

Disabled Access

There is an access ramp at the front of the building as well as automatic doors on entry to the building and into the reception area. A lift is available within the surgery building to ensure patients have access to the upper floors, as required. We have a wheelchair available for use in the surgery, please just ask at reception if you require any assistance. Facilities with disabled access are available on both floors.

Hearing Difficulties

If you are experiencing hearing difficulties when being called in to see the doctor or nurse, please do let us know in order for us to set up an alert on your medical records and the clinician will personally collect you from the waiting room. There are also visual display boards in both downstairs and upstairs reception areas that will inform patients when the clinician is calling them in, showing which room to go to.
