

Site-65 staff personal file

Staff name	Dr. William 'Bubbles' Jacobs
Date of onboarding	1/1/ [REDACTED]
Clearance level required for access	Clearance Level 4
Person completing onboarding process	Assistant. Emily baily 

Name: Dr. William 'Bubbles' Jacobs
Age: Unknown. States that he feels mid 20's
Country of origin: "The circus" - Unknown.
Height: 5'9
Weight: 50KG
Build: Slim

Background

Dr. Jacobs reports being born into a travelling circus, He does not know his country of origin however has a European accent of no distinction. He states that he was born into a family of clowns and that he spent his formative years travelling with the circus throughout all of Europe. (When speaking of this he was very joyous and kept laughing) He speaks of being mentored by his older brother during his younger years as preparation for "clown college" Mr Jacobs states that when he turned 18 he was sent away to clown college, He is unable to remember the country where this was but states that it was quite a journey to get to and that there was no sign of civilization around it. He states that he spent 4 Years at the college and would spend his Summer and Christmas breaks back home with his family at the circus, He claims to have graduated with a "diploma in clowning and a minor in accountancy" he attempted to show me this [diploma](#) which I have photographed and submitted in this document as evidence. Dr. Jacobs spent a while discussing his time at clown college with myself and states that while there he was given the nickname 'Bubbles' he stated that this is something that is given to every clown and is not something that is chosen and believes he was given this nickname because of his personality. He stated that he was "taught the secrets of clowning" and attempted to show me some "clown tricks" which I politely declined to see.

Based on the numbers that Dr. Jacobs told me he would have graduated between the ages of 21-23 and stated once he was done with college that he returned home to the circus. Travelling with the circus for a number of years before coming into the foundation.

Recruitment to the foundation

Dr. Jacobs first came to the attention of the foundation on 26/07/ [REDACTED] he was discovered by an expedition trip organised by the foundation to explore and gather more intelligence on [REDACTED] When he was found Dr. Jacobs was very compliant with the foundation staff and showed a keen interest in them. Mr. Jacobs built a rapport with one of the expedition members a Sr. Researcher by the name of Jake [REDACTED] The two of them continued in regular contact and the researcher wanted to recruit Dr. Jacobs into the foundation as he believed that he would be a good fit and would contribute greatly to the further research of SCPs. The Sr. Researcher wrote of his first experience and conversations with Dr. Jacobs and these have been included [here](#) as evidence as I believe them to be significant.

Dr. Jacobs was administered a psychological and physical examination before entry to the foundation and the results of which can be found [attached](#) to this file as evidence.

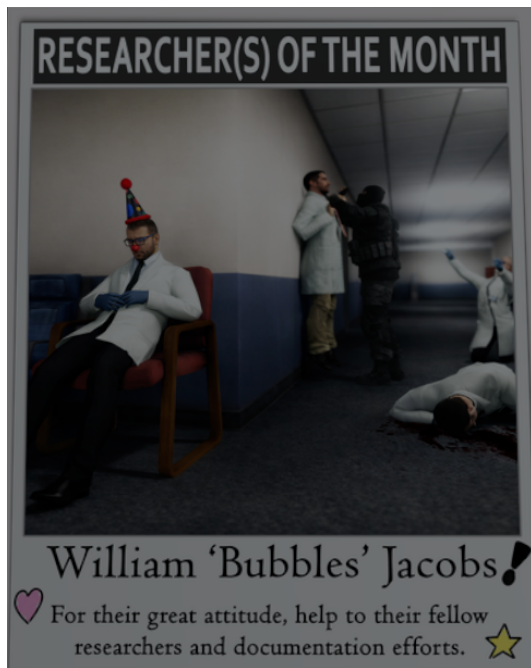

Progress of Dr. Jacobs

As part of foundation policy Dr. Jacobs was placed under a 2 week probationary period in which he was under the wing of a Sr. Researcher. This probationary period expired on 15/01/ [REDACTED] The Sr. Researcher that was chosen to help with the onboarding process was Sr. Researcher Nikolai Dimitri. Mr Dimitri provided a [progress report](#) of Dr. Jacobs on 14/01/ [REDACTED] using which we decided that Dr. Jacobs had **PASSED** his probationary period and was ready to move onto his own unsupervised research.

****Revised by Assistant. Baily 13/03/ [REDACTED]****

Since starting into his own unsupervised research Dr. Jacobs has dedicated most of his time to the psychological aspects of the SCPs contained here within Site-65. He has been a part of Project Calm and produced a number of documents relating to improving the mood of SCPs. Dr. Jacobs has what most would consider an unconventional approach to his research and can often be found using props from his circus days and tricks to entertain the SCPs, His research into this has produced

some interesting results. By nomination of his executive team Dr. Jacobs was awarded the Researcher of the month for the month of February [REDACTED]

Dr. Jacobs continues to research into the SCPs within the foundation and has commenced a piece of work relating to Type-Green reality benders.

****Revised by Assistant. Baily 10/04/[REDACTED]****

Dr. Jacobs has continued to make good progress within the foundation, recently becoming a Co Lead of the sub division of RSD known as ANOREP this sub division is dedicated to the protection of anomalous site personnel and the site as a whole. Dr. Jacobs speaks highly of this program and of his Co lead Dr. Aksakov. There has been good news flowing around the site relating to this sub division and a lot of positives overall coming from it. Site administration reports that they are satisfied with the progress of the project.

Unfortunately on 03/04/[REDACTED] Dr. Jacobs was found dead within the RSD lecture hall.

A formal investigation into the murder was conducted by the site's Internal Security Department, They found that an inspector by the name of [REDACTED] was responsible for the murder of Dr. Jacobs. No motive was uncovered in the investigation progress and the Commissioner overseeing the investigation reported that the inspector suffered a freak accident resulting in his death. No formal confirmation of the death of the inspector took place and no body was given into the site's mortuary team. Dr. Jacobs' body was moved by a group of researchers into a secure location to be preserved.

Dr. Jacobs' soul was located by site employed thaumatologists who specialise in spirits and the souls of the dead. His soul was trapped in the section of heaven written about as “The lovers” this dates back to the roman era where Dante wrote of the spheres of heaven. He attributed this sphere of heaven to the planet Venus which was also the planet associated with love and the Greek goddess Aphrodite. Dante wrote that people within this section of heaven were deficient in temperance. An expert group was composed to deal with the resurrection of Dr. Jacobs which is listed below;

- Dr. Oleg V. Aksakov
- Dr. Vita Vanesco
- Dr. Thistle Briarwyn
- Thaumatologist ‘Lily’

The expedition and subsequent revival of Dr. Jacobs served as a test run for the newly developed sub regiment of the RSD department known as L.O.R.E this sub regiment specialises in thaumatological powers and rituals and using them for the good of the foundation and furthermore the good of humanity.

Dr. Jacobs [revival](#) was a complete success and he was admitted into the site's medical department for a complete medical checkup. Dr. Jacobs presents with no memory of the incident and does not know about his temporary death and is to under no circumstance be made aware of this.

Thank you to everyone who has and continues to contribute to Bubbles' lore, without you all Bubbles would not be the character he is and would not be nearly as fun to play as.
