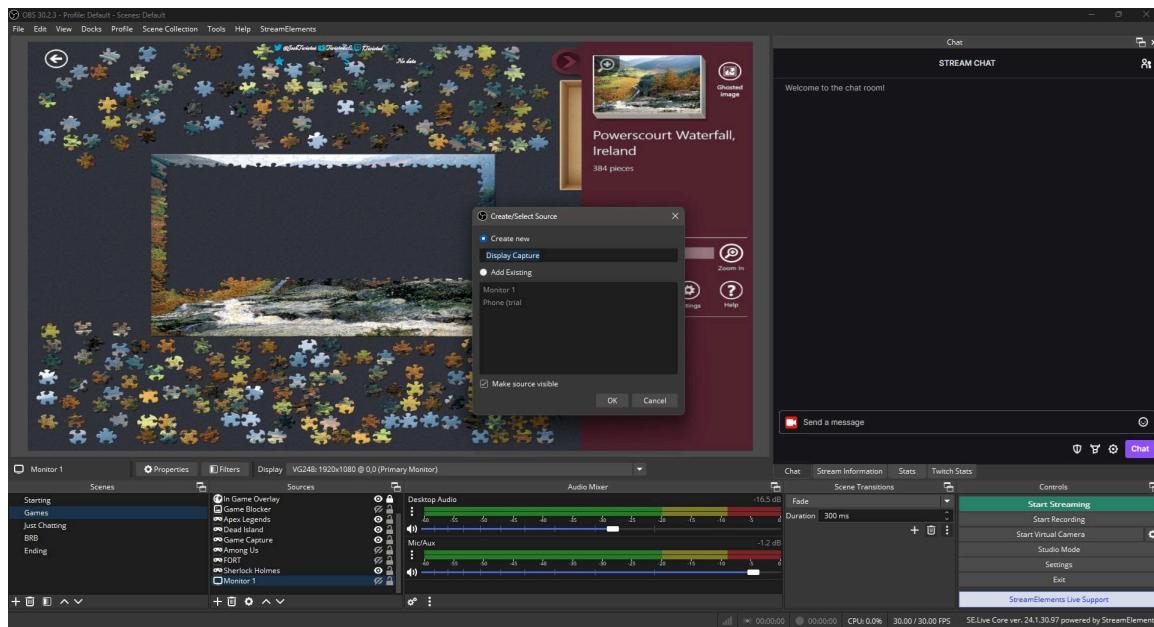

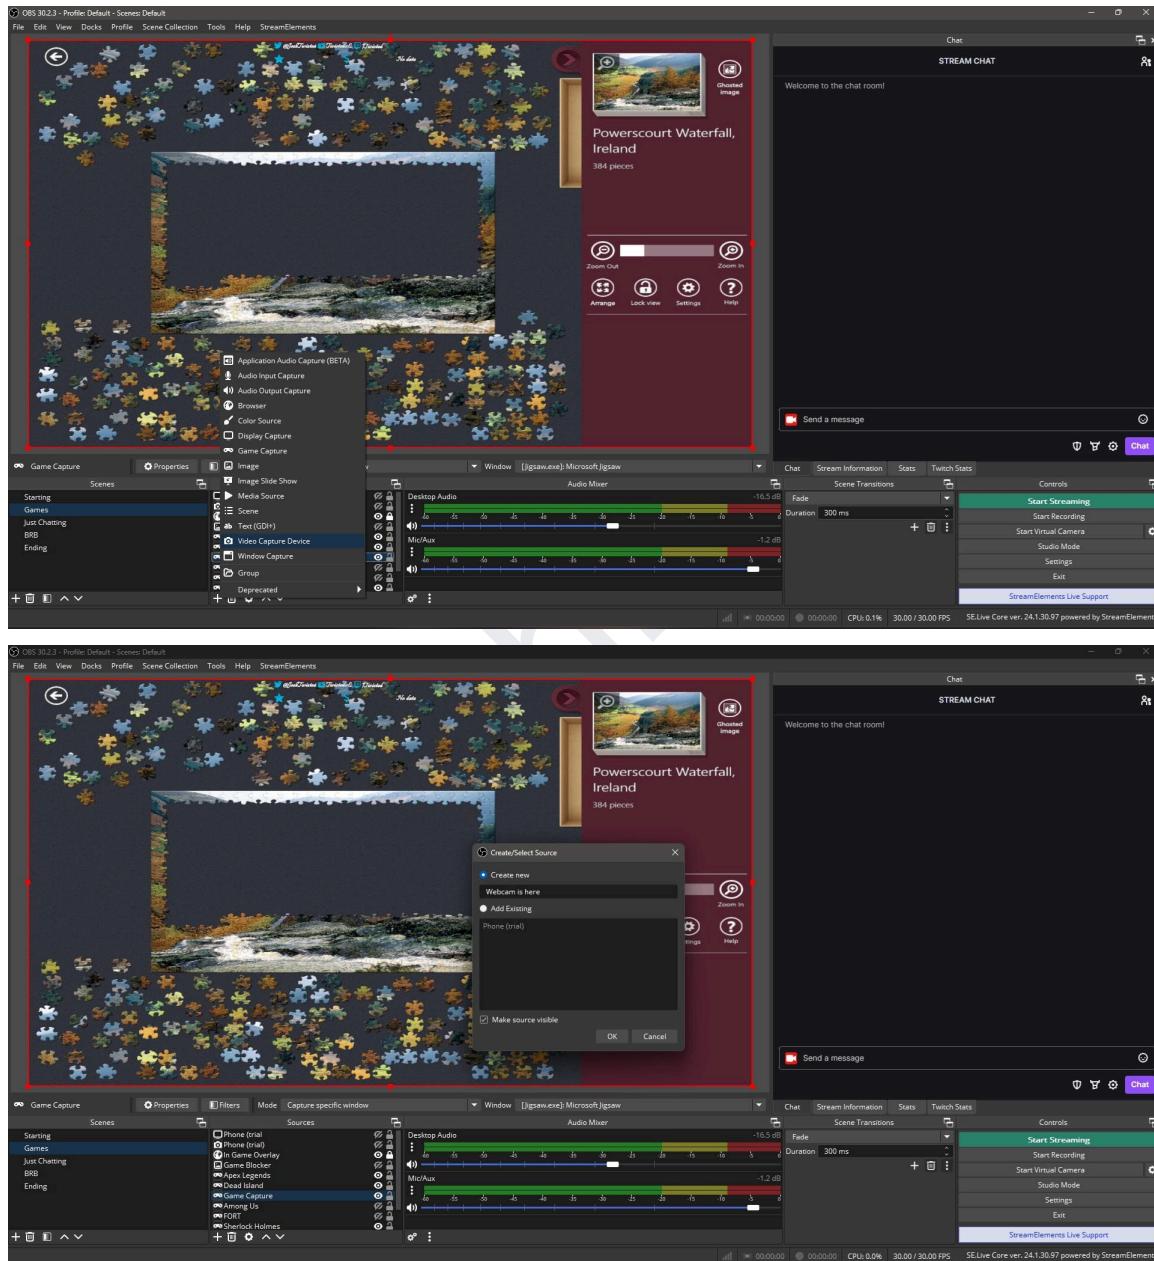

### Visual Aid:

## 5. Configuring Audio Settings

### Step-by-Step Instructions:

1. In the 'Audio Mixer' box, you'll see your audio sources (e.g., Mic/Aux and Desktop Audio).
2. Click the gear icon next to each audio source and select 'Properties' to adjust settings like

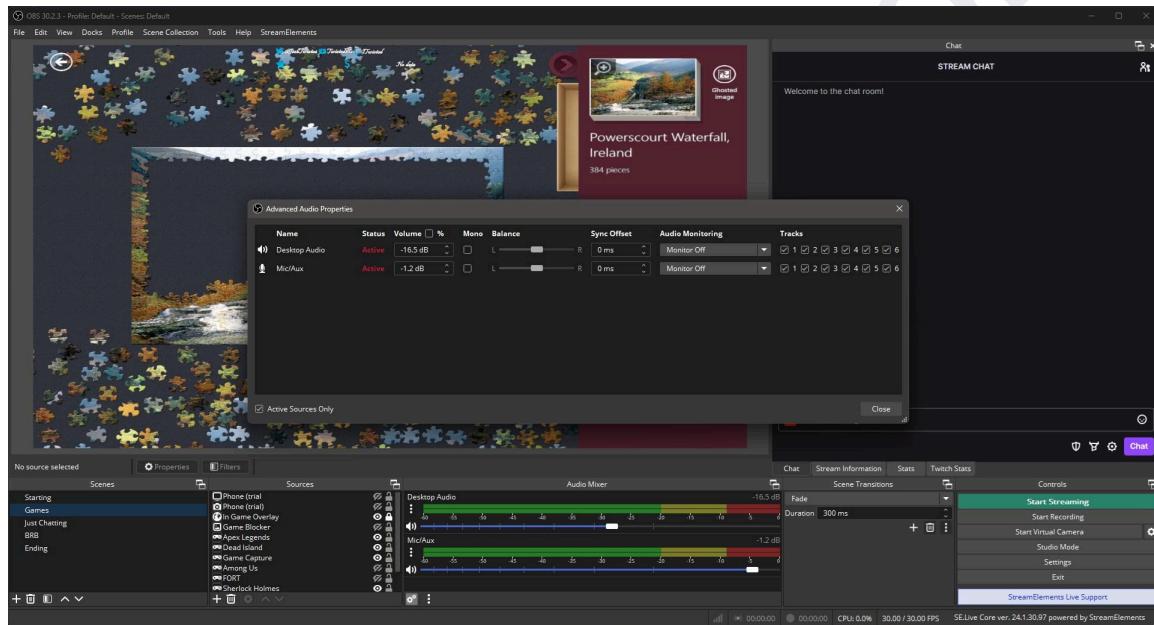

volume and device selection.

Tips:

- Ensure your microphone volume is not too high to avoid distortion.
- Test your audio levels before going live to ensure a good balance between your voice and any background audio.

## 6. Configuring Video Settings

Step-by-Step Instructions:

1. Go to 'Settings' in the bottom right corner of the OBS interface.
2. Click on 'Video' in the left-hand menu.
3. Set your 'Base (Canvas) Resolution' to your screen resolution (e.g., 1920x1080).
4. Set your 'Output (Scaled) Resolution' to the desired streaming resolution (e.g., 1280x720 for better performance).
5. Choose your 'Common FPS Values' (e.g., 30 or 60 FPS).

Tips:

- Higher resolutions and FPS require more processing power and bandwidth. Choose settings that your computer and internet connection can handle.

**Visual Aid:**

Include a screenshot of the 'Video' settings window.

## 7. Stream Settings

Step-by-Step Instructions:

1. In the 'Settings' menu, click on 'Stream.'
2. Select your streaming service (Twitch, YouTube, Facebook, etc.) from the 'Service' dropdown menu.
3. Obtain your stream key from your streaming platform's dashboard.
4. Enter the stream key into the 'Stream Key' field in OBS and click 'OK.'

**Visual Aid:**

Include a screenshot of the 'Stream' settings window.

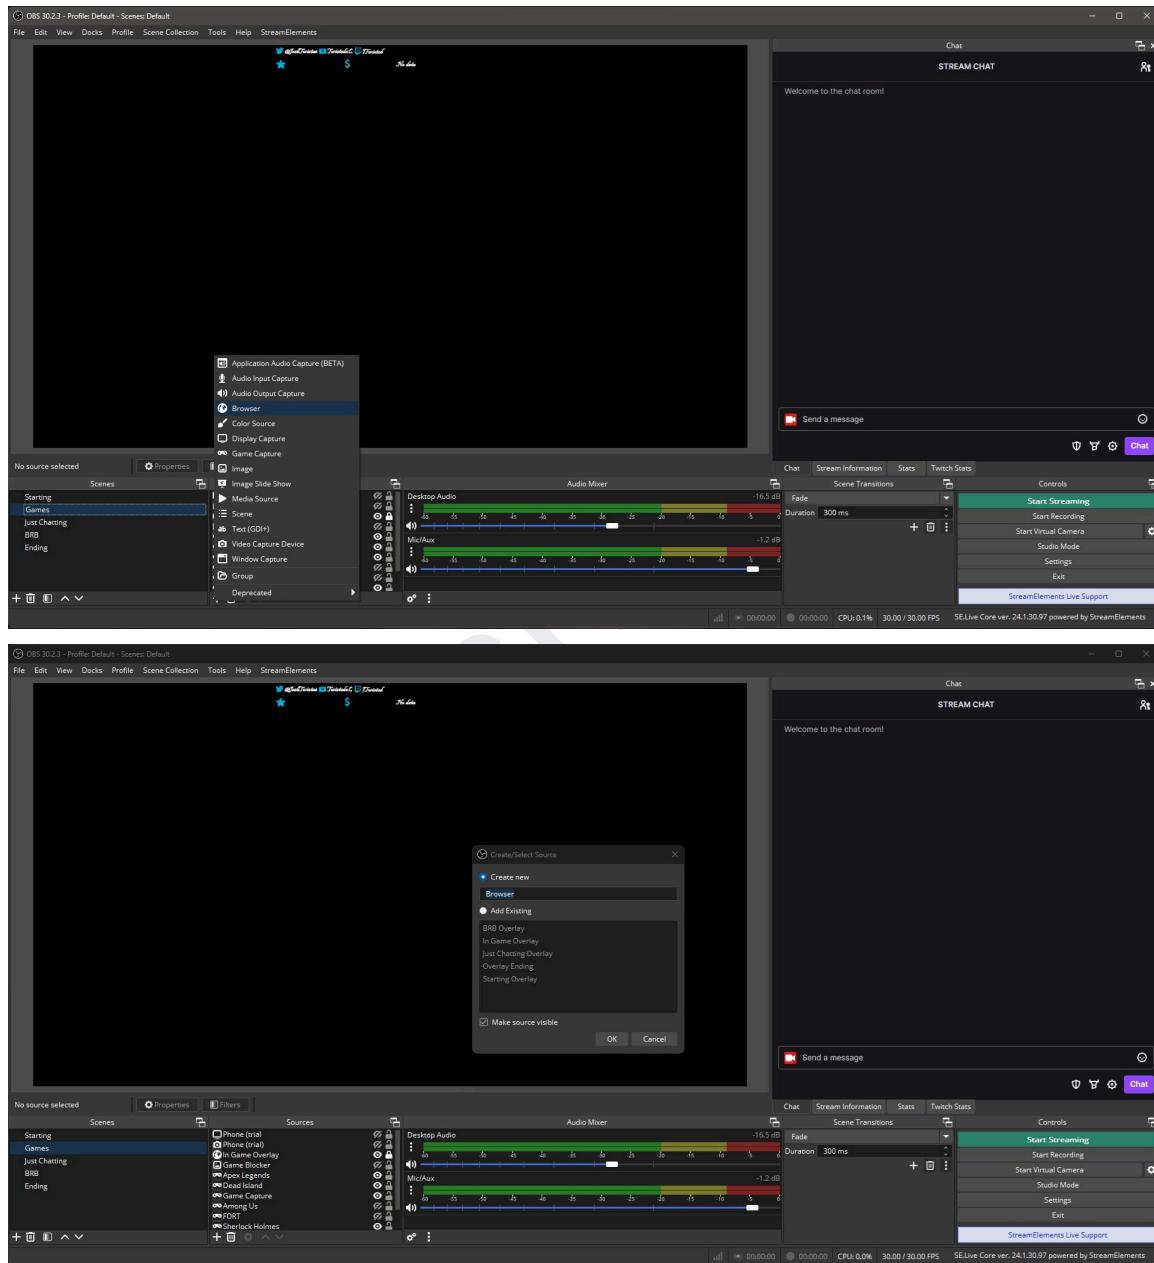

## 8. Adding Overlays and Alerts

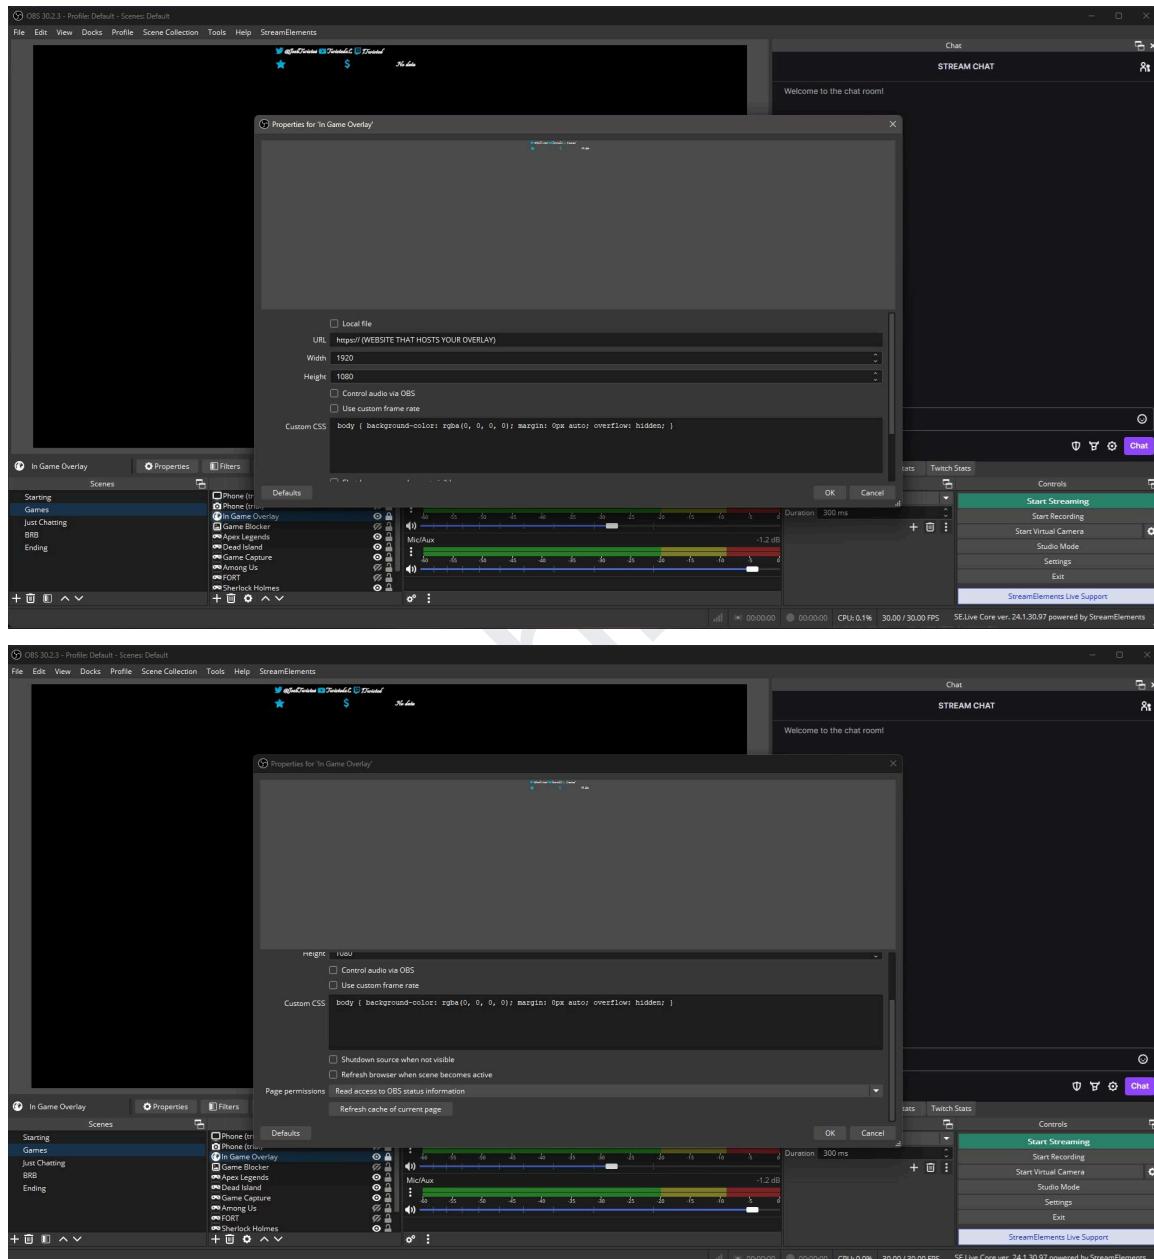

Step-by-Step Instructions:

1. Use a platform like Streamlabs or StreamElements to create overlays and alerts.
2. Copy the URL provided by the platform for your overlay.
3. In OBS, click the '+' button in the 'Sources' box and select 'Browser.'
4. Paste the URL into the URL field and adjust the width and height as needed. Click 'OK.'

### Visual Aid:

## 9. Going Live

### Step-by-Step Instructions:

1. Before going live, click 'Start Recording' in OBS to test your setup. Record a short video to

ensure everything is working correctly.

2. When you're ready, click 'Start Streaming' in the OBS interface.
3. Monitor your stream on your streaming platform's dashboard to ensure it's running smoothly.

Tips:

- Keep an eye on your stream health and chat to engage with viewers and address any issues quickly.
- Have a backup plan in case of technical difficulties (e.g., restarting OBS or your computer).

#### **Visual Aid:**

Include a screenshot of the 'Start Streaming' button in the OBS interface.

#### **Conclusion**

Congratulations! You've set up OBS and are ready to go live for the first time. Remember to test your setup regularly and make adjustments as needed to ensure the best streaming experience for you and your viewers.
