

South Barwon 6km

Course map

Start and Finish

Start and finish is located off the road alongside the Marshall cricket ground pavilion

Use cones to separate the section of road leading up to and away from the start away from any possible traffic along the road.

Direct runners north along the road around the ovals, looping back to the start of the Waurn Ponds Creek road where runners cross to the concrete path on the left. Cones required here.

The course runs under the Barwon Heads road and then turns left to follow the Waurin Ponds Creek path.

Follow the path south-west .

Left hand turn across the foot bridge -

After crossing over the sewage pipe there is a blind righthand turn that should be pointed out in the briefing.

The course then runs west to Bailey street and turns south – chalk arrow could be used here

Running along the path in a southerly direction there is a righthand turn towards the Torquay road just beyond the fence on the righthand side that can easily be missed by runners not paying attention - cones and chalk marks or a Marshal is required.

Blind turn just before the Torquay road and left hand turn across the bridge.

Cones are required along the footpath and there is a sharp left at the end to cross onto the grass before the start of the post and rail fence.

Course runs across the grass between the two trees below the veers left.

The course runs easterly along the creek back to the footpath where there is a right turn onto the path for a short distance before turning left to resume heading east.

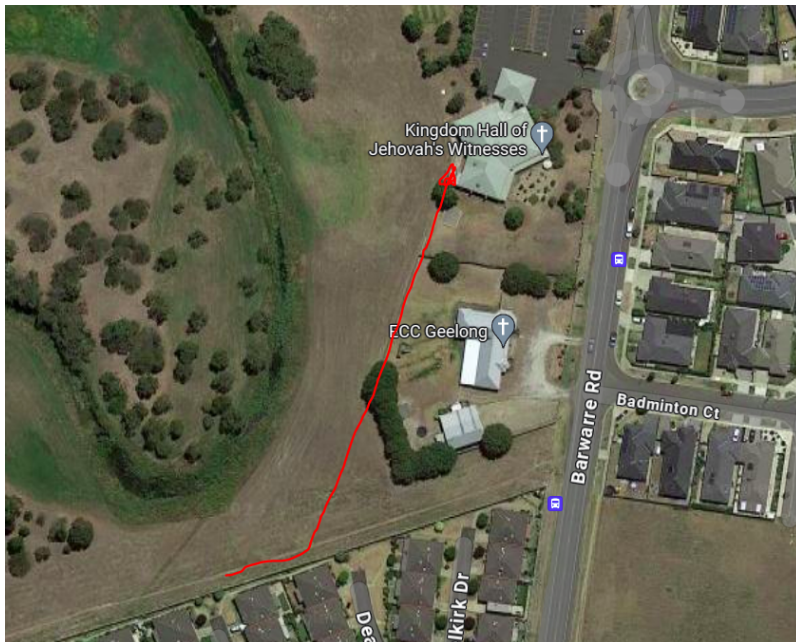

Follow the path east and continue on the crushed rock path behind the houses.

The course leaves the path at before the end of the crushed rock path so that there is a straight line across the path to the back of the Jehovah's Witness' property and runs alongside the back fence.

The bush on the right of picture is a landmark for the departure point.

Follow the fence line back towards the Barwon Heads road bridge where there is a sharp right

Turn left to join the new concrete path across the bridge.

Sharp left hand to return to the underpass below the bridge.

Turn left towards the underpass to rejoin the path back to the finish

Loop around the ovals to the finish.
