Discussion around the complex citation recommendations. Focusing on the record, rather than the collection.

Will be a new PID type.

What does it mean to get credit for your citation? Journal creates the link between the data and the publication but little citation information.. If journals can take this on we are on a winning path

Need letters of support from organisations - it doesn't commit you but confirms some good outcome of the group

One of our challenges is what to tell a researcher: where shall I put my data and what metadata/vocab etc

Access to EGU divisions, IT teams, editors, to identify and vet and manage the common resources at discipline level.

Do we have a timeframe for the RDA knowledge base?

Botswana- remote sensing data
