Endorsed Delegate Assessment Criteria - WOO DAO

The Endorsed Delegate Assessment Criteria is self-reported and is intended to provide DYDX holders with deeper information about an Endorsed Delegate.

Delegate	Alignment	Experience	Engagement	Diversity	Conflicts	Total
WOO DAO	2/2	2/2	2/2	2/2	2/2	10/10

Detailed Assessment:

1. Alignment

- 2 High-level commitment to the dYdX protocol and governance. Delegate will benefit if the dYdX protocol grows.
- 1 Some commitment to the dYdX protocol and governance. Delegate may indirectly benefit if the dYdX protocol grows.
- **0** No commitment to the dYdX protocol and governance.

Details: WOO DAO represents WOO Network and Kronos Research. Kronos Research is a top designated market maker since launch, a seed round participant in DYDX's fundraising, and a large token holder. WOO Network is a partner that provides liquidity to Kronos Research as part of their trading activities. Both can benefit greatly from the growth of the network.

2. Experience

- **2** Delegate has a professional background in crypto governance, smart contract development, code auditing, financial risk modeling, DeFi protocols, or similar.
- 1 Delegate has a personal interest in the criteria listed above.
- **0** Delegate has an unrelated background.

Details: As a DAO, we have extensive experience and knowledge on governance, DeFi, exchanges, etc.

3. Engagement

- 2 Delegate has a strong history of participating in forums, voting and/or participating with other relevant communities.
- 1 Delegate has a limited history of community engagement.

• **0** – Delegate has no history of community engagement.

Details: We have participated in a number of key votes on DYDX, and have dedicated members of our DAO working on the relationship between DYDX and the community.

4. Diversity of Perspective

- 2 Delegate has a unique perspective compared to other delegates.
- 1 Delegate represents a perspective that is underrepresented in governance.
- **0** Delegate represents a perspective that is widely represented in governance.

Details: Quite possibly the most well-rounded perspective, since we are an investor, token holder, market-maker, trading firm, liquidity provider, exchange, and hold many other subject-matter experts within the DAO.

5. Conflicts

- 2 Delegate has no existing conflicts with the dYdX protocol, and would not benefit in any way from the dYdX protocol's failure.
- 1 Delegate has no outright conflicts with the dYdX protocol, but may benefit in some unusual circumstances if the dYdX protocol fails.
- **0** Delegate has an outright conflict with the dYdX protocol, or may benefit in typical circumstances if the protocol fails.

Details: No conflicts

I confirm that the information above is accurate and up to date.
