Petition to Remove Direktor Wormseed

People of Söderrike,

We, the undersigned, demand the immediate removal of Direktor Wormseed as Head of State. His leadership has been marked by incompetence, misuse of power, and blatant violations of both our constitution and Imperial Federation law. Here's why:

1. Failed Leadership

- **No Growth, No Development** – Under Wormseed, Söderrike has stagnated, lacking infrastructure, economic progress, or new citizens.

- **Abandoning Responsibilities** – He left the construction of vital infrastructure, like the Advanced Ore Smelter and XP production, entirely to his citizens, failing at his role.

2. Abuse of Power and Resources

Personal Gain – He pressured a citizen to pay for his PvP gear, proving exploitation of citizens.

Power Grab – He passed amendments consolidating power, making himself Head of State and sole editor of the national wiki.

3. Illegal and Reckless Behavior

Unauthorized Military Actions – He attempted to enlist Bloxernistan for an illegal assassination of Casino_Conqueror, violating both IF law and our constitution.

Diplomatic Blunders – He engaged in unauthorized talks with Nara and failed in efforts to free Johnny.

4. Spreading Falsehoods

Fabricated Coup Claims – He falsely labeled a harmless prank as a military coup, causing unnecessary panic and division.

5. Ignoring the Will of the People

Disregarding Citizen Support – He repeatedly ignores popular support for bills, acting against the people's interest, such as when Softkitten5 and Casino offered to change the title of the Republic.

6. Stockpiling Weapons Without Justification

Unexplained Arsenal – He has amassed a concerning stockpile of weapons, including TNT, raising serious questions about his intentions.

7. Foreign Contacts

Pavian Contacts - Wormseed has contacts within Pavia, which have sold him weapons, helped him consolidate power over our Republic. He keeps their identities secret. He has befriended countless members of the Pavian Nobility and Government, and is a Pavian citizen despite having no property there.

Foreign Governorship - Wormseed is the Governor of Luce Nera in Bloxernistan, and said he would flee there if he is voted out of his position in our Republic.

Breaking into private property - Wormseed clearly ignored a sign that said "PRIVATE PROPERTY. DO NOT ENTER, OR FACE CONSEQUENCES." breaking through the Obsidian-Reinforced barrier into Casino's Private Property without permission. Wormseed received no consequences other than being damaged by a fall trap.
