[#797]

Original by ben, spin-off by Aarex

This is a part of the “Rejected but improved” series.

“We discovered the anormal planet. It seems that large shards speed up time here, but the place looks really shattered. Time Dilation is approaching us.”

1. Acceleration

Requires: Prismatic Shards

Time Acceleration is a separate Realm:

- [+] Timestone replaces Platinum
- [+] Unlock the Accelerator
- [-] Resets everything that Oceanic does

It is locked in ancient ruins on a terraformed planet, but shattered. Outside of this realm, you'll see a black hole underneath. The sentient shards impacted this Realm, breaking this realm apart. To make this worse, you can see Shards being stuck midway.

Shattered...

The field seems to be broken, and grass grows really fast. Portions are found anywhere in this Realm. Here, grass merges into next-tier grass on idle. And any-tier grass grows, so you have to merge.

You can carry 50% of grass into different minifields to let it merge and never get automatically cut. But when you're inside, you have to act fast. If not, you'll be brought out without gaining anything.

Keep Progress Safe!

With the Temporal Vault, you can save your Oceanic run and perform an Oceanic reset early.

However, if you have more Dark Matter, then it costs more Timestones.
You can even retrieve your progress back if you accidentally enter this Realm.

Accelerate the Time!

Use Timestone to activate an Accelerator.
Accelerator speeds up time while consuming.
However, it slows down if there's nothing left.
There's multiple instances on Accelerator.

Everlasting Grass Upgrades

Upgrade

True Grow Speed

+1/s to Grow Speed after
Compaction.

True Range

+1 to Range after Density.

Light Speed

Speed up pre-Acceleration time by
+1x.

XP, XP! Anywhere!

Gain +50% more XP.
25% increase per 25 levels.

Slowdown...

Slow down the Central Field by
+10%.

New Boosts

[// TO BE DETERMINED //]

2. 🚀 Relativity

Reset Layer: 1

Requires: Level ??? in Time Acceleration

Relativity resets Temporal Grass and Temporal Grass Upgrades. You'll keep Temporal Vault and Accelerators.

Ring Transfer

On First Relativity, Grass will be able to move throughout an outer ring for a high merge efficiency. The central field doesn't get affected.

Space Dive

On entering, you'll notice that you are skydiving. Don't worry, you can even cut isolated grass here! Bumping an obstacle causes you to lose grass. On landing, you'll be able to use it for Isolated Upgrades, and you'll exit this Minigame.

Relativity Upgrades

Upgrade

Time Machine

Increase Timewarp Power on cutting Timestones.

Alternate Generate

Generate 0.1% of reset resources on cutting Timestones.

High-Tier Capacity

Increase the minimum tier of grass spawn.

Auto-Merge

Automatically transfer low-tier grass to mini-fields.

Relativity TP

Gain +50% more TP.
25% increase per 25 levels.

New Boosts

[// TO BE DETERMINED //]

3. Spectroscopy

Reset Layer: 2

Requires: Level ??? in Time Acceleration

Spectroscopy resets everything that Relativity resets, as well as Relativity and Isolated Grass.

It's a one-time reset, like "Break the Ring." There's no Spectroscopy Upgrades.

Object Orbit

You can orbit objects. Heavier objects orbit lighter objects.

When one is orbiting a satellite, Charge is delivered to a satellite. It is then transferred through satellites until your home asteroid is found. It then becomes the proficient source of Time Acceleration thanks to your Spectroscope.

New Boosts

[// TO BE DETERMINED //]

4. Grass-Warp

Reset Layer: 3

Requires: Level ??? in Time Acceleration

[// TO BE DETERMINED //]

Here's a minigame while you wait for Grass-Warps.

Domino Drop

You can drop dominoes anywhere from the top.

Blocks are determined by RNG weights.

You must fill rows to clear.

If a domino lands on the 11th row, the first row clears.

Fully-filled cleared rows give you Relativity Points.

Kinds of blocks which are cleared are converted into boosts.

There are other skills that give a bigger impact depending on difficulty.
