

Feb 16, 2023 | 📅 W3C SustyWeb CG (WebDev) #3

Attendees: Alexander Dawson , Ines Akrap, Jon Gibbins, Nahuai Badiola, Tim Frick

Notes:

1. We discussed all of the latest updates to the wiki, including the new (homepage) Meeting section, conformance rating change (committee templates); plus the cross-referencing, language listings, committee categories, and new links (added to the Resources page).
2. The latest news from the other committee's (what they are working on) was covered.
3. We spoke at length about ensuring the specification would remain evergreen; and the pros and cons of a living document, vs a static (strict) set of guidelines alongside a wiki of technology specific guidelines.
4. Finally, the group's new year's resolution is to start making evidence-based guidelines using existing Resources, or if these don't exist; new citations via cross-references.

Action Items

- ☐ News:
 - Wiki Updates: FAQs, Resources (Meetings), & Guideline links (Committees).
 - Slack Committees: Bookmarks to wiki, resources & guidelines (where available).
 - Published my [research](#) on Carbon Impact of Web Standards & Variables Map.
- ☐ Outstanding:
 - Getting a [first draft](#) of guidelines put together for the end of Q1 2023.
 - Open Mic (Anything to add / present / vote / progress / questions)?
