## AI Lesson Planning Tools

[Almanack.ai](#) - Features lesson planning tools, an intelligent grading assistant, and resource generation for worksheets, quizzes, tests, video recommendations, slide deck, group activities, and discussion questions.

[Brisk](#) - Brisk is an all-in-one solution for teachers to speed up grading, course creation, and feedback. Works with Google Docs through a Google Chrome extension.

[Chalkie](#) - AI interactive lesson generator. Use your own files or a website URL as a starting point. Customize with your planning model.

[ClassPoint AI](#) - Generates thought-provoking quiz questions from PowerPoint slides using AI technology. It offers multiple question formats and supports multiple languages.

[Conker](#) - Create multiple-choice quizzes and formative assessments for various grade levels, supported by topic ideas and reading materials.

[Curipod](#) - Create interactive slide decks based on given topics.

[Diffit](#) - Create or adapt curriculum-aligned materials for different grade levels and languages. It streamlines content differentiation, allowing for easy adjustments and ready-to-use student activities, saving teachers time and ensuring all students can access grade-level content.

[Eduaide.ai](#) - Uses AI to support teachers in lesson development, content creation, and student feedback. Has over 100 resource types, streamlines instructional planning with its AI Teaching Assistant, offers personalized content adjustments to cater to diverse learners, and provides a Feedback Bot that generates detailed reports for student improvement. Additionally, its unique Assessment Builder and Eduaide Chat empower educators to craft tailored assessments and seek specific information, ensuring a comprehensive, efficient, and tailored teaching experience.

[Findsight AI](#) - Search engine to explore and compare core ideas from numerous non-fiction works.

[Formative AI](#) - Utilizes ChatGPT for generating standard-aligned questions and giving hints to students.

[MagicSchool.ai](#) - Aids in lesson planning, differentiation, assessment creation, Individualized Education Plans (IEPs) drafting, and clear communication. Prioritizes safety and privacy, ensuring compliance with FERPA and COPPA, and refrains from storing any student's personal identifiable information. Its text leveler can instantly rewrite existing content to cater to students with varying reading levels.

[Monsha.ai](#) - Generates standard-aligned curricula, lesson plans, assessments, and presentations, all tailored to their specific needs. Monsha also allows easy integration with platforms like Google Classroom, enabling seamless export and use of materials.

[Perplexity](#) - Conversation-style AI that answers questions with cited resources, free to use.

[QuestionWell](#) - Just input some reading, and the AI will write Essential Questions, Learning Objectives, and aligned multiple choice questions, which you can then export to your favorite tool.

[Scholarcy](#) - Summarizing tool to assess and evaluate the significance of various documents like articles and reports. It generates summary flashcards for Word or PDF files, presents them in a structured format, and offers additional features like reference extraction and browser extensions to create a searchable collection of summary cards from open-access repositories.

[Summarize.tech](#) - Summarizes long YouTube videos for free.

[Twee.com](#) - Lesson content generation tool for teachers (specifically geared towards English teachers, but has a lot for any subject). Has a free beta. Tools allow you to create questions from a YouTube video, text and questions on any given topic, lead-in activities for a text, vocabulary exercises, grammar drills, and homework assignments.

## AI Tutors

[Class Companion](#) - Offers instant AI-driven feedback on assignments, allowing students to make multiple attempts with hints, which improves comprehension and mastery. It supports various assignment types, such as essays, short answers, and multiple-choice questions, with customizable rubrics and feedback settings. Teachers can track student progress through detailed reports on engagement and mastery, and easily integrate assignments with platforms like Google Classroom.
